HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney, Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No.1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° raidal.

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80' (AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron replaced by lgtd wind sock - lctd at former tetrahedron lctn. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26 opened for take-offs to E only - no lndgs. (3-11)

HUECO MOUNTAIN-RADIO: About May 31, MHW will be cmsnd. Freq: 317 kc. Ident: HCO. Lctd lat 31-49-06, long. 105-59-42. (4-22)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordncance Paint approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)

TEXAS: KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement. (1-21)
KERMIT-ROBINSON ARPT: Clsd due to oil well drilling. (9-6)

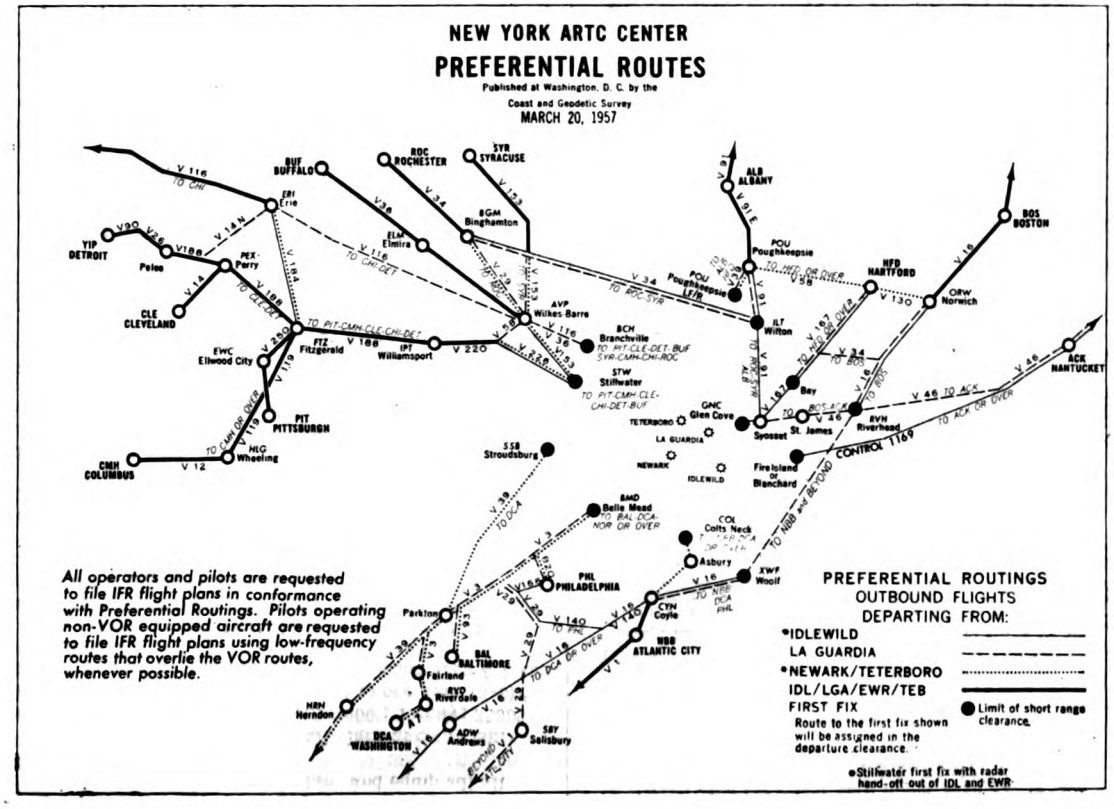
WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather is VFR. (12-28)

WYOMING: CASPER-AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Two 200' fences SW end of ramp not obstn lgtd. (11-16)
CHEROKEE-RADIO: May 8, VOR/DME flgt-checked, opern normal.
CHEYENNE ARPT: Overrun lgts (apch lgts) rnwy 26 inop. (10-18)
CRAZYWOMAN-RADIO: About May 13, VOR will be shut down until approx June 10. During this period, the following arwys will be unusable. V19 and V19E Sheridan to Casper. V247 Crazywoman to Douglas. (5-13)
GILLETTE ARPT: 50'-75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000';225°-300°, 26 n mi at 15,000'.
**RIVERTON ARPT: 2 rnwys avail - (10-28) 6200' hard surface, (N/S) 3200' sod; storage, minor acft and eng repairs avail; unicom. (4-8)
ROCKRIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000';40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000';230°-360°, 43 n mi at 12,000'. About May 6, VOR/DME will be shut down until approx June 3. During this period the following will be unusable. V118 LAR-RKR; V-138 and 138N RKR-CYS; V-196 RKR-Wheatland Int; V-85 and 85W RKR-CPR; V-6 CKW-SNY; V-6N RKR-CKW. The following Ints will be unusable: Bear Creek and Albion. (4-16)
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM & LFR.
ROCK SPRINGS ARPT: Caution - first 500' NW end rnwy 12-30 clsd - mrkd. (3-21)

WYOMING: SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.
TORRINGTON ARPT: Oil well storage tanks lctd on S edge E/W rnwy 300' from W end. Oil well pumping unit lctd on E side NE/SW rnwy 300' from SW end of rnwy. Low flying dusting and spraying type acft operg from arpt thru Sept 30. (4-11)
PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. (4-12)
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

ARIZONA: **PHOENIX-SKY HARBOR ARPT: LFR missed apch: Right climbing turn, proceed direct PHX LFR climbing to 5000' on E crs within 20 mi in accordance with established shuttle procedure. VOR missed apch: Right climbing turn, proceed direct PHX VOR on radial 258 climbing to 5000' on radial 078 within 20 mi. (5-7)



REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL., Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

EL PASO, TEXAS-INTERNATIONAL ARPT: LFR, Proced. #1, Amdt. 11, Effective 25 May 1957: Delete the runway number "26" after "A-dn" in column 5 "Condition".

SPOKANE, WASH. - GEIGER FIELD: VOR, Proced. #1, Amdt. 5, Effective 1 June 1957: Change procedure turn to read in part "207 Outbound, 027 Inbound".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

Notices to Airmen - page 2

VOL. 12, NO. 6 **MAY 28, 1957**

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS to private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --- -... .... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 23, 1956

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 30. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

✓ The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

FLIGHT ADVISORY AREA - SPOKANE RAPCON CENTER: Effective April 22, 1957, the Flight Advisory Area for the Spokane RAPCON Center will be as follows:

From a point 49°N 115°W southward to a point on Green 2, 25 miles E of Mullan Pass; thence S to 46°N 115°W; thence W to 46°N 117°30'W; thence NW to a point on the eastern boundary of Red 53, 25 miles NE of Walla Walla MF Radio Range; thence to a point on the W boundary of Victor 112, 25 miles NE of Lamar Intsxn; thence SW to the southeastern corner of Prohibited Area P-246; thence W and northwesterly along the southern and southwestern boundaries of Prohibited Area P-246; thence along the western boundary of Prohibited Area P-246 and the eastern boundary of Restricted Area R-247 to the northeastern corner of Restricted Area R-247; thence to a point on Green 2 and Victor 2, 25 miles E of the Ellensburg MF Range; thence N to 49°N 120°W; thence E along 49°N to point of beginning.

Also, note that the voice call is changed to Spokane center or Spokane approach control, whichever is applicable.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

✓ WASHINGTON, D. C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Maximum speed within the zone is 180 mph or 160 knots indicated airspeed unless operational limitations for a particular aircraft require greater airspeeds, in which case the aircraft shall not be flown in excess of the minimum speed consistent with the safe operational limitations of the aircraft.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective July 4, 1957, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Green civil airway No. 5 (Los Angeles, Calif. to Boston, Mass.), is amended by changing the name "Jaskson, Tenn., rdo rng stn;" to read: "Jack's Creek, Tenn. rdo rng stn;"

(2) Red civil airway No. 10 (Amarillo, Tex. to Augusta, Ga.), caption changed and is amended by deleting the last portion which reads: "From the intsxn of the NE course of the Augusta, Ga. rdo rng and the NW course of the Charleston, S.C. rdo rng to the Charleston, S.C. rdo rng stn."

(3) VOR civil airway No. 1 (Charleston, S.C. to New York, N. Y.), is amended by changing the portion which reads; "Salisbury, Md. omnirng stn; intsxn of the Salisbury omnirng 038° T and the Coyle omnirng 203°T radials; Coyle, N.J. omnirng stn;" to read: "Salisbury, Md. omnirng stn; point of intsxn of the Woodstown, N.J. omnirng 154°T and the Coyle omnirng 203°T radials; Coyle, N.J. omnirng stn;" (Note: Redesignated V-1 between Salisbury VOR and Coyle VOR via the Wildwood Intsxn)

(4) VOR civil airway No. 4 (Seattle, Wash. to Washington, D. C.), is amended by changing the portion which reads: "Columbia, Mo. omnirng stn, including a N alternate from the Kansas City omnirng stn to the Columbia omnirng stn via the intsxn of the Kansas City omnirng 077°T and the Columbia omnirng 292°T radials and also a S alternate from the Topeka omnirng stn to the Columbia omnirng stn via the Blue Springs, Mo. omnirng stn thence via the intsxn of the Blue Springs omnirng 094°T and the Columbia omnirng 261°T radials;" to read: "Columbia, Mo. omnirng stn, including a N alternate from the Kansas City omnirng stn to the Columbia omnirng stn via the intsxn of the Kansas City omnirng 077°T and the Columbia omnirng 292°T radials and also a S alternate from the Topeka omnirng stn to the Columbia omnirng stn via the point of intsxn of the Topeka omnirng 099°T and the Blue Springs omnirng 268° T, the Blue Springs, Mo. omnirng stn and the intsxn of the Blue Springs omnirng 094°T and the Columbia omnirng 261°T radials;" (Note: Put dog-leg in V4S between Topeka VOR and Blue Springs VOR.)

(5) VOR civil airway No. 7 (Miami, Fla. to Green Bay, Wis.), is amended by changing the portion which reads: "Lakeland, Fla. omnirng stn, including an E alternate via the intsxn of the Fort Myers omnirng 035°T and the Lakeland omnirng 161°T radials;" to read: "Lakeland, Fla. omnirng stn;" (Note: Rescinded V7E between Ft. Myers VOR and Lakeland VOR.)

(6) VOR civil airway No. 9 (New Orleans, La. to Milwaukee, Wis.), is amended by changing the portion which reads: "Memphis, Tenn. omnirng stn, including an E alternate:" to read: "Memphis, Tenn. omnirng stn, including an E alternate via the intsxn of the Greenwood omnirng 027°T and the Memphis omnirng 160°T radials;" (Note: Redesignated V9E between Greenwood VOR and Memphis VOR).

(7) VOR civil airway No. 10 (Pueblo, Colo. to New York, N.Y.), is amended by changing the portion which reads: "intsxn of the Lamar omnirng 085° T radial" to read: "intsxn of the Lamar omnirng 084°T radial".

(8) VOR civil airway No. 13 (Houston, Tex. to Duluth, Minn.), is amended by changing the portion which reads: "Mason City, Iowa omnirng stn, including an E and a W alternate;" to read: "Mason City, Iowa omnirng stn, including an E alternate and also a W alternate from the Des Moines omnirng stn to the Mason City omnirng stn via the Fort Dodge, Iowa omnirng stn;" (Note: Redesignated V13W between Des Moines VOR and Mason City VOR via the Fort Dodge VOR.)

(9) VOR civil airway No. 16 (Los Angeles, Calif. to Boston, Mass.), is amended by changing the portion which reads: "Memphis, Tenn. omnirng stn, including a S alternate; Jackson, Tenn. omnirng stn, including a S alternate; Graham, Tenn. omnirng stn, including a S alternate;" to read: "Memphis, Tenn. omnirng stn, including a S alternate via the intsxn of the Pine Bluff omnirng 079°T and the Memphis omnirng 224°T radials; Jack's Creek, Tenn. omnirng stn; Graham, Tenn. omnirng stn, including a S alternate from the Memphis omnirng stn to the Graham omnirng stn via the intsxn of the Memphis omnirng 081°T and the Graham omnirng 238°T radials;" (Note: Redesignated V16S between Pine Bluff VOR and Memphis VOR. Designated V16S between Memphis VOR and Graham VOR. Rescinded V16S between Memphis VOR and Jack's Creek VOR and between Jack's Creek VOR and Graham VOR.)

(10) VOR civil airway No. 37 (Savannah, Ga. to Erie, Pa.), is amended by changing the portion which reads: "From the Savannah, Ga. omnirng stn via the Columbia, S. C. omnirng stn;" to read: "From the Savannah, Ga. omnirng stn via the Allendale, S.C. omnirng stn; Columbia, S.C. omnirng stn;" (Note: Redesignated V37 between Savannah VOR and Columbia VOR to include Allendale VOR.)

(11) VOR civil airway No. 39 (South Boston, Va. to Kennebunk, Maine), is amended by changing the portion which reads: "Poughkeepsie, N.Y. omnirng stn; Gardner, Mass. omnirng stn;" to read: "Poughkeepsie, N.Y. omnirng stn; point of intsxn of the Chester, Mass. omnirng 131°T and the Poughkeepsie omnirng 058°T radials; Gardner, Mass. omnirng stn:" (Note: Redesignated V39 between Poughkeepsie VOR and Gardner VOR via Westfield Intsxn).

(12) VOR civil airway No. 54 (Quitman, Tex. to Charlotte, N.C.), is amended by changing the portion which reads: "Muscle Shoals, Ala. omnirng stn;" to read: "Muscle Shoals, Ala. omnirng stn, including a S alternate;" (Note: Added V54S between Memphis VOR and Muscle Shoals VOR.)

(13) VOR civil airway No. 74 (Hugo, Colo. to Little Rock, Ark.), caption changed and is amended by changing all before the Tulsa, Okla. omnirng stn to read: "From the Hugo, Colo. omnirng stn via the Garden City, Kans. omnirng stn; Dodge City, Kans. omnirng stn; Anthony, Kans. omnirng stn; Ponca City, Okla. omnirng stn; Tulsa, Okla. omnirng stn, including a S alternate via the intsxn of the Ponca City omnirng 132°T and the Tulsa omnirng 260°T radials;" (Note: Added new portion to V74 from Hugo VOR to Dodge City VOR via Garden City VOR. A portion of this addition lies over segments of V10N and V10. Redesignated V74S between Ponca City VOR and Tulsa VOR).

(14) VOR civil airway No. 93 (Baltimore, Md. to Presque Isle, Maine), is amended by changing all before the Concord, N.H. omnirng stn to read: "That airspace over United States territory from the Baltimore, Md. omnirng stn via the intsxn of the Baltimore omnirng 015°T and the Allentown omnirng 228°T radials; to the Allentown, Pa. omnirng stn. From the Poughkeepsie, N.Y. omnirng stn via the Chester, Mass. omnirng stn; point of intsxn of the Albany, N.Y. omnirng 099°T and the Concord omnirng 231°T radials; Concord, N.H. omnirng stn;" (Note: Added new portion to V93 from Poughkeepsie VOR to Greenfield Intsxn via Chester VOR. Revoked V93 between Wilkes-Barre VOR and Albany VOR. Removed V93 number assignment between Allentown VOR and Wilkes-Barre VOR leaving this portion as V29.)

(15) VOR civil airway No. 97 (Miami, Fla. to Alexandria, Minn.), is amended by changing the portion which reads: "From the Miami, Fla. omnirng stn via the Tampa, Fla. omnirng stn;" to read: "From the Miami, Fla. omnirng stn via the La Belle, Fla. omnirng stn; Tampa, Fla. omnirng stn;"

(16) VOR civil airway No. 100 (North Platte, Nebr. to Detroit, Mich.), is amended by changing the portion which reads: "From the North Platte, Nebr. omnirng stn via the Sioux City, Iowa omnirng stn; Waterloo, Iowa omnirng stn; Rockford, Ill. omnirng stn;" to read: "From the North Platte, Nebr. omnirng stn via the Sioux City, Iowa omnirng stn; Fort Dodge, Iowa omnirng stn; Waterloo, Iowa omnirng stn; Dubuque, Iowa omnirng stn; Rockford, Ill. omnirng stn;" (Note: Redesignated V100 to include Fort Dodge VOR and Dubuque VOR.)

(17) VOR civil airway No. 106 (Charleston, W.Va. to Kennebunk, Maine), is amended by changing the portion which reads: "Poughkeepsie, N.Y. omnirng stn; Gardner, Mass. omnirng stn;" to read: "Poughkeepsie, N.Y. omnirng stn; point of intsxn of the Chester, Mass. omnirng 131°T and the Poughkeepsie omnirng 058°T radials; Gardner, Mass. omnirng stn;" (Note: Redesignated V106 between Poughkeepsie VOR and Gardner VOR via Westfield Intsxn).

(18) VOR civil airway No. 108 (Colorado Springs, Colo. to Salina, Kans), is added to read: "From Colorado Springs, Colo. non-directional rdo bcn via the Hugo, Colo. omnirng stn; Goodland, Kans. omnirng stn; Hill City, Kans. omnirng stn; intsxn of the Hill City omnirng 093°T and the Salina omnirng 286°T radials; to the Salina, Kans. omnirng stn. The portion of this arwy which overlaps the Camp Carson Restricted Area (R-194) is excluded." (Note: New arwy. Portion of this arwy Goodland VOR to Hill City VOR is also V4. Portion of this arwy Hill City VOR to Salina VOR was formerly V232).

(19) VOR civil airway No. 116 (Kansas City, Mo. to New York, N.Y.), is amended by changing the portion which reads: "From the Kansas City, Mo. omnirng stn via the Quincy, Ill. omnirng stn;" to read: "From the Kansas City, Mo. omnirng stn via the Macon, Mo. omnirng stn; Quincy, Ill. omnirng stn;" (Note: Redesignated V116 to include the Macon VOR).

(20) VOR civil airway No. 147 (Philadelphia, Pa. to Rochester, N.Y.), is amended by changing the portion which reads: "Allentown, Pa. omnirng stn;" to read: "Allentown, Pa. omnirng stn, including an E alternate from the Philadelphia Intnl Arpt ILS lclzr to the Allentown omnirng stn via the point of intsxn of the Pottstown omnirng 143°T and the Allentown omnirng 173°T radials;" (Note: Added V147E between Philadelphia ILS lclzr and Allentown VOR by-passing Pottstown VOR).

(21) VOR civil airway No. 158 (Waterloo, Iowa to Polo, Ill.), is amended to read: "From the Waterloo, Iowa omnirng stn via Dubuque, Iowa omnirng stn; to the Polo, Ill. omnirng stn." (Note: Redesignated V158 to include Dubuque VOR).

(22) VOR civil airway No. 203 (Norwich, Conn, to Massena, N.Y.), is amended to read: "From the Norwich, Conn. omnirng stn via the Chester, Mass. omnirng stn; point of intsxn of the Poughkeepsie, N.Y., omnirng 007°T and the Albany omnirng 140°T radials; Albany, N.Y. omnirng stn; to the Massena, N.Y. omnirng stn." (Note: Added new portion to V203 from Norwich VOR to Albany VOR. Portion Brainerd Intsxn to Albany VOR is part of existing V130).

(23) VOR civil airway No. 210 (Los Angeles, Calif. to Pueblo, Colo.), is amended to read: "From the Los Angeles, Calif. omnirng stn via the intsxn of the Los Angeles omnirng 057°T and the Daggett omnirng 235°T radials; Daggett, Calif. omnirng stn; Valle, Ariz. omnirng stn; Farmington, N. Mex. omnirng stn; to the Pueblo, Colo. omnirng stn." (Note: Added new portion to V210 from Daggett VOR to Pueblo VOR).

(24) VOR civil airway No. 225 (Key West, Fla. to Vero Beach, Fla.), is amended to read: "From the Key West, Fla. omnirng stn via the Fort Myers, Fla. omnirng stn; La Belle, Fla. omnirng stn; to the Vero Beach, Fla. omnirng stn. The portions of this arwy above 20,000 feet above MSL, which overlap the Key West Warning Area (W-173), are excluded. (Note: Added La Belle VOR to V225)

(25) VOR civil airway No. 232 (Hill City, Kans. to Salina, Kans.), is revoked.

(26) VOR civil airway No. 249 (Caldwell, N.J. to Utica, N.Y.), is amended to read: "From the Caldwell, N.J. omnirng stn via the Huguenot, N.Y. omnirng stn; De Lancey, N.Y. omnirng stn; to the Oneida County, N.Y. Arpt ILS outer mrkr."

(27) VOR civil airway No. 263 (Lamar, Colo. to Thurman, Colo.), is added to read: "From the Lamar, Colo. omnirng stn via the Hugo, Colo. omnirng stn; to the Thurman, Colo. omnirng stn." (Note: New arwy).

(28) VOR civil airway No. 270 (Binghamton, N.Y. to Chester, Mass.), is added to read: "From the Binghamton, N.Y. omnirng stn via the DeLancey, N.Y. omnirng stn; to the Chester, Mass. omnirng stn."

(29) VOR civil airway No. 273 (Downsville, N.Y. to Syracuse, N.Y.), is added to read: "From the DeLancey, N.Y. omnirng stn via the point of intsxn of the Binghamton, N.Y. omnirng 071°T and the Syracuse omnirng 149°T radials; to the Syracuse, N.Y. omnirng stn." (Note: New arwy.)

(30) VOR civil airway No. 1506 (San Francisco, Calif. to Washington, D. C.), is amended by changing the portion which reads: "From the Sioux City, Iowa omnirng stn via the Waterloo, Iowa omnirng stn; Rockford, Ill. omnirng stn;" to read: "From the Sioux City, Iowa omnirng stn via the Fort Dodge, Iowa omnirng stn; Waterloo, Iowa omnirng stn; Dubuque, Iowa omnirng stn; Rockford, Ill. omnirng stn;" (Note: Added Fort Dodge VOR and Dubuque VOR to V1506).

(31) VOR civil airway No. 1508 (Los Angeles, Calif. to New York, N.Y.), is amended by changing the portion which reads: "From the Sioux City, Iowa omnirng stn via the Waterloo, Iowa omnirng stn; Rockford, Ill. omnirng stn;" to read: "From the Sioux City, Iowa omnirng stn via the Fort Dodge, Iowa omnirng stn; Waterloo, Iowa omnirng stn; Dubuque, Iowa omnirng stn; Rockford, Ill. omnirng stn;" (Note: Added Fort Dodge VOR and Dubuque VOR to V1508).

(32) VOR civil airway No. 1510 (Los Angeles, Calif. to New York, N.Y.), is amended by changing the portion which reads: "Kremmling, Colo. omnirng stn; point of intsxn of the Kremmling omnirng 081°T and the Denver, Colo. omnirng 334°T radials; Akron, Colo omnirng stn;" to read: "Kremmling, Colo. omnirng stn; Denver, Colo. omnirng stn; Akron, Colo. omnirng stn;" (Note: Redesignated V1510 between Kremmling VOR and Akron VOR via Denver VOR).

(33) VOR civil airway No. 1512 (Los Angeles, Calif. to New York, N.Y.), is amended by changing the portion which reads: "Kansas City, Mo. omnirng stn; Quincy, Ill. omnirng stn;" to read: "Kansas City, Mo. omnirng stn; Macon, Mo. omnirng stn; Quincy, Ill. omnirng stn;" (Note: Added Macon VOR to V1512).

(34) VOR civil airway No. 1514 (San Francisco, Calif. to New York, N.Y.), is amended by changing the portion which reads: "Kansas City, Mo. omnirng stn, Quincy, Ill. omnirng stn" to read: "Kansas City, Mo. omnirng stn; Macon, Mo. omnirng stn; Quincy, Ill. omnirng stn;" (Note: Added Macon VOR to V1514).

CONTROL AREAS:

(1) Red civil airway No. 10 (Amarillo, Tex. to Augusta, Ga.), caption changed.

(2) VOR civil airway No. 13 (Houston, Tex. to Duluth, Minn.), is amended to read: "All of VOR civil arwy No. 13 including E and W alternates, but excluding the airspace between the main arwy and the W alternate from the Des Moines, Iowa omnirng stn to the Mason City, Iowa omnirng stn and also excluding the airspace between the main arwy and the W alternate from the Mason City, Iowa omnirng stn to the Minneapolis, Minn. omnirng stn."

(3) VOR civil airway No. 54 (Quitman, Tex. to Charlotte, N.C.), is amended to read: "All of VOR civil arwy No. 54 including N alternates and a S alternate."

(4) VOR civil airway No. 74 (Hugo, Colo. to Little Rock, Ark.), is amended to read: "All of VOR civil arwy No. 74 including a N alternate."

(5) VOR civil airway No. 108 (Colorado Springs, Colo. to Salina, Kans.), is added to read: "All of VOR civil arwy No. 108."

(6) VOR civil airway No. 147 (Philadelphia, Pa. to Rochester, N.Y.), is amended to read: "All of VOR civil arwy No. 147, including an E alternate."

(7) VOR civil airway No. 203 (Norwich, Conn. to Massena, N.Y.), is amended to read: "All of VOR civil arwy No. 203."

(8) VOR civil airway No. 210 (Los Angeles, Calif. to Pueblo, Colo.), is amended to read: "All of VOR civil arwy No. 210."

(9) VOR civil airway No. 232 (Hill City, Kans. to Salina, Kans.), is revoked.

(10) VOR civil airway No. 249 (Caldwell, N.J. to Utica, N.Y.), is amended to read: "All of VOR civil arwy No. 249."

(11) VOR civil airway No. 263 (Lamar, Colo. to Thurman, Colo.), is added to read: "All of VOR civil arwy No. 263."

(12) VOR civil airway No. 270 (Binghamton, N.Y. to Chester, Mass.), is added to read: "All of VOR civil arwy No. 270."

(13) VOR civil airway No. 273 (Downsville, N.Y. to Syracuse, N.Y.), is added to read: "All of VOR civil airway No. 273."

(14) CONTROL AREA EXTENSIONS

(1) (Little Rock, Ark.), is amended by adding the following portion to present control area extension: "That airspace SW of Little Rock bounded on the NW by VOR civil airway No. 54, on the SE by VOR civil arwy No. 16 and on the NE by the Little Rock 50-mile radius control area."

(2) (Memphis, Tenn.), is amended by adding the following portion to present control area extension: "That airspace SW of Memphis bounded on the SE by VOR civil arwy No. 16, on the W by VOR civil arwy No. 69, on the N by VOR civil arwy No. 54 and on the E by the Memphis 50-mile radius control area."

(3) (Fort Rucker, Ala.), is added to read: "Within a 35 mile radius of the Ozark AAF rdo rng stn, Fort Rucker, Ala., excluding the portion which overlaps restricted area (R-156), and excluding the portion above 19,000 ft MSL between sunset and sunrise which lies beneath and which conflicts with restricted area (R-336)."

(4) (Long Beach, Calif.), is amended to read: "That airspace within tangent lines drawn from the circumference of a circle 5 miles in radius centered on the Long Beach, Calif. omnirng stn to a circle 5 miles in radius centered at a point at lat 32-09-00N, long. 119-50-30W, to a circle 14 miles in radius centered at a point at lat 32-00-00N, long. 120-00-00W, thence to a circle 19 miles in radius centered at a point at lat 31-35-30N, long. 121-21-30W, the eastern bndry of the Oakland Oceanic Control Area, excluding the portion below 5000 ft MSL between a point 63 miles SW of the Long Beach omnirng stn at lat 33-06-50N, long. 118-48-00W and the eastern bndry of the Oakland Oceanic Control Area."

(5) (Miami, Fla.), is amended to read: "That airspace bounded by a line beginning on the eastern edge of Amber civil arwy No. 7 at lat 25-53-00, extending easterly to the western bndry of the Miami Oceanic/Nassau Control Area at lat 25-55-00, long. 79-00-00, thence due S along that bndry to lat 24-40-00, long. 79-00-00, thence southeasterly to lat 24-00-00, long. 78-03-00, thence due W to lat 24-00-00, long. 80-25-00, thence due N to the eastern edge of Amber civil arwy No. 7, thence along Amber civil airway No. 7 to lat 25-53-00, point of beginning, excluding the portion below 1000 ft MSL which lies outside the continental limits of the United States."

(6) (Valparaiso, Fla.), is amended to read: "That airspace bounded by a line beginning at a point at lat 30-43-00, long. 86-38-02; extending to lat 30-29-01, long. 86-38-02; thence to lat 30-29-01, long. 86-42-55; thence to lat 30-26-40, long. 86-45-38; thence to lat 30-20-30, long. 86-45-38; thence to lat 30-20-59, long. 86-38-49; thence to lat 30-09-41, long. 86-41-37; thence to lat 30-06-56, long. 86-26-57; thence to lat 30-25-00, long. 86-22-26; thence to lat 30-25-00, long. 86-25-00; thence to lat 30-33-00, long. 86-25-00; thence to lat 30-33-00, long. 86-25-30; thence to lat 30-37-00, long. 86-25-30; thence to lat 30-37-00, long. 86-27-37; thence to lat 30-43-10, long. 86-27-37, thence to point of beginning."

(7) (Brunswick, Maine), is amended by adding the following to present control area extension: "The portion of this control area which overlaps Brunswick, Me. caution area (C-516) is excluded."

(8) (Dallas, Tex.), (Dallas-Houston-Austin area), is amended to read: "All of that airspace bounded on the E by a line 5 miles E of and parallel to a line extending from the Dallas, Tex. omnirng stn via the Leona, Tex. omnirng stn to the Houston, Tex. omnirng stn, and by Red civil arwy No. 96, on the SW by Red civil arwy No. 32, and on the NW by Amber civil arwy No. 4 to the Waco, Tex. rdo rng stn and by Blue civil arwy No. 5 to the Dallas, Tex. rdo rng stn." (Note: Amended first portion between Dallas and Houston).

CONTROL ZONES:

(1) Five mile radius zones is amended by adding the following airport:

McAlester, Okla.,: McAlester Municipal Airport.

(2) (Boston, Mass.), is amended by adding the following portion to present control zone: "and within 2 miles either side of the 144°T radial of the Boston omnirng extending from the omnirng stn to a point 12 miles SE." (Note: Control zone extends to 5 miles beyond Hull Intsxn).

(3) (Atlanta, Ga.), is amended to read: "Within a 5 mile radius of the Municipal Arpt., within 2 miles either side of the SE course of the Atlanta rdo rng from the rdo rng stn to the Jonesboro FM, within 2 miles either side of the W (front) course of the ILS lclzr extending from the lclzr to a point 5 miles W of the ILS OM and within 2 miles either side of the E (back) course of the ILS lclzr extending from the lclzr to a point 13 miles E of the lclzr, and within 2 miles either side of the 017°T and 197°T radials of the Atlanta omnirng extending from the 5 mile radius zone to a point 5 miles S of the omnirng stn."

(4) (New York, N.Y.), is amended to read: "Within a 5 mile radius of New York Intnl Arpt including a 5 mile radius of Floyd Bennett NAS, within 2 miles either side of a line bearing 121°T extending from the Idlewild non-directional rdo bcn to its intsxn with the SW course of the Mitchel AFB rdo rng, within 2 miles either side of a line bearing 211°T extending from the Idlewild nondirectional rdo bcn to its intsxn with the NE course of the Philadelphia, Pa. rdo rng, and within 2 miles either side of a direct line extending from the Scotland, N.Y. nondirectional rdo bcn to the Floyd Bennett Naval Air Stn." (Note: No change in area. Put on True bearing from Idlewild H due to discontinuance of Idlewild rng.)

(5) (Oklahoma City, Okla.), is amended to read: "Within a 5 mile radius of Will Rogers Mun. Arpt. including the airspace within 2 miles either side of the W course of the Oklahoma City rdo rng extending from the rdo rng stn to the Mustang FM; within 2 miles either side of the S (front) course of the ILS lclzr extending to a point 5 miles S of the ILS OM and within 2 miles either side of the N (back) course of the ILS lclzr extending to a point 5 miles N of Tulakes nondirectional rdo bcn; within 2 miles either side of the 107°T and 287°T radials of the Oklahoma City omnirng extending from the 5 mile radius zone to a point 5 miles W of the

omnirng stn; within a 5 mile radius of Tulakes Arpt and within 2 miles either side of the 50°T radial of the Oklahoma City omnirng extending between the Tulakes Arpt 5 mile radius zone and the omnirng stn; within 2 miles either side of a direct line between the Will Rogers Mun Arpt. and Tinker Air Force Base including a 5 mile radius of Tinker AFB, and within 2-1/2 miles either side of the S and N courses of the Tinker AFB rdo rng extending from Tinker AFB to a point 2-1/2 miles N of the Spencer FM."

(6) (Abilene, Tex.), is amended to read: "Within a 5 mile radius of Abilene Mun Arpt. within 2 miles either side of the N course of the Abilene rdo rng extending from the rdo rng stn to a point 10 miles N; within 2 miles either side of a direct line extending from the Abilene rdo rng stn to and including a 5 mile radius of Dyess AFB; within 2 miles either side of the 292°T and 112°T radials of the Abilene omnirng extending from the Abilene Mun Arpt., 5 mi radius zone to a point 5 miles NW of the omnirng stn; within 2 miles either side of the 354°T radial of the Abilene omnirng extending from the omnirng stn to a point 10 miles N; and within 2 miles either side of the center line of Dyess AFB N/S rnwy 16-34 extending to a point 10 miles S of the end of the rnwy."

(7) (Rantoul, Ill.), is amended to read: "Within a 5 mile radius of Chanute AFB, Rantoul, Ill., and within 2 miles either side of the 270°T and 90°T radials of the Chanute omnirng extending from the 5 mile radius zone to a point 12 miles E of the omnirng stn."

(8) (Valparaiso, Fla.), is amended to read: "Within a 5 mile radius of Eglin AFB and within 2 miles either side of a line extending from the Eglin AFB through the Eglin AFB nondirectional rdo bcn to a point 2 miles S of the nondirectional rdo bcn."

(9) (Bryan, Tex.), is amended to read: "Within a 5 mile radius of Bryan AFB and within a 3 mile radius of Easterwood Arpt, College Station, Tex.; within 2 miles either side of the NW course of the Bryan rdo rng extending from the rdo rng stn to a point 10 miles NW; within 2 miles either side of the 107°T and 287°T radials of the College Station omnirng extending to points 10 miles NW and 12 miles SE of the omnirng stn, and within 2 miles either side of a line bearing 001°T from the Snook nondirectional rdo bcn extending from the Bryan AFB 5-mile radius zone to a point 7 miles S of the AFB."

(10) (Findlay, Ohio), is added to read: "Within a 5-mile radius of the Findlay Arpt. within 2 miles either side of a line bearing 178°T extending from the Findlay nondirectional rdo bcn to a point 10 miles S of the nondirectional rdo bcn, and within 2 miles either side of a line bearing 218°T extending from the Findlay nondirectional rdo bcn to a point 10 miles SW of the Findlay omnirng stn."

(11) (Hickory, N.C.), is added to read: "Within a 5 mile radius of the Hickory Arpt and within 2 miles either side of the 223°T and 043°T radials of the Hickory omnirng extending from the five-mile radius zone to a point 5 miles NE of the omnirng stn."

(12) (Fort Rucker, Ala.), is added to read: "Within a 5 mile radius of Ozark AAF, Fort Rucker, Ala. and within 2 miles either side of the SW course of the Ozark AAF rdo rng extending from the airfield to a point 10 miles SW of the rdo rng stn, excluding the portion which overlaps restricted area (R-156) and excluding the portion above 19,000 ft MSL between sunset and sunrise which lies beneath and which conflicts with restricted area (R-336)."

(13) (Harlingen, Tex.), is added to read: "Within a 5 mile radius of the Harlingen AFB and within 2 miles either side of lines bearing 179°T and 359°T from the Harlingen AFB nondirectional rdo bcn extending from the 5-mile radius zone to a point 5 miles N of the nondirectional rdo bcn."

(14) (Junction, Tex.), is added to read: "Within a 5 mile radius of Kimble County Arpt, Junction, Tex., and within 2 miles either side of the 150°T radial of the Junction omnirng extending from the 5-mile radius zone to the omnirng stn."

REPORTING POINTS:

(1) Green civil airway No. 3 (San Francisco, Calif to New York, N.Y.), is amended before "Goshen, Ind. rdo rng stn;" by adding the following reporting point: "the intsxn of the SE course of the Chicago, Ill. rdo rng and the W course of the Goshen, Ind. rdo rng;"

(2) Green civil airway No. 5 (Los Angeles, Calif. to Boston, Mass.), is amended by changing the name of the reporting point which reads: Jackson, Tenn. rdo rng stn;" to read: "Jack's Creek, Tenn. rdo rng stn;"

(3) Red civil airway No. 10 (Amarillo, Tex. to Augusta, Ga.), caption changed.

(4) Blue civil airway No. 1 (Miami, Fla. to Tampa, Fla.), is amended to read: "The intsxn of a line bearing 58°T from the Fort Myers, Fla. nondirectional rdo bcn and the SE course of the Tampa, Fla. rdo rng." (Note: Changes LaBelle LF Intsxn. Depict for all altitudes.)

(5) Blue civil airway No. 55 (Crestview, Fla. to Montgomery, Ala.), is amended to read: "The intsxn of the N course of the Crestview, Fla. rdo rng and the NE course of the Whiting NAS, Fla. rdo rng." (Note: Named "Andalusia Intsxn", Depict for all altitudes.)

VOR REPORTING POINTS:

(1) Domestic VOR reporting points is amended by adding the following reporting points:
(a) Francis Intsxn - the intsxn of the Oakland, Calif. omnirng 266°T (249° M) and the Point Reyes, Calif. omnirng 236°T (218° M) radials. (MRA 4000'. Depict for all altitudes.)
(b) Rainbow Intsxn - the intsxn of the Oakland, Calif. omnirng 234°T (217° M) and the Point Reyes, Calif. omnirng 195°T (177° M) radials. (MRA 4000'. Depict for all altitudes.)
(c) Sunset Intsxn - the intsxn of the Oakland, Calif. omnirng 234°T (217° M) and the Point Reyes, Calif. omnirng 207°T (189° M) radials. (MRA 8000'. Depict for all altitudes).
(d) Nabb, Ind., omnirng stn; (e) Jack's Creek, Tenn., omnirng stn; (f) De Lancey, N.Y. omnirng stn; (g) Chester, Mass., omnirng stn; (h) LaBelle, Fla., omnirng stn - depict for all alts.

(2) Domestic VOR reporting points is amended by changing the following reporting points to read: (a) Davenport Intsxn - the intsxn of the Agnew, Calif. omnirng 206°T (189° M), the Salinas, Calif. omnirng 300°T (283° M) and the Point Reyes, Calif. omnirng 155°T (137° M) radials. (Depict for below 15,200 ft.). (b) Marin Intsxn - the intsxn of the Point Reyes, Calif. omnirng 239°T (221° M), the Agnew, Calif. omnirng 304°T (287° M) and the Ukiah, Calif. omnirng 172°T (154° M) radials. (Depict for below 15,200 ft.).

(3) Domestic VOR reporting points is amended by revoking the following reporting points: (a) Jacksonville, Tenn. omnirng stn; (b) LaBelle Intsxn - the intsxn of the Miami, Fla. omnirng 316°T and the Fort Myers, Fla. omnirng 035°T radials.

✓ RESTRICTED AREA AMENDMENT: The following Restricted Areas shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 198)

Effective upon publication in the Federal Register:

Section 608.14, the Saline Valley, California area (R-485) amended February 26, 1955 in 20 F.R. 1208, is further amended by changing the "Designated Altitudes" column to read: "20,000 ft MSL to Unlimited."

Effective July 4, 1957:

Section 608.18, the Valparaiso, Florida area (R-383 formerly D-383) amended May 4, 1955 in 20 F.R. 2974, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 30-33-40, long. 86-55-00; thence N to lat 30-38-45, long. 86-55-00; thence northeasterly along the L & N Railroad to lat 30-42-45, long. 86-45-45; thence E to lat 30-42-50, long. 86-38-02; thence S to lat 30-29-01, long. 86-38-02; thence W to lat 30-29-01, long. 86-42-55; thence SW to lat 30-26-40, long. 86-45-38; thence S to lat 30-20-30, long. 86-45-33; thence westerly and three (3) nautical miles from the shoreline to lat 30-20-15, long. 86-48-00; thence N to lat 30-25-00, long. 86-48-00; thence westerly along U.S. Highway 98 to lat 30-24-15, long. 86-52-00; thence along the Navarre - Milton Highway to lat 30-33-40, long. 86-55-00, the point of beginning."

Effective upon publication in the Federal Register:

Section 608.25, the Camp Breckenridge, Kentucky area (R-51) amended October 31, 1951 in 16 F.R. 11066, is further amended by changing the "Designated Altitudes" column to read: "From the surface to 30,000 ft MSL."

Effective June 9 thru June 22, 1957 and August 17 thru August 31, 1957:

Section 608.58, the Guernsey, Wyoming, Temporary Restricted Area amended May 24, 1955 in 20 F.R. 3583 is redesignated as follows: "Description by Geographical Coordinates: Beginning at lat 42-30-00, long. 104-54-30; thence to lat 42-30-00, long. 104-44-00; thence to lat 42-18-00, long. 104-44-00; thence to lat 42-18-00, long. 104-50-00; thence to lat 42-22-00, long. 104-53-30; thence to point of beginning. Designated Altitudes: Surface to 30,000 feet MSL. Time of Designation: Daily, 0700-2200 MST. Controlling Agency: Adjutant General, Wyoming National Guard, Cheyenne, Wyoming."

(Part 608 - Restricted Area - Amendment 199)
(Effective June 1, 1957)

Section 608.18, the Keystone, Florida Restricted Area (R-180 formerly D-180) amended April 9, 1955 in 20 F.R. 2301, is further amended by changing the "Description by Geographical Coordinates" column to read: "Within a five mile radius of lat 29-33-20, long. 82-00-25, excluding that area one mile either side of a 220°T bearing and more than two miles from the center of the Restricted Area", and by changing the "Time of Designation" column to read: "Sunrise to sunset, seven days a week".

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 25 - New Orleans, La. Correct CAA telephone number to read: FR 3842.
(2) Page 27 - El Paso, Tex. Correct CAA telephone number to read: KEystone 2-2791.
(3) Page 29 - Tulsa, Okla. Correct ASDO, Air Carrier Safety telephone number to read: TEmple 5-1828 and/or TEmple 8-3361, Extension 205. (Tulsa, Okla. should be listed in "Region 2" column.)
(4) Page 98 - (Airborne) Delete Arcata, Calif. VOR rcvr check point.
(5) Page 100 - (Airborne) Add: Fortuna, Calif. VOR rcvr check point to read: 358°; over intersection of runways, Arcata Arpt; 500'.
(6) Page 104 (Ground) Add: Fort Stockton, Tex. VOR rcvr check point to read: 116°; on ramp N of terminal.
(7) Page 105 - (Ground) Delete: Topeka, Kans. VOR rcvr check point.
(8) Page 100 - (Airborne) Delete: Iowa City, Iowa VOR rcvr check point.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

BSF	Bradshaw Field, Pohakuloa, Hawaii, T.H. (Assignment)
PUW	Pullman, Washington, Pullman-Moscow Regional Arpt. (Name Change)
TSD	Tobyhanna, Pa., Tobyhanna Signal Depot AAF (Assignment)

✓ IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

✓ AERONAUTICAL CHART CORRECTION: Revise Aircraft Position Chart 3071, 16th edition, dated November 1, 1956, as follows:

Atlantic City Consolan:

Change all 20 dot counts to 40 dashes; all 40 dot counts to 20 dashes; all 20 dash counts to 40 dots; and all 40 dash counts to 20 dots. No change in 60 dot and 60 dash markings.

Nantucket Consolan:

Change all dots to dashes and vice versa. No change in figures.

These Consolans are now operating on a test basis and should be used with caution. After they are commissioned a new edition of Chart 3071 will be issued with these facilities correctly portrayed.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Phoenix	WAC 63	WAC 268
Mt. Whitney	WAC 186	WAC 269
Green Bay	WAC 215	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Bilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg., test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all airways and Ints based on Birmingham or Meridan VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18)

BIRMINGHAM ARPT-TOWER: About June 1 MM and LMM will be shut down-relctn. (4-25)

FLD: Caution - tfc operg in area from 165° clockwise thru 235° not visible for twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)

**HAMILTON-MARION CO. ARPT: New arpt: Type "L"; lctd 0.5 mi SW; 1 rnwy (N/S) - 8000' x 100' gravel; minor A & E. (6-1)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.

MOBILE-BATES FLD-SPECIAL NOTICE: Unlgtd trees penetrate apch zone to all rnwys. Use caution. 200' and 1/2 mi is absolute tk-off min for all acft. (4-22)

MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)

MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2) About June 6, W course LFR will be realigned from 102°-095°. (4-24) During shutdown, MSL LFR may be used in lieu of VOR. MEAs and Int remain as charted. (4-30) About June 24, VOR will be shut down until approx Aug 29 - relctn to lat 34-42-24, long. 87-29-27. (5-16)

ARIZONA: AJO ARPT: Bcn and lgts inoperative. (6-18)

CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail ngts upon prior req. Emerg only. (4-23)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FLORENCE-SPECIAL NOTICE: Temporary Controlled Firing Area within the following described area: bounded on the N by lat 33-07-30; E long. 111-20-00; S lat 33-03-30; W long. 111-22-30. Designated altitude: surface to 7200' MSL. Time of use: 0630-1600 hrs MST on or about 30 June 1957 only. Activities conducted: 4.2 inch Infantry Motar Firing high explosive and smoke shell. Using agency: Heavy Mortar Company, 158th Infantry, ARIZONA: National Guard of Arizona, Glendale, Arizona. (4-30)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. 2-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not sutiable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civilian acft have been endangered by failure to observe the requirements listed. (4-19)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 - 30 n mi on 247° radial and at 30-35 n mi on 106° radial. (1-4)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

PHOENIX-SPECIAL NOTICE: Extreme caution - area between Phoenix VOR and Hassayampa VOR on Victor arwy 16 and Green 5. Extensive high performance, jet acft cross these arwys when departing and arriving Luke AFB in connection with training conducted Gila Bend Restricted Area (R-309, R-308). This tfc generally crosses V 16 and Green 5 between Hassayampa VOR and town of Tolleson (11 mi W of Phoenix) at alts of 3000' MSL and below - 0715 - 1600, Mon-Fri. (3-1) All flgts operg thru this area maintain at least 4000' MSL. Flgts lndg or departing within area advised to exercise extreme caution below 4000' MSL. (5-7)

**PHOENIX-SKY HARBOR ARPT: LFR missed apch: Right climbing turn, proceed direct PHX LFR climbing to 5000' on E crs within 20 mi in accordance with established shuttle procedure. VOR missed apch: Right climbing turn, proceed direct PHX VOR on radial 258 climbing to 5000' on radial 076 within 20 mi. (5-7) Clsd to mil F-89 type acft or acft rqrg use of after burners of tk-off, xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185° 39 n mi at 10,000'.

SALOME, SITE # 27B, LAX-PHX: Caution - puncture vines. (6-18)

SAN SIMON-RADIO: About June 1, VOR will be cmsnd. Freq: 115.4 mc. Ident: SSO. Lctd lat 32-16-12, long. 109-15-45. Elev: 3607' MSL. Class: VORW. Disregard spurious signals.

SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°; 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)

TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz, to be conducted week-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-SPECIAL NOTICE: Aerial flares will be dropped from acft at 10,000' MSL in Kofa Mines Area, 60 mi NE, during evening hrs at irregular intervals until July 15. (5-17)

✱YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18) USAF homing fac ident changed from UMH to VNT. (5-17)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: BENTON ARPT: Temp closed to transient acft due hazardous conditions. (4-16)

**CAMDEN-HARRELL ARPT: NE/SW strip to be used in emerg only. (4-8)

PINE BLUFF-RADIO: VOR shut down until approx June 6. (5-10) During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR xcpt V-16S TXK to PBF unusable. Ints and alts as charted. (3-22)

★TEXARKANA-RADIO: VOR relctd to lat 33-30-50, long. 94-04-20. Bear., dist, Texarkana Arpt: 121°, DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi.

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip on fld. (4-26)

ARCATA ARPT-RADIO: April 2, ILS lclzr and glide slope shut down until approx June 4 - relctn lclzr. (5-24)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)

BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 35 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

CALIFORNIA: BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)
CAMARILLO-RADIO: All courses have multiples. (6-17)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DINUBA-ALTA ARPT: Clsd until June 20. Unlgtd until July 20. (4-22)
DIXON ARPT: Closed. (8-30)
**DOWNEY ARPT: Closed - land use changed. (3-14)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
**FREMONT-CENTER FLD: Formerly carried under Centerville as Fremont. Type "L".
FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°,5000';305°-340°, 7000';340°-040°, 12,000';040°-070°,8000'; 070°-100°,7000';100°-280°, 4000'. (9-13)
LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230° true. (5-6) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800'-caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only- 500'/1 mi. Daylgt opern of cranes with 80' booms adj to apch end rnwy 30. Tk-offs not affected. (3-28)
LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-3)
LOS ANGELES INTERNATIONAL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi(4-19) About June 17, gnd ctl freq 121.9 mc will be change to 121.7 mc. (5-10) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd-avail. 30-min req thru twr. Equip. crossing rnwy. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or between LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)
LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.
MOFFETT FIELD-SPECIAL NOTICE: Caution - high performance acft performing high speed-high angle climb-out from tk-off rnwy. Possible hazard exists to other acft below 15,000' within radius of 10 mi under VFR conditions due to reduced pilot visibility high speed and high angle of climb. Recommend acft avoid this area. (5-17)
NATIONAL CITY ARPT: Extensive const around arpt. (7-19)

CALIFORNIA:**NEEDLES, 25A, LAX-AMA ARPT: Fuel no longer avail. (4-19)
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility midbay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.
OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)
OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.
OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.(4-24)
OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30)
OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)
ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°,17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000';350°-360°, 35 n mi at 13,000'. (7-30)
ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise ctn acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea.
ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)
OXNARD-VENTURA CO. ARPT: Until approx July 31, 176' lgtd oil drilling derrick erected 1600' W and 2200' N of W end of rnwy 7. (4-30)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000';235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. About June 4, VOR and DME will be shut down until approx June 30. During this period the following arwys will be unusable: V27 SNS-SBA, V27W SNS-SBA, V25 Benito Int-SBA, V113 Panoche Int-PRB, V109 CLG-PRB, V209 PRB-Cuyama Int, V248 PRB-Belridge Int. Benito and Idria Intsxns on V137, also unusable.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.
★SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°.(9-17) San Diego TVOR name changed to San Diego-Lindbergh. (5-10)
SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)

CALIFORNIA: SAN FRANCISCO INTNL ARPT-TOWER: About May 27, twr freq will be changed to 201 kc. (5-23) FLD: 130' high pile-driver lctd 2000' W of term bldg - mrkd day and night. (2-13) Men and equip. working turf areas adj concourses B and D. All acft and equip. should be parked 20' or more from existing W edge of paved area concourse B and existing S edge of paved area concourse D. Mrkd day and night. (3-26) Section of deactivated rnwy 18-36 between taxiway C and rnwy 10L-28R clsd perm. (5-18)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN RAFAEL-SAN FRANCISCO BAY ARPT: Caution - 60' crane and trucks operg daylgt hrs W end rnwy. (5-17)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during night use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

SANTA PAULA ARPT: Work in progress S side of fld. Caution - trucks immediately S of rnwy. Area S of rnwy soft, muddy. (9-1)

SANTA YNEZ ARPT: Const in progress. Rnwy 8-26 being extended 1000' to the W. Duration of work approx one month. (4-5)

SHAFTER-KERN CO. #14 ARPT: Auto races being held June 1 & 2. During preparation and dismantling May 25 thru June 8, tk-off and lndg indicated by arrow in fenced area E side of fld mrkd "land here only." Tfc left lndg to N; right lndg to S. (5-6)

STOCKTON FLD: Intensive helicopter trng conducted in vcnty of fld btwn 0800-1700 daily xcpt Sat and Sun. Acft utilizing Stockton rdo rng for simulated rng apchs - exercise extreme caution. Minimum altitude for low apchs is 528' MSL. (8-3)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)

THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked. (10-1)

UKIAH ARPT: Use surfaced rnwy 34-16 only. Dirt strip closed for winter. (10-26)

VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.

WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.

YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200'; lgts, BL4; fuel, F2.

COLORADO: CHEYENNE WELLS ARPT: Closed for winter due dust. Land at own risk. (10-29)

COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)

★DENVER-STAPLETON FLD-TOWER: May 8, VHF/DF flight-checked and cmsnd. Freq coverage: 118.1, 118.3, 119.3, 119.5, 120.5, 120.9, 121.5, 122.1, 126.18, 135.9, 137.88 mc. Commun unreliable at 40 mi below 14000' MSL 154° to 180° and below 16,000' MSL 181° thru 243°. VHF/DF bearings reliable in these areas. (5-8) FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segmented circle denotes right hand traffic. 2-way rdo rqrd. (9-12) 200' open ditch N side W end rnwy 8R-26L - flag mrkd day hrs, flashing red night hours. (3-26)

HUGO-RADIO: About July 1, VOR will be cmsnd. Freq: 108.2 mc. Ident: HGO. Lctd: lat 38-52-22, long. 103-24-12. Elev: 4932'. Class: VORW. (5-7)

PARSHALL - SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)

PUEBLO-SPECIAL NOTICE: Controlled Firing (demolition) Area for use of the Pueblo Ordnance Depot established within the following described area: bounded on N by lat 38-22-00; E, long. 104-21-22; S, lat 38-18-00; W, long. 104-22-50. (4-30)

CONNECTICUT: ★BRIDGEPORT ARPT-TOWER: May 14, trans & rcvr 120.9 mc cmsnd; freq 121.3 mc decmsnd. , Freq 243 mc cmsnd. (5-24)

**HARTFORD-BRAINARD FLD: Rnwy 9-27 clsd. Only NE and extreme SW ends of dike lgtd.

**MONROE ARPT: Re-opened. (5-7)

CONNECTICUT: SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.

★WILTON-RADIO: May 15, freq 122.2 mc and 122.1 mc decmsnd. VOR has minor bends in SW quad out to 17 n mi. DME coverage 270°-285°, 35 n mi at 3000'; 230°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'.

DELAWARE: ★DOVER-RADIO: May 15, VOR name and ident changed to Kenton, ENO, respectively. (4-17)

GEORGETOWN-SUSSEX CO. ARPT: Caution - NNE/SSW and NNW/SSE rnwys rough. Men and equip. on fld. Extensive glider activity weekends and evenings. Rnwy 16-34 W of intsxn rnwy 22 and N taxiway clsd. Rnwy 4 S of intsxn with rnwy 10-28 clsd. (1-18)

NEW CASTLE-PIASECKI ARPT: Sod strips clsd-rough. Use rnwy and taxi strip only.

WILMINGTON-NEW CASTLE COUNTY ARPT: Due to lmtd visibility, twr unable to ctl surface tfc on parking ramps. (6-9)

DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) See page 4 for Washington, D. C. High Density Air Traffic Zone. (2) Caution - dynamiting daily, heavy charges, dam const along E bank of Potomac River, 3/4 mi N of Chain Bridge at Dalecaria, Md.

WASHINGTON-RADIO-SPECIAL NOTICE: Effect. June 1, until approx Sept 1, all inbound acft to Washington National Arpt make initial contact with Washington Approach Control regardless of weather as follows: from a westerly direction on 118.3 mc in the general areas: Herndon, Plains, Remington, Quantico; from an easterly direction on 126.5 mc in the general areas: Beltsville, Shadyside, Andrews, Charlotte Hall. (4-25)

WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3° to 3.5° S.

★WASHINGTON NATIONAL ARPT-AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip acft on 353.9 mc, 318.2 mc and 362.3 mc only in Washington Metropolitan Area. Soon freq 323.2 mc will be cmsnd. May 23, 243.0, 378.8, 358.4 mc cmsnd. (5-23)

WASHINGTON NATIONAL ARPT: USAF, NAVY CG: Clsd to all acft xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flights requiring customs and immigration service. (d) Navy and CG logistic support flights. (CG logistic flights not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., CG and will be flown VFR conditions only.) NO acft over 120,000 lbs without prior approval arpt director. CG and Navy acft taxi to MATS term N of Admin Bldg.

WASHINGTON NATIONAL ARPT: Until approx end of Dec, hvy const equip. will be operg 0730-1800, Mon-Sat adj to a rnwy and/or taxiway. Open ditches 1-1/2' wide, 3' deep will be adj to pavement. Ditching will be of varying length and location, and will be properly flagged and obstn lgtd. At twr discretion, rnwys and taxiways may be clsd as required to accomplish work adj to paved area. Lmtd parking and taxiing W of taxiway #6. Taxiing E of taxiway #6 will be at discretion of ctl twr only. Slopeline apch lgtg sys serving rnwy 36 decm snd. Centerline hi-intensity apch lgtg sys cmsnd. Sys extends 3000' from rnwy pavement out into apch. Sys consists of green lgts across rnwy at threshold, a red bar lgt on each side of rnwy 100' from pavement, a red crossbar 50' long on rnwy centerline 200' from pavement, 28 clear bar lgts on rnwy centerline at 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. Intensity of lgts controlled by ctl twr as required by prevailing visibility conditions.

FLORIDA: ARCADIA ARPT: Arpt not mowed. Grass 24" high. Caution advised. (4-25)

BARTOW AIR BASE: AF primary Contract School clsd Sat., Sun., holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Prior approval 1730 to 0700 must be obtained before 1500 on arrival day.

BUNNELL ARPT: Caution - small bushes and trees about 10' high at each end of each rnwy. Rnwy 10-28 clsd - indications of drag races. (4-29)

CAMP BLANDING-SPECIAL NOTICE: Caution, low-flying acft. June 1 and 2, daylgt hrs, small arms and anti-aircraft firing will be conducted in restricted area R-180 and area inclosed by following coordinates: lat 29-52-30, long. 82-02-30; 29-48-00, 80-01-30; 29-52-30, 81-56-00; 29-54-30, 81-58-30. (5-22)

**CLEWISTON ARPT: Formerly carried as Sugarland. (5-7)

COCOA ARPT: N/S rnwy clsd. E/W rnwy under const. Fill operns on E end. Caution.

CROSS CITY-RADIO: Radials 307° and 299° usable all other courses unusable, acct of roughness and scalloping. (1-3) LFR may be used as substitute for VOR by ADF-equip acft while VOR unusable. MEAS remain as charted. (4-23)

CROSS CITY, 58, MEM-TPA ARPT: Trucks and equip. crossing E end of rnwy 31 and traveling on NE/SW taxi strip daylgt hrs - caution. (5-6)

FLORIDA: DAYTONA BEACH-RADIO: VOR restricted to use for navigational fixes in and along control 1150 at or above published minimum reception alt. Navigational feature in other portions of the facility service area beyond tolerance. Commun. feature usable thru out entire service area. (2-13) DME operg test-basis only. (2-14)

FT LAUDERDALE-WEST PROSPECT ARPT: NE/SW rnwy clsd for const. Men and equip. on fld. (3-9)

FT. MYERS-RADIO: VOR radial 131° unusable - excessive scalloping and bends. (5-13)

HOMESTEAD AFB-SPECIAL NOTICE: Caution - extensive practice jet penetrations and instrument approaches in progress up to 20,000'. Tfc operating in Homestead Control Zone at all times. (1-11)

JACKSONVILLE-RADIO: DME and VOR coverage 35 n mi at min en route alt. VOR unusable 180°-260°, with exception apch course 248° usable to 9 n mi. (4-27)

**KEY WEST-SPECIAL NOTICE: Effective May 21, Warning Area W-173 revised as follows: Bounded on the N by a line extending from lat 25-44-40, long. 81-57-05, to lat 25-44-00, long. 81-25-35, on the E by a line 3 n mi from and parallel to the Florida coast line, on the SE by Victor 3 and Blue 19 arwys, on the W by Control Area 1228. Warning Area W-174 revised as follows: Beginning at lat 25-44-40, long. 82-06-55, thence SE to lat 24-49-00, long 81-55-00; to lat 24-37-30, long. 82-00-30; westerly to lat 24-37-30, long. 82-06-00; southerly to lat 24-28-30, long. 82-06-00; southerly to lat 24-25-00, long. 82-06-30; easterly to lat 24-25-00; long. 81-57-00; southwesterly to lat 23-30-00, long. 82-19-00; westerly to lat 23-30-00, long. 82-46-00; northwesterly to lat 23-53-30, long. 83-12-00; northwesterly to lat 24-38-00,1 ong 84-00-00; north to lat 25-25-00, long. 84-00-00; northeasterly to lat 25-45-00, long. 83-27-00 to point of beginning. (4-10)

KEY WEST INTNL ARPT: All acft enroute Intnl Arpt ctc Boca Chica Twr on 126.18 mc for tfc info when 20 mi out. If unable ctc twr, ctc Key West Rdo. Rnwy 9-27 approved for air carrier day and ngt operns for all acft. Wea mins same as authorized for day operns. Caution - const, men, and equip. on and about rnwy. Use extreme ctn when taxiing due open ditch. Large or fast acft taking off from rnwy 9 proceed straight out and pass S and E E of Boca Chica NAS. (1-31)

MARIANNA-GRAHAM AIR BASE: AF Contract Primary School clsd Sat, Sun, holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Approval for 1730-0700 weekdays must be obtained before 1500 on arrival day. No fuel avail for civil acft. No itinerant lndgs rnwys 18R-36L and 8L-26R. (5-16)

MAYPORT NAAS - SPECIAL NOTICE: Caution - special exercises conducted 1200-1700Z June 6 and 1600-1900Z June 7 in 5 mi area around NAAS. All unauthorized acft, xcpt IFR and Bull Arpt, Atlantic Beach tfc, stay clear of this area. (5-14)

MIAMI-RADIO: VOR radials 298°and 226° unusable - excessive roughness. (5-1)

MIAMI INTNL ARPT-SPECIAL NOTICE: All flgts operg within an area of 10 n mi radius at ngt, at alts of 3000' or below, shall establish, prior to entry into area and maintain thereafter air speeds not in excess of 180 knots. Acft types having characteristics requiring min air speeds in excess of 180 knots shall maintain the lowest possible air speed consistent with safety. Miami's operators and pilots request cooperative compliance by itinerant flgts.

MIAMI INTNL ARPT: The following restrictions are applicable to all jet acft operg into and out of the arpt other than multi-eng transport types: when surface wind is less than 15 knots lndgs authorized on rnwy 9 only and take-off authorized on rnwy 27 only. Take-offs and lndgs will be into the wind when the surface wind exceeds 15 knots. Max performance climb out to 1000' required on all take-offs. Practice IFR apchs prohibited. Tfc pat. will be as directed by twr. Tactical apchs prohibited. (7-20) Due to non-visibility twr unable to ctl tfc on first 1200' rnwy 27R and portion of run-up pad. Adjusted threshold of rnwy 27R mrkd by red and white checked area and 2 green threshold lgts in lieu of normal 6. Unusable portion unlgtd. Effect. length of rnwy now 8200'. Lndgs and tk-offs shall be conducted W of adjusted threshold xcpt as necessary to meet gross wt restrictions. Pilots will then assume full responsibility for avoiding all surface tfc in blind area.

MIAMI-OCEAN REEF ARPT: New arpt: Type "L"; 30 mi S; lat 25-19, long 80-15; elev 4; 2 rnwys - longest rnwy 2500' oiled; 80, 91/96 oct fuel. (3-28)

ORLANDO-RADIO: DME and VOR coverage 35 n mi at min en route alt.

ORLANDO ARPT: Rnwy 28L-10R clsd for rgt lndgs and tk-offs to all acft. (2-12)

PANAMA CITY-FANNIN FLD: Caution - soft shoulders. Men and equip adj rnwys. (10-8)

★PENSACOLA-SAUFLEY FIELD NAAS: Navy LFR class changed to MRLZ. (5-17)

ST.AUGUSTINE-FAIRCHILD ARPT-TOWER: Ctl twr will be shut down May 30-31 and June 17 thru June 24. (5-21)

FLORIDA: **STARKE-CONWAY ARPT: Permanently closed. (3-27)

**STUART-WITHAM ARPT: 625'(650'MSL) lgtd twr erected 13.5 n mi SE(150°T) at lat 26-59-01, long. 80-05-42. (3-2)

TALLAHASSEE-RADIO: VOR courses unusable 110°-150°. (6-23)

TALLAHASSEE-DALE MABRY ARPT: Lgtd steam generating plant being erected 22.6 n mi SSE, at lat 30-05, long. 84-10. (8-27) Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs rqr prior permission. Rnwy 9-27 clsd to air carrier ngt operns. (10-7)

TAMPA-RADIO: VOR courses 95°-105° unusable.

TAMPA-SPECIAL NOTICE: Civil acft operg VFR in Tampa Bay area should avoid MacDill AFB control zone or remain above 2500' unless in contact with and cleared by MacDill AFB twr. Mil acft operg VFR in Tampa Bay area should avoid Tampa Intnl and Pinellas County Intnl control zones or remain above 2500' unless in contact with and cleared by the appropriate control twr. Additional caution should be exercised in entire area regardless of altitude due large numbers acft operg VFR therein. Extensive practice jet penetrations and practice instrument approaches in progress at all arpts. (7-11)

TAMPA-INTNL ARPT: Rnwy 14-32 clsd to all IFR and ngt tk-offs and lndgs. Caution - unmrkd obstn left side apch end rnwy 32. (1-31)

TITUSVILLE ARPT: N/S and E/W rnwys under construction - caution. (8-17)

VERO BEACH ARPT: Rnwys 3R-21L and 7R-25L clsd ngts. (2-15)

WINTER HAVEN-CYPRESS GARDENS ARPT: New arpt reported: 4 mi SE; lat 27-58-00, long 81-41-45; elev 130'; 3 rnwys (all sod); longest rnwy 3600'; no lgtg facs; 80 oct; repairs; operg 0900-sunset. (1-23)

GEORGIA: ALBANY ARPT: Jet acft operg from Turner AFB particulary SE of arpt. Ctc Turner twr on 126.18 mc for advisory info. If unable to ctc Turner twr ctc Albany rdo for relay. (11-18)

ALMA-RADIO: Mar 25, VOR shut down. - modernization. During modification shutdown VOR flights are authorized to use the Alma LFR in lieu of the VOR on all airway segments. MEAs remain as charted. Harris Neck, Cabins, St. Mary's Int unusable. Augusta radial 215° usable at Dublin Int. MRA 5000'. Augusta 170° radial usable at Lott's Int. MRA 5000'.

ALMA,SITE 43, MIA-ATL ARPT: Sod rnwys soft when wet - caution advised. (4-12)

ATLANTA-RADIO-SPECIAL NOTICE: ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun arpt. (2-26) Center advises high alt sector with jurisdiction over airspace 25,000' & above within Atlanta Control Area now activated. All jet type acft operg on IFR flgt plans at or above 25,000' or 1,000' on top should guard 301.4 mc. Within Atlanta area, this channel will be utilized to obtain traffic clearances & to forward progress reports. Weather & other information not pertinent to traffic control should be handled on 255.4 mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)

ATLANTA-RADIO: VOR courses 060°-090° out of tolerance acct bends & roughness. (11-3)

ATLANTA ARPT: Arriving acft make initial ctc with Atlanta Apch Ctl on 120.7 mc regardless of wea or flgt plan. Acft not equipped for 2-way commun on 120.7 mc will use other avail freq. Rnwys 33R-15L & 27R-9L clsd. Rnwy 15-33 clsd 0730-1730E Mon-Fri until 1/31/58.

NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250° have bends and roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi, 180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEAs and routing as follows: V-16 GHM VOR to BNA LFR via GHM 066° MEA 3000'; V-16 BNA LFR direct Smithville VHF Int via CSV 284° MEA 3500'; V-16 Smithville Int to CSV VOR via CSV 284° MEA 5000'. V-140 DYR VOR to McEwen Int via CYR 083° MEA 5000'; V-140 McEwen Int to BNA VOR via BNA 266° MEA 3500'; min hold alt at McEwen 3500'; V-140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V-140 Hartsville Int to Highway Int via BNA 056° MEA 7000'. V-7 BNA LFR to Lewisburg Int MEA 3000'. (2-28)

**NASHVILLE-BERRY FLD: 2-way rdo required. (5-17) Taxiway between ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy - use as a taxiway.

SEWANEE-UNIVERSITY OF THE SOUTH ARPT: Clsd due to rough and muddy fld. (2-19)

TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

TEXAS: ADDISON ARPT: Arpt reported: Type "L"; longest rnwy 2000'; remarks - work in progress enlarging NW/SE rnwy to 4500' x 100' with asphaltic concrete. (4-12)

ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R. I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S. F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)

AUSTIN-MUELLER ARPT-TOWER: April 15, ILS MM shut down - relctn. (4-15) During this period, ILS minimum rnwy 30 left raised to 300-1. (4-11) FLD: Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green range lgts on rnwy 30 designate touchdown point ngts. (10-4) Const in progress 1100' SE of advertised touchdown point on rnwy 30L. (5-7)

BEAUMONT-JEFFERSON CO. ARPT-TOWER: About June 1, ILS will be cmsnd. Lclzr freq: 109.5 mc, ident: BUJ. Glide slope freq: 332.6 mc. Apch bear: 113°. LMM freq: 206 kc; ident: UJ. LOM freq 236 kc; ident BU. MM lctd 0.4 mi, OM 4.8 mi from apch end rnwy. (4-30) FLD: Rnwy 11-29 clsd - construction. (9-19) Due non-visibility twr unable to control tfc on ramp N of hangar #1. (2-13)

BIG SPRING-SPECIAL NOTICE: Acft operg in vicinity of Big Spring range and Webb AFB in VFR weather exercise extreme caution due to intensive jet tfc. Alt below 5000' saturated on Arwy Green 5 and V-16. (4-22)

BIG SPRING-RADIO: April 8, VOR shut down until approx Aug 8 - relctn to lat 32-23-06, long. 101-29-00. (3-7) During this period, VOR flgts are authorized to use BGS LFR in lieu of BGS VOR. On all arwys MEAs remain as charted. Rowena Int use 105° bear. from BGS LFR, Jack Int use 108° bear. from BGS LFR, Sterling Int use 131° bear. from BGS LFR, King Int use 186° bear. from BGS LFR, Johnson Int use 203° bear. from BGS LFR. Mustang Int use 266° bear. from BGS LFR. (4-5)

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

BROWNWOOD ARPT: 500' (2000' MSL) lgtd twr being erected 5 n mi SSW (218°T) at lat 31-43-45, long. 99-01-00. (5-3)

COLLEGE STATION-RADIO: DME coverage 60°-90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

COLLEGE STATION-EASTERWOOD ARPT: Rnwy 4-22 clsd for maint. 0800-1700. (5-14)

CORSICANA-ALLISON RANCH ARPT: Clsd due to exten const on rnwys. Expected to reopen about June 1. (4-23)

CULBERSON-RADIO: May 20, VOR/DME shut down until approx June 20. During shutdown, following MEAs authorized on V-66, V-79 using HUP VOR. HUP VOR to CXN VOR 10,000'. CXN to ARNO Int 12,500'. Arno Int to Monohans Int 14,500'. Courses as charted. Gore Int CNM radial 177° in lieu CXN 360°. MRA 10,000'. (4-22)

DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21)

★DALLAS-LOVE FLD-TOWER: May 20, VHF/DF cmsnd. Freq: 118.1, 118.7, 119.5, 120.3, 121.1, 121.5, 122.1, 122.5, 126.7, 126.18, 135.9 mc. (5-21) FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-off not permitted. Caution - acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions. (11-14)

EAGLE LAKE-RADIO: About May 20, VOR will be shut down until approx June 20. (4-5) During shutdown VOR flgts authorized to use following temp MEAs, routes and fixes: (1) GLS 278 or HOU 262 and CLL 165° radials authorized as ELA fix in lieu VOR. MEA 4000'. (2) V180 SIH to ELA not usable. Temp route SIH to Int V198 (HOU 262° radial) via AUS 125' radial authorized. MEA 5000'. (3) V180 ELA fix to Richmond VOR int authorized via GLS 278° radial MEA 4000'. Richmond VOR Int to Arcola VOR Int authorized via GLS 278° radial MEA 2000'. (4) V198 Seguin VOR Int to ELA fix authorized via SAT 080° and HOU 262° radials. MEA 5000'. (5) Route Dacus VOR Int to Courtney Int not usable. Temp route Keenan VOR Int to V15 authorized via LFK 213° radial. MEA 5000'. (6) Courtney and Cypress VOR Ints not usable. Following fixes temp redesignated: Dacus VOR Int HOU 330° and CLL 085° radials; Gulf Coast VOR Int HOU 345° radial and 125° mag bear to MNU rbn; Fairbanks VOR Int HOU 315° radial and NE crs RIC LFR; Richmond VOR Int GLS 278° and HOU 247° radials. No change in MRAs except Richmond VOR Int which is 2000'. (4-18)

TEXAS: EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip avail.

FORT WORTH-CARTER FLD: 274'(824'MSL) lgtd twr being erected 8 n mi SSE(169°T) at lat 32-41-42, long. 97-01-15. (4-23) Construction on a 2050' runway extension on SE end of rnwy 13-31. Heavy equipment and men will be in the area approximately 90 days. 500' SE end of runway 13-31 will be closed periodically during daylgt hrs when men and hazards will be properly mrkd. (3-21)

FT. WORTH-MEACHAM FLD-TOWER: About June 3, ILS lclzr and glide slope will be shut down until approx Aug 3. (5-1)

GAINESVILLE MUN ARPT: 315'(1233'MSL) lgtd twr being erected 8.9 n mi NE(47°T) at lat 33-45-05, long. 97-04-02. (5-13)

GREENVILLE-MAJORS ARPT: Rnwys 17R and 35L clsd until June 6 due to const. Men and equip. working during daylgt hrs. Other rnwys will be clsd intermittently until further notice. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Ngt lndgs not adviseable. (5-10)

GUTHRIE-RADIO: April 22, VOR shut down until approx June 15. (5-20) During shutdown, GTH VOR, flgts authorized to use V-102 LBB VOR - SPS VOR MEA 6000' MSL. (3-20)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney, Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial.

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80'(AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron replaced by lgtd wind sock - lctd at former tetrahedron lctn. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for tk-offs to E only; no lndgs. (3-11)

HUECO MOUNTAIN-RADIO: About May 31, MHW will be cmsnd. Freq: 317 kc. Ident: HCO. Lctd lat 31-49-06, long. 105-59-42. (4-22)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000'-photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement. (1-21)

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4)

LUBBOCK ARPT-TOWER: Mar 4, ILS glide slope shut down until approx Sept 1. (2-25)
FLD: N 1000' rnwy 17-35 clsd to all acft until about Sept 1, for major construction and extension of runway. Rnwy 17 threshold lgts moved 1000' S. Men and heavy equipment working during daylgt hrs in the apch zone of rnwy 17. Rnwy 17-35 clsd to Convair and larger acft during const period xcpt during IFR wea conditions or with N or S winds of 20 knots or more. (3-14)

PREFERENTIAL ROUTINGS
OUTBOUND FLIGHTS
DEPARTING FROM:
*IDLEWILD
LA GUARDIA
*NEWARK/TETERBORO
IDL/LGA/EWR/TEB
FIRST FIX
Route to the first fix shown will be assigned in the departure clearance.
Limit of short range clearance.
*Stillwater first fix with radar hand-off out of IDL and EWR
All operators and pilots are requested to file IFR flight plans in conformance with Preferential Routings. Pilots operating non-VOR equipped aircraft are requested to file IFR flight plans using low-frequency routes that overlie the VOR routes, whenever possible.

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods:(a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of 4° be indicated through use of the ground check or +6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 108.6 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)
Los Angeles(International 111.0mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Temporary Controlled Firing Area – Jordan Narrows, Utah

Firing to cease upon approach of aircraft over firing area.

Designated Altitude – Surface to 15,000 ft. above terrain.

Time of Use – Daylight hours only during period of June 9-23, 1957 inclusive

Activity – Artillery firing

Using Agency – Utah National Guard

Firing to be conducted in accordance with the following restrictions:

1. Visual surveillance will be continuously maintained over the entire area by safety officers during firing operations to detect approaching aircraft and communication will be established with gun positions to order cessation of firing upon the approach of aircraft.

2. Firing will be conducted only when there are no clouds below 16,000 ft. greater than scattered clouds and when visibility is at least 10 miles.

3. No projectile shall enter or pass through any clouds.

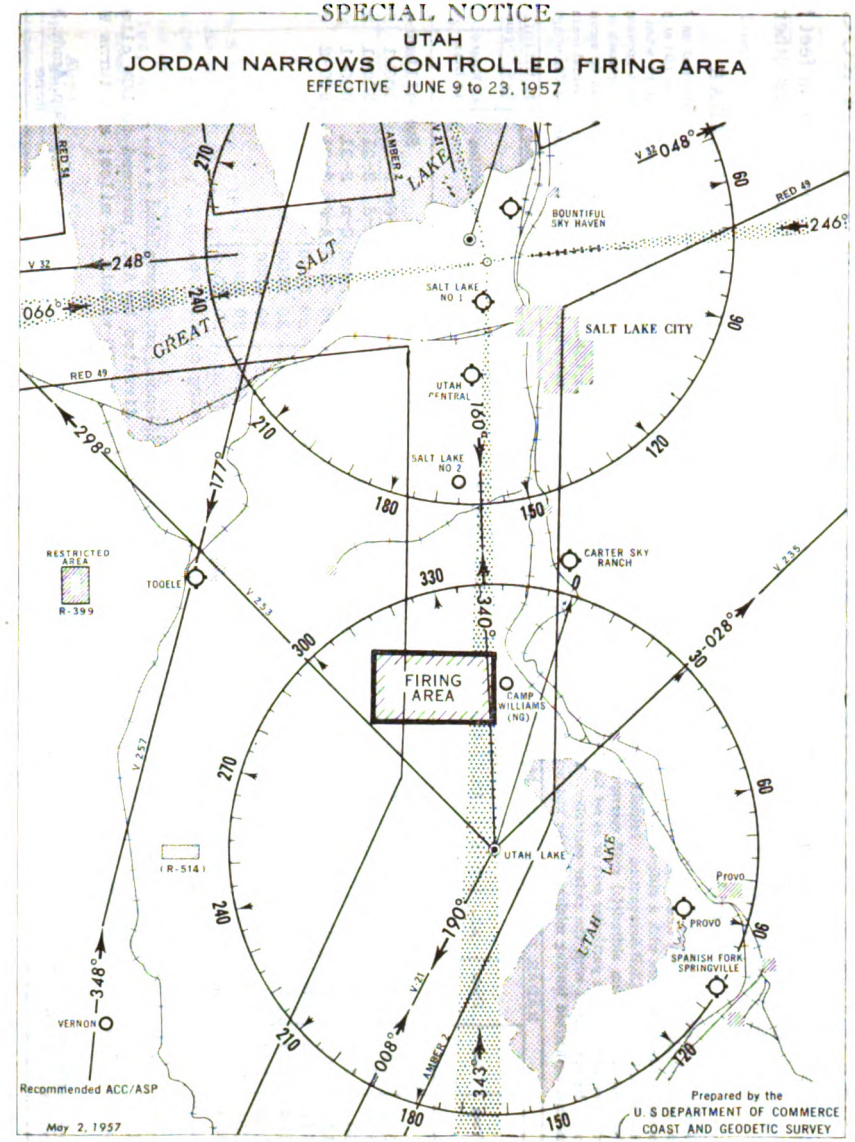
4. All firing to be conducted to the west.

5. The nearest Civil Aeronautics Administration Air Traffic Communication Station Station (Salt Lake City ATCS) shall be advised at least 24 hours in advance of firing activities in order that adequate NOTAMS may be issued. During all scheduled periods of firing, as evidenced by the issuance of a NOTAM, the Civil Aeronautics Administration Interstate Airways Communication Stations at Salt Lake City and Delta, Utah will suggest to all aircraft contacting them that the aircraft follow the east side of the south course of Salt Lake Radio Range while in the vicinity of the Controlled Firing Area.

6. Radar surveillance of the Jordan Narrows Valley will be provided during all periods of firing.

7. Provision will be made for the placarding of all airports in the vicinity of Jordan Narrows, particularly small airports, sufficiently in advance to warn area and transient private pilots of the controlled firing area and the dates of its utilization.

8. Notice of firing will be broadcast by ATCS in the area at the time weather forecasts are transmitted.



REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CT. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(11 June 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____), IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.

Continued on next page.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

(a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.

(b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
"(aircraft identification) THIS IS (name of radar site), (instructions)"
The instructions will normally consist of one of the following:

(a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)

(b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).

(c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).

(d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).

(e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
(a) radio contact with the director is lost.
(b) notified by the radar director that radar contact has been lost.
(c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

(g) = Twr equipped with 121.9 mc or (g.7) = Twr equipped with 121.7 mc for control of ground traffic. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

NOTICES TO AIRMEN
SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regiona Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --. -... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

RUNWAY VISUAL RANGE REPORTS AT NEWARK N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 52. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

(11 June 57)

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

WASHINGTON, D. C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Maximum speed within the zone is 180 mph or 160 knots indicated airspeed unless operational limitations for a particular aircraft require greater airspeeds, in which case the aircraft shall not be flown in excess of the minimum speed consistent with the safe operational limitations of the aircraft.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

✓ NEWARK CEILING-VISIBILITY EVALUATION PROGRAM: This program, being conducted at Newark Airport by the U.S. Weather Bureau, changed from furnishing threshold contact height estimates to APPROACH LIGHT CONTACT HEIGHT estimates on May 1, 1957. These estimates will be given out only by the CAA local controller on 118.3 mc at the time each pilot reaches the outer marker inbound for a straight-in ILS approach to rnwy 4. Evaluation of the accuracy and usefulness of these estimates is based solely on the report given by the pilot. Therefore it is important for the report "APPROACH LIGHTS" to be given on 118.3 mc the instant the approach lights are sighted. All pilots are urged to visit the project building adjacent to the control tower or telephone the project personnel at MItchell 2-4414 and give their opinion as to whether the approach light contact heights are of more value than the threshold contact lights.

✓ AIRMAN'S GUIDE PRICE CHANGE: Effective July 1, the annual subscription to the Airman's Guide is being reduced to $2.25 domestic ($3.25 foreign). The Flight Information Manual, which was formerly included in the subscription price to the Guide, is NOT included in the new price. However, all subscribers to the Guide will receive written notice from the Superintendent of Documents when the Manual is issued, giving the price and how it may be purchased. The Manual cost is expected to be approximately $0.50, so that the overall cost of Guide and Manual will remain about the same. The separation of the Guide and Manual is for bookkeeping purposes only; the Guide will continue to supplement the Manual as in the past.

ON REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective on July 4:

DESIGNATE:

(1) ARDMORE (VHF) INTSXN, PA - the intsxn of the 173°T radial of the Allentown, Pa. VOR and the 074°T radial of the West Chester, Pa. VOR.

(2) AZALEA (VHF) INTSXN - the intsxn of the 195°T radial of the Wilmington, N.C. VOR and the 112°T radial of the Charleston, S.C. VOR.

(3) BALBOA, CALIF. (VHF) INTSXN - the intsxn of the 234°T radial of the Oakland, Calif. VOR and the 184°T radial of the Point Reyes, Calif. VOR.

(4) BALLARD, ALA. (VHF) INTSXN - the intsxn of the 354°T radial of the Redstone, Ala. TVOR and the 241°T radial of the Huntsville, Ala. VOR.

(5) BILLINGS, MO. (VHF) INTSXN - the intsxn of the 074°T radial of the Neosho, Mo. VOR and the 210°T radial of the Springfield, Mo. VOR.

(6) BROWNSON (INTEGRATED) INTSXN - the intsxn of the 036°M radial Ramey AFB, P. R. and the 306°M bearing from the San Juan, P. R. LFR.

(7) CANNON FALLS, MINN. (VHF) INTSXN - the intsxn of the 333°T radial of the Rochester, Minn. VOR and the 270°T bearing toward Stanton, Minn. Rbn.

(8) CHEMICAL, ALA. (VHF) INTSXN - the intsxn of the 241°T radial of the Huntsville, Ala. VOR and the 278°T radial of the Redstone, Ala. TVOR.

(9) CORAL (INTEGRATED) INTSXN - the intsxn of the 082°M radial of the Ramey AFB, P.R. and a 306°M bearing from the San Juan, P. R. LFR.

(10) CUMBERLAND, GA. (VHF) INTSXN - the intsxn of the 026°T radial of the Jacksonville, Fla. VOR and the 129°T radial of the Brunswick, Ga. VOR.

(11) DAWES STATION, CALIF. (VHF) INTSXN - the intsxn of the 078°T radial of the Daggett VOR and the 289°T radial of the Needles VOR.

(12) DRADE, CALIF. (VHF) INTSXN - the intsxn of the 266°T radial of the Oakland, Calif. VOR and the 207°T radial of the Point Reyes, Calif. VOR.

(13) DRUM (VHF) INTSXN - the intsxn of the 195°T radial of the Wilmington, N.C. VOR and the 123°T radial of the Myrtle Beach, S.C. VOR.

(14) ELK, S. DAK. (VHF) INTSXN - the intsxn of the 250°T radial of the Rapid City, S. Dak. VOR and the 338°T radial of the Chadron, Nebr. VOR.

(15) EMMETT, ARK. (VHF) INTSXN - the intsxn of the 067°T radial of the Texarkana, Ark. VOR and the 307°T radial of the El Dorado, Ark. VOR.

(16) FAIRBURN, S. DAK. (VHF) INTSXN - the intsxn of the 188°T radial of the Rapid City, S. Dak. VOR and the 250°T radial of the Philip, S. Dak. VOR.

(17) GREENWATER (INTEGRATED)INTSXN - the intsxn of the 073°M radial of the Ramey AFB, P.R. and the NW crs of the San Juan, P.R. LFR.

(18) HACKBERRY, ARIZ. (VHF) INTSXN - the intsxn of the 059°T radial of the Needles, Calif. VOR and the 303°T radial of the Prescott, Ariz. VOR.

(19) KEYSTONE, S. DAK. (VHF) INTSXN - the intsxn of the 250°T radial of the Rapid City, S. Dak. VOR and the 360°T radial of the Chadron, Nebr. VOR.

(20) LORETTO, MINN. (VHF) INTSXN - the intsxn of the 242°T radial of the Minneapolis, Minn. VOR and the NW crs of the Minneapolis ILS lclzr.

(21) MAYPEARL, TEXAS (VHF) INTSXN - the intsxn of the 134°T radial of the Britton, Texas VOR and the 202°T radial of the Dallas, Texas VOR.

(22) McCOY, OREGON (VHF) INTSXN - the intsxn of the 204°T radial of the Newberg, Oregon VOR and the NW crs of the Salem, Oregon ILS lclzr.

(23) McQUEENY,TEX.(VHF) INTSXN -the intsxn of the 089°T radial of the San Antonio, Texas VOR and the 205°T radial of the Austin, Texas VOR.

(24) MT. PLEASANT, MISS. (LF) INTSXN - the intsxn of the SE crs. Navy Memphis, Tenn. LFR and a 098°T bearing from Memphis, Tenn. LFR.

(25) St. CROIX, WIS. (VHF) INTSXN - the intsxn of the 265°T radial of the Eau Claire, Wisc VOR and the 350°T radial of the Rochester, Minn. VOR.

(26) SAPELO, GA. (VHF) INTSXN - the intsxn of the 180°T radial of the Savannah, Ga. VOR and the 031°T radial of the Brunswick, Ga. VOR.

(27) SHAWNEE, KANS. (VHF) INTSXN - the intsxn of the 099°T radial of the Topeka, Kans VOR and the 268°T radial of the Blue Springs, Mo. VOR and the 199°T radial of the Kansas City, Mo. VOR.

(28) STEAMBOAT, ILL. (VHF) INTSXN - the intsxn of the 090°T radial of the Naperville, Ill. VOR and the 022°T radial of the Chicago Heights, Ill. VOR.

(29) SURF, ILL. (VHF) INTSXN - the intsxn of the 075°T radial of the Naperville, Ill. VOR and the 007°T radial of the Chicago Heights, Ill. VOR.

(30) TUTTLE, KANS. (VHF) INTSXN - the intsxn of the 084°T radial of the Lamar, Colo. VOR and the 294°T radial of the Garden City, Kans. VOR.

(31) UNION PASS, ARIZ. (VHF) INTSXN - the intsxn of the 078°T radial of the Daggett VOR and the 004°T radial of the Needles VOR.

(32) WASHINGTON, ARK. (VHF) INTSXN - the intsxn of the 053°T radial of the Texarkana, Ark. VOR and the 307°T radial of the El Dorado, Ark. VOR.

(33) WESTFIELD, MASS. (VHF) INTSXN - the intsxn of the 058°T radial of the Poughkeepsie, Pa. VOR and the 131°T radial of the Chester, Mass. VOR.

REDESIGNATE:

(1) ADAMS RUN, S.C. (VHF) INTSXN - the intsxn of the 227°T radial of the Charleston, S.C. VOR and the 047°T radial of the Savannah, Ga. VOR and the 110°T radial of the Allendale, S.C. VOR.

(2) ALDEN, IOWA (VHF) INTSXN - the intsxn of the 092°T radial of the Ft. Dodge, Iowa, VOR and the 188°T radial of the Mason City, Iowa VOR.

(3) AMES, IOWA (VHF) INTSXN - the intsxn of the 135°T radial of the Ft. Dodge, Iowa VOR and the 008°T radial of the Des Moines, Iowa VOR.

(4) ARCADIA, FLA. (VHF) INTSXN - the intsxn of the 313°T radial of the La Belle, Fla. VOR and the 176°T radial of the Lakeland, Fla. VOR.

(5) BONNER SPRINGS, KANS. (VHF) INTSXN - the intsxn of the 099°T radial of the Topeka, Kans. VOR and the 231°T radial of the Kansas City, Mo. VOR.

(6) COLEBROOK, CONN. (VHF) INTSXN - the intsxn of the 058°T radial of the Poughkeepsie, N.Y. VOR and the 320°T radial of the Hartford, Conn. VOR.

(7) CYPRESS, FLA. (VHF) INTSXN - the intsxn of the 318°T radial of the Miami, Fla. VOR and the 219°T radial of the West Palm Beach, Fla. VOR.

(8) DIXIE RANCH, FLA. (VHF) INTSXN - the intsxn of the 164°T radial of the Orlando, Fla. VOR and the 224°T radial of the Vero Beach, Fla. VOR.

(9) FREEPORT, ILL. (VHF) INTSXN - the intsxn of the 276°T radial of the Rockford, Ill. VOR and the 164°T radial of the Lone Rock, Wisc. VOR.

(10) LITTLE RIVER, N.C. (LF) INTSXN - the intsxn of the 330°T bearing to Pope, N.C. Rbn and the 011°T bearing to Raleigh, N.C. LFR.

(11) MARSHALL, MO. (VHF) INTSXN - the intsxn of the 276°T radial of the Columbia, Mo. VOR and the 232°T radial of the Macon, Mo. VOR.

(12) NORTH, S.C. (VHF) INTSXN - the intsxn of the 193°T radial of the Columbia, S.C. VOR and the 090°T radial of the Augusta, Ga. VOR.

(13) PARRISH, FLA. (VHF) INTSXN - the intsxn of the 133°T radial of the Tampa, Fla. VOR and the 212°T radial of the Lakeland, Fla. VOR.

(14) SEMINOLE, FLA. (VHF) INTSXN - the intsxn of the 139°T radial of the La Belle, Fla. VOR and the 092°T radial of the Ft. Myers, Fla. VOR.

(15) SOUTH BAY, FLA. (VHF) INTSXN - the intsxn of the S crs Tampa, Fla. ILS lclzr and the 133°T radial of the Tampa, Fla. VOR.

(16) TONGANOXIE, KANS. (VHF) INTSXN - the intsxn of the 099°T radial of the Topeka, Kans. VOR and the 195°T radial of the St. Joseph, Mo. VOR.

(17) WILDWOOD, N.J. (VHF) INTSXN - the intsxn of the 154°T radial of the Woodstown, N.J. VOR and the 203°T radial of the Coyle, N.J. VOR.

(18) WINGS, PA. (VHF) INTSXN - the intsxn of the 173°T radial of the Allentown, Pa. VOR and the 051°T radial of the West Chester, Pa. VOR.

CANCELLED:

(1) ANDALUSIA ALA. (LF) INTSXN - the intsxn NE crs Whiting NAS, Fla. and the N crs Crestview, Fla. LFR.

(2) ARDMORE, PA. (VHF) INTSXN - the intsxn of the 082°M radial of the West Chester, Pa. VOR and the N crs Philadelphia, Pa. LFR.

(3) CAPE MAY, N.J. (VHF) INTSXN - the intsxn of the 046°M radial of the Salisbury, Md. VOR and the 213°M radial of the Coyle, N.J. VOR.

(4) COOKSBURG, N.Y. (VHF) INTSXN - the intsxn of the 238°M radial of the Albany, N.Y. VOR and the 341°M radial of the Poughkeepsie, N.Y. VOR.

(5) DUBUQUE, IOWA (VHF) INTSXN - the intsxn of the 331°M radial of the Moline, Ill. VOR and the 091°M radial of the Waterloo, Iowa VOR.

(6) EDDY, N.Y. (VHF) INTSXN - the intsxn of the Binghamton, N.Y. VOR direct radial to the Wilton, Conn. VOR and the 054°M radial of the Wilkes Barre, Pa. VOR.

(7) EXCELLO, MO. (LF) INTSXN - the intsxn direct radial between Kansas City, Mo. VOR and Quincy, Ill. VOR and direct radial between Kirksville, Mo. VOR and Columbia, Mo. VOR.

(8) GRAYS, GA. (VHF) INTSXN - the intsxn of the 002°M radial of the Savannah, Ga. VOR and the 243°M radial of the Charleston, S.C. VOR.

(9) LANSDALE, PA. (VHF) INTSXN - the intsxn of the 048°M radial of the West Chester, Pa. VOR and the 270°M bearing from the Willow Grove, Pa. LFR.

(10) MEADOWBROOK, N.J. (LF) INTSXN - the intsxn NW crs La Guardia, N.Y. and the NE crs of the Teterboro, N.J. ILS localizer.

(11) MONMOUTH, ORE. (VHF) INTSXN - the int of the 204°T radial of the Newberg, Ore. VOR and the 294°T bearing from Salem, Ore. LOM.

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

HOLDING PATTERNS: The following holding patterns are designated, redesignated, cancelled, or revised and shall become effective July 4, 1957:

DESIGNATE:

(1) CANNON FALLS, MINN. (VHF) INTSXN - direction of holding - SE on the 333°T radial of the Rochester, Minn. VOR; direction of turns - right; time - 1 minute; minimum alt 2800'.

(2) FAIRBURN, S. DAK. (VHF) INTSXN - direction of holding - S on the 188°T radial of the Rapid City, S. Dak. VOR; direction of turns - left; time - 1 minute; minimum alt 6500'.

(3) KEYSTONE, S. DAK. (VHF) INTSXN - direction of holding - W on the 250°T radial of the Rapid City, S. Dak. VOR; direction of turns - right; time - 2 minutes; minimum alt 10,000'.

(4) LANSING, ILL. (LF) INTSXN - direction of holding - E on the W crs of the Goshen, Ind. LFR; direction of turns - right; time - 2 minutes.

(5) LORETTO, MINN. (VHF) INTSXN - direction of holding - NW on the NW crs of the Minneapolis ILS localizer; direction of turns - right; time 1 minute; minimum alt 3000'.

(6) ST CROIX, WIS. (VHF) INTSXN - direction of holding - E on the 265°T radial of the Eau Claire, Wis. VOR; direction of turns - right; time - 1 minute; minimum alt 3500'.

REDESIGNATE:

(1) KNOB, TENN. (LF) INTSXN - direction of holding - N on the back crs of the Nashville, Tenn. ILS localizer; direction of turns - left; time - 1 minute; minimum alt 2000'.

(2) LOS ANGELES, CALIF. (ILS/LOM) - direction of holding - E on the E crs of the ILS localizer; direction of turns - left; time - 1 minute; minimum alt 2000'.

(3) LOS ANGELES, CALIF. (VOR) - direction of holding - W on the 271°T radial; direction of turns - right; time - 1 minute; minimum alt 3000'.

(4) MALIBU, CALIF. (LF) INTSXN - direction of holding - W on the W crs of the Los Angeles, Calif. LFR; direction of turns - right; time - 1 minute; minimum alt 2000'.

(5) SAN PEDRO, CALIF. (LF) INTSXN - direction of holding - S on the S crs of the Los Angeles, Calif. LFR; direction of turns - right; time - 1 minute; minimum alt 3000'.

(6) STADIUM, TEXAS (LF) INTSXN - direction of holding - S on the S crs of the Ft. Worth, Texas LFR; direction of turns - right; time - 1 minute; minimum alt 2000'.

CANCELLED:

(1) MEADOWBROOK, N. J. (LF) INTSXN - direction of holding - NE on the NE crs of the Teterboro ILS localizer; direction of turns - right; time - 1 minute; minimum alt 3000'.

REVISED:

(1) RACINE, WIS. (VHF) INTSXN - change minimum altitude to 3500'.

CONTROL AREA EXTENSIONS AND CONTROL ZONES: Effective as indicated, unless otherwise advised, the following temporary control areas and control zones are amended in whole or in part as follows:

(1) Effective 0001 local time 15 June 1957 to 2400 local time 1 Sept 1957:

Control area extension (Alpena, Mich) is added to read: "That airspace bounded by lines beginning at a point at lat 45-28-00, long. 83-30-00, thence extending to a point at lat 45-16-30, long. 83-11-25, thence to a point at lat 44-42-00, long. 83-52-30, thence to a point at lat 44-53-00, long. 84-11-30, thence to the point of beginning."

Control zone (Alpena, Mich) is added to read: "Within a 5-mile radius of Phelps-Collins Air National Guard Base, Alpena, Mich, and within 2 miles either side of lines bearing 005°T and 185°T from the Air National Guard nondirectional radio beacon extending from the 5-mile radius zone to a point 5-miles N of the nondirectional radio beacon."

(2) Effective from 0001 local time 1 July 1957 to 2400 local time 1 Oct 1957:

Control area extension (Martha's Vineyard, Mass) is added to read: "Within 2 miles on the NW side and 3-1/2 miles on the SE side of a line bearing 040°T extending from the NE end of the Martha's Vineyard Airport rnwy No. 24 to a point 10 miles NE of the nondirectional radio beacon, excluding the portion which overlaps restricted area R-79."

Control zone (Martha's Vineyard, Mass) is amended to read: "Within 3-mile radius of Martha's Vineyard Airport and within 2 miles either side of a line bearing 040°T extending from the NE end of rnwy No. 24 to a point 10 miles NE of the nondirectional radio beacon."

(3) Effective from 0001 local time 1 July 1957 to 2400 local time 30 Sept 1957:

Control area extension (Point Barrow, Alaska) is added to read: "That airspace within a 50 statute mile radius centered on Point Barrow nondirectional radio beacon PBA located at lat 71-19-32N, long. 156-38-52W."

Five-mile radius zones is amended by adding: "Point Barrow, Alaska: Point Barrow nondirectional radio beacon PBA."

RESTRICTED AREA AMENDMENT: The following Restricted Areas are amended to become effective as indicated:

(Part 608 - Restricted Area - Amendment 200)

(1) Effective 10 July 1957:

Section 608.57, the Camp Haven, Wisconsin (formerly Haven, Wisconsin) Restricted Area (R-84) amended March 24, 1956 in 21 F.R. 1819, is further amended by changing the "Designated Altitudes" column to read: "Surface to 60,000 ft MSL".

(2) Effective 0001 local time 15 June 1957 to 2400 local time 1 September 1957:

Section 608.30, the Hammond Bay, Michigan Restricted Area (R-424 formerly D-424) amended October 31, 1951 in 16 F.R. 11066, is further amended by changing the "Description by Geographical Coordinates" column to read: "That portion of R-424 which overlaps the Control Area described as: beginning at lat 45-28-00, long. 83-30-00; to lat 45-16-30, long. 83-11-25; to lat 44-42-00, long. 83-52-30; to lat 44-53-00, long. 84-11-30, to point of beginning shall be excluded from the Control Area".

AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 12, Number 6, dated 28 May 1957, as follows:

(1) Page 7 - Under "RESTRICTED AREA AMENDMENT", Amendment 199, effective June 1, 1957, the "Description by Geographical Coordinates" column should read: "Within a five mile radius of lat 29-53-20, long. 82-00-25, excluding that area one mile either side of a 220°T bearing and more than two miles from the center of the Restricted Area". (NOTE: The latitude was incorrectly reported as "29-33-20"; it should be "29-53-20".)

MEMPHIS CENTER AND NEW ORLEANS CENTER BOUNDARY REVISION: Effective 0001 CST June 7, 1957, the Memphis Center and New Orleans Center Boundaries were amended as follows: Beginning at the present boundary crossing Amber Civil Arwy 5 at a point 50 mi south of the Jackson, Miss, LFR station, thence direct to cross VOR Civil Arwy 194 at a point 60 mi southwest of the Meridian, Miss, VOR station, thence direct to a point 31°-51'N, 89°W, thence direct to a point 32°N, 88°W.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

BMX	Big Mountain, Alaska (assignment)
DMA	Tucson, Ariz., Davis-Monthan AFB (change from TUS 0001Z June 25)
HAF	Half Moon Bay, Calif., Half Moon Bay Arpt (change from REP)
HMN	Alamagordo, N. Mex., Radiobeacon (assignment)
TUS	Tucson, Ariz., Tucson Arpt (change from TUO 1600Z July 1)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Albany	Lake Huron	Milwaukee	WAC 191
Aroostook	Lake Superior	Twin Cities	WAC 218
Burlington	Lake of the Woods	Detroit Local	WAC 219
Detroit	Lewiston	JN 30	WAC 266

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg., test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution-all arwys and Ints based on Birmingham or Meridian VORs are not useable for navigational purposes until the stns are recmsnd at new lctns. (4-18)
BIRMINGHAM ARPT-TOWER: About July 1 MM and LMM will be shut down-relctn.(6-4) FLD: Caution-tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx. thru Nov for relctn due rnwy ext. (5-1)
ALABAMA: DOTHAN-NAPIER FLD: Caution-helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)
**HAMILTON-MARION CO. ARPT: New arpt: Type "L"; lctd 0.5 mi SW; 1 rnwy(N/S)- 8000' x 100' gravel; minor A & E. (6-1)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-BATES FLD-SPECIAL NOTICE: Unlgtd trees penetrate apch zone to all rnwys. Use caution. 200' and 1/2 mi is absolute tk-off min for all acft. (4-22)
MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of field. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
★MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2) About June 24, VOR will be shut down until approx Aug 29 - relctn to lat 34-42-24, long. 87-29-27. (5-16) W course LFR realigned fro m 102° to 095°. (6-7) Rcvd too late for inclusion on ANRA page. All courses LFR have moderate multiples. (6-7)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail ngts upon prior req. Emergency only. (4-23)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
FLORENCE-SPECIAL NOTICE: Temporary Controlled Firing Area within the following described area: bounded on the N by lat 33-07-30; E by long 111-20-00; S lat 33-03-30; W long. 111-22-30. Designated Altitude: Surface to 7200'MSL Time of Use: 0630-1600 hours MST on or about 30 June 1957 only. Activities Conducted: 4.2 inch Infantry Mortar Firing, High Explosive and Smoke Shell. Using Agency: Heavy Mortar Company, 158th Infantry, National Guard of Arizona., Glendale, Arizona. (4-30)
FT. HUACHUCA-SPECIAL NOTICE: Caution-extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.13, 126.18, 243.0mc. Rdo bcn (FHU 410 kc) and TVORW(FHU 111.6mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civilian acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
PHOENIX-SPECIAL NOTICE: Extreme caution-area between Phoenix VOR & Hassayampa VOR on Victor arwy 16 & Green 5. Extensive high performance, jet acft cross these arwys when departing & arriving Luke AFB in connection with trng conducted Gila Bend Restricted Areas (R-309, R-308). This tfc generally crosses V-16 & Green 5 between Hassayampa VOR & town of Tolleson (11 mi W of Phoenix) at alts of 3000'MSL & below-0715 thru 1600, Mon thru Fri. (3-1) All flgts operg thru this area maintain at least 4000' MSL. Flgts lndg or departing within area advised to exercise extreme caution below 4000' MSL. (5-7)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for tk-off, xcpt prior permission arpt manager. (12-7)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185° 39 n mi at 10,000'.
**PRESCOTT ARPT: 154'(5503'MSL) lgtd twr erected 5.9 n mi SSW(203°T) at lat 34-33-16, long. 112-28-10. (5-28)
SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)
SAN SIMON-RADIO: About June 10, VOR will be cmsnd. Freq: 115.4mc. Ident: SSO. Lctd lat 32-16-12, long. 109-15-45. Elev: 3607'MSL. Class: VORW. Disregard spurious signals.

ARIZONA: SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

**TUCSON-SPECIAL NOTICE: The following Special Air Traffic Control Instruction is effective immediately: All acft operd under the VFR, or VFR conditions, within Green civil arwy No. 5 and VOR civil arwy No. 16, W of long. 112-10 and E of long. 112-35, shall comply with the following: (a) Crossing Aircraft. All acft crossing the area of the arwys specified above shall be flown at an alt below 3000' MSL, or above 10,000' MSL and shall remain W of long. 112-16, during such crossing. (b) Enroute Aircraft. All enroute acft operg along Civil arwys Green No. 5 or VOR No. 16, entering the area of such arwys specified above for the purpose of flight thru such area, shall be flown at an alt of at least 4000' MSL while in the area between long. 112-35 and long. 112-16. (6-7)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)

TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted week-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: **CAMDEN-HARRELL ARPT: NE/SW strip to be used in emerg only. (4-8)

LITTLE ROCK-RADIO: About June 17, Z mkr will be shut down until approx June 24 - modernization. (6-7)

PINE BLUFF-RADIO: May 6, VOR shut down. During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR xcpt V-16S TXK to PBF unusable. Ints and alts as charted.

TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip on fld. (4-26)

ARCATA ARPT-RADIO: April 2, ILS lclzr and glide slope shut down - rcltn of lclzr.

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DINUBA-ALTA ARPT: Clsd until June 20. Unlgtd until July 20. (4-22)

DIXON ARPT: Closed. (8-30)

**DOS PALOS-EAGLE ARPT: Rotg bcn not operg. Rnwy lgts on request only. (5-28)

**DOWNEY ARPT: Closed - land use changed. (3-14)

ELSINORE ARPT: Caution - glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT JONES-RADIOL VOR has lgt course roughness all quads. Only arwy radials flight-checked.

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

**FREMONT-CENTER FLD: Formerly carried under Centerville as Fremont. Type "L".

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N of and E of arpt. Const and equip both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

LONG BEACH RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) VHF/DF bearings unreliable below 12,000' MSL SW quad btwn 200° and 230°T. (5-6) About July 15, trans & rcvr 123.8 mc will be replaced by 120.5 mc. FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndg and take-off. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315° S of and roughly parallel apch end rnwy 30 for 800' - caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. Daylgt opern of cranes with 80' booms adj to apch end rnwy 30. Take-off not affected. (3-28)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR and LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19) About June 17, gnd ctl freq 121.9 mc will be changed to 121.7 mc. (5-10) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equip crossing rnwy. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or between LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

LUCERNE VALLEY-DOUBLE J RANCH ARPT: Length of strip reported increased to 3000'.

MONTEREY-PENINSULA ARPT-RADIO: About June 10, ILS will be commissioned. Localizer frequency 110.1 mc, identification: MRY. Located 1000' southeast on a centerline of northwest/southeast runway. Glide slope frequency: 334.4 mc. Located 825' from approach end northwest/southeast runway and 236' north of centerline of runway. Glide angle 3.0°. Approach bearing: 84°. Middle marker compass locator frequency: 260 kc, identification: "RY". Middle marker located 0.60 miles from approach end runway. Outer marker compass locator frequency: 278 kc, identification "MR" Outer marker located 5.14 mi from approach end runway. Disregard spurious signals. (5-29)

NATIONAL CITY ARPT: Extensive const around arpt; (7-19)

**NEEDLES, 25A, LAX-AMA ARPT: Fuel no longer avail. (4-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

CALIFORNIA: OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER -SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only. (4-24)
OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30)
OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24) About July 1, VOR will be shut down until approx October 1 - modernization. Durg this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flights departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int R65 to OCN durg shutdown period. (6-7)
ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)
ONTARIO INTNL ARPT -SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea.
ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)
OXNARD-VENTURA CO. ARPT: Until approx July 31, 176' lgtd oil drilling derrick erected 1600' W and 2200' N of W end of rnwy 7. (4-30)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: June 4, VOR/DME shut down until approx June 30 - modernization. Durg this period the following routes will be usable: SNS via 124° radial to PRB Int MEA 8000'; V27 PRB Int-SBA MEA 10,000'; V109 PRB Int-CLG MEA 7000'; V248 PRB Int-Belridge Int MEA 6000'; PRB Int temp designated as SNS radial 124° and CLG radial 199°. The following arwys unusable: V27 SNS-PRB; V27W SNS-SBA; V25 Benito Int-SBA; V113 Panoche Int-PRB; V209 PRB-Cuyama Int; Benito and Idria Ints on V137 also unusable.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°.
SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)
SAN FRANCISCO INTNL ARPT: 130' high pile-driver lctd 2000' W of term bldg - mrkd day and night. (2-13) Men and equip. working turf areas adj concourses B and D. All acft and equip. should be parked 20' or more from existing W edge of paved area concourse B and existing S edge of paved area concourse D. Mrkd day and night. (3-26) Section of deactivated rnwy 18-36 between taxiway C and rnwy 10L-28R clsd perm. (5-18)
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
SAN RAFAEL-SAN FRANCISCO BAY ARPT: Caution - 60' crane and trucks operg daylight hours W end rnwy. (5-17)
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23)
SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260°and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised durg night use of field due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

CALIFORNIA: SANTA PAULA ARPT: Work in progress S side of fld. Caution - trucks immediately S of rnwy. Area S of rnwy soft, muddy. (6-8)
**SANTA YNEZ ARPT: Rnwy 8-26 remain 2000', but has dirt overruns of 1000' W end and 400' E end. (6-8)
STOCKTON FLD: Intensive helicopter trng conducted in vcnty of fld btwn 0800-1700 daily xcpt Sat and Sun. Acft utilizing Stockton rdo rng for simulated rng apchs - exercise extreme caution. Minimum altitude for low apchs is 528' MSL. (8-3) Caution - const - men and equip. on fld daylight hrs. Rnwy 11L-29R clsd. Rnwy 11R-29L avail. daylgt hrs to lgt acft only. Lgtg avail. rnwy 16-34 only. Taxiway "A" clsd. (5-31)
SUSANVILLE ARPT: Clsd to all operns until about July 10. SW 1200' NE/SW rnwy and S 1500' N/S rnwy usable in emerg. (6-10)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)
THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.
UKIAH ARPT: Use surfaced rnwy 34-16 only. Dirt strip closed for winter. (10-26)
VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'.
WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.
YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200'; lgts, BL4; fuel, F2.
COLORADO: CHEYENNE WELLS ARPT: Closed for winter due dust. Land at own risk. (10-29)
COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)
★DENVER-STAPLETON FLD-TOWER: May 8, VHF/DF flight-checked and cmsnd. Freq coverage: 118.1, 118.3, 119.3, 119.5, 120.5, 120.9, 121.5, 122.1, 126.18, 135.9, 137.88 mc. Commun unreliable at 40 mi below 14000'MSL 154° to 180° and below 16,000'MSL 181° thru 243°. VHF/DF bearings reliable in these areas. (5-8) FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Durg hrs of darkness flashing amber lgt in segmented circle denotes rgt hand tfc. 2-way rdo rqrd. (9-12) 200' open ditch N side W end rnwy 8R-26L - flag mrkd day hrs, flashing red night hours. (3-26)
HUGO-RADIO: About July 1, VOR will be cmsnd. Freq: 108.2 mc. Ident: HGO. Lctd: lat 38-52-22, long. 103-24-12. Elev: 4932'. Class: VORW. (5-7)
PARSHALL-SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)
PUEBLO-SPECIAL NOTICE: Controlled Firing(demolition) Area for use of the Pueblo Ordnance Depot established within the following described area: bounded on N by lat 38-22-00; E, long. 104-21-22; S, lat 38-18-00; W, long. 104-22-50. (4-30)
CONNECTICUT: **HARTFORD-BRAINARD FLD: Rnwy 9-27 clsd. Only NE and extreme SW ends of dike lgtd. (4-15)
SIMSBURY ARPT: Experimental dropping of parachutes on fld durg VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.
★WILTON-RADIO: Opers. trans 122.2 mc & rcvr 122.1 mc. (6-3)(This corrects Airguide Vol 12 - No. 6) VOR has minor bends in SW quad out to 17 n mi. DME coverage 270°-285°, 35 n mi at 3000'; 230°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'
DELAWARE: GEORGETOWN-SUSSEX CO. ARPT: Caution-NNE/SSW and NNW/SSE rnwys rough. Men and equip. on fld. Extensive glider activity weekends and evenings. Rnwy 16-34 W of intsxn rnwy 22 and N taxiway clsd. Rnwy r S of intsxn with rnwy 10-28 clsd.
NEW CASTLE-PIASECKI ARPT: Sod strips clsd-rough. Use rnwy and taxi strip only. (5-22)
WILMINGTON-NEW CASTLE COUNTY ARPT: Due to lmtd visibility, twr unable to ctl surface tfc on parking ramps. (6-9)
DIST. OF COLUMBIA: WASHINGTON - SPECIAL NOTICES: (1) See page 30 for Washington, D. C. High Density Air Traffic Zone. (2) Caution - dynamiting daily, heavy charges, dam const along E bank of Potomac River, 3/4 mi N of Chain Bridge at Dalecaria, Md. (3) See also Quantico, Virginia, MCAS Special Notice.

DIST. OF COLUMBIA: WASHINGTON-RADIO-SPECIAL NOTICE: Effect. June 1, until approx Sept 1, all inbound acft to Washington National Arpt make initial contact with Washington Approach Control regardless of weather as follows: from a westerly direction on 118.3 mc in the general areas: Herndon, Plains, Remington, Quantico; from an easterly direction on 126.5 mc in the general areas: Beltsville, Shadyside, Andrews, Charlotte Hall.(4-25)

WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3° to 3.5° S.

WASHINGTON NATIONAL ARPT-AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip. acft on 353.9 mc, 318.2 mc and 362.3 mc only in Washington Metropolitan Area. Soon, freq 323.2 mc will be cmsnd.

WASHINGTON NATIONAL ARPT: USAF, NAVY, CG: Clsd to all acft xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Navy and CG logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., CG and will be flown VFR conditions only.) NO acft over 120,000 lbs without prior approval arpt director. CG and Navy acft taxi to MATS term N of admin bldg. Lmtd parking and taxiing W of taxiway #6. Taxiing E of taxiway #6 will be at discretion of ctl twr only. Slopeline apch lgtg system serving rnwy 36 decmsnd. National standard centerline apch lgtg system, configuration "A", 3000' long serving rnwy 36 cmsnd. Until approx end of Dec, hvy const equip. will be operg 0730-1800, Mon-Sat adj to a rnwy and/or taxiway. Open ditches 1-1/2' wide, 3' deep will be adj to pavement. Ditching will be of varying length and location, and will be properly flagged and obstn lgtd. At twr discretion, rnwys and taxiways may be clsd as required to accomplish work adj to paved area. (6-10)

FLORIDA: ARCADIA ARPT: Arpt not mowed. Grass 24" high. Caution advised. (4-25)

BARTOW AIR BASE: AF primary Contract School clsd Sat., Sun., holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Prior approval 1730 to 0700 must be obtained before 1500 on arrival day.

BUNNELL ARPT: Caution - small bushes and trees about 10' high at each end of each rnwy Rnwy 10-28 clsd - indications of drag races. (4-29)

Richmond VOR Int to Arcola VOR Int authorized via GLS 278° radial MEA 2000'; (4) V198 Seguin VOR Int to Ela fix authorized via SAT 080° and HOU 262° radials. MEA 5000'. (5) Route Dacus VOR Int to Courtney Int not usable.. Temp route Keenan VOR Int. to V15 authorized via LFK 213° radial. MEA 5000'. (6) Courtney and Cypress VOR Ints not usable. Following fixes temp redesignated: Dacus VOR Int HOU 330° and CLL 085° radials; Gulf Coast VOR Int HOU 345° radial and 125° mag bear. to MNU Rbn; Fairbanks VOR Int HOU 315° radial and NE course RIC LFR; Richmond VOR Int GLS 278° and HOU 247° radials. No change in MRA's except Richmond VOR Int. which is 2000'. (4-18)

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat. on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, durg darkness. Single point JP-4 plus gas turbine compressor starting equip. avail.

★FORT STOCKTON-RADIO: May 9, VOR cmsnd. Freq: 112.8 mc. Ident: FST. Lctd at lat 30-57-20, long. 102-58-33. Monitoring category (1). (5-9) June 1, Class changed to BVOR. Controlled from Wink ATCS. (6-1)

FORT WORTH-CARTER FLD-TOWER: Effect. July 1, Apch Ctl call will be changed to: Fort Worth Apch Ctl. (5-29) FLD: Const on a 2050' rnwy extension on SE end of rnwy 13-31. Hvy equip. and men will be in the area approx 90 days. 500' SE end of rnwy 13-31 will be clsd periodically durg daylgt hrs when men and hazards will be properly mrkd. 274' (824' MSL) lgtd twr being erected 8 n mi SSE (169°T) at lat 32-41-42, long. 97-01-15.

FORT WORTH-MEACHAM FLD-TOWER: June 3, ILS lclzr and glide slope shut down until approx Aug 5. (6-3)

GAINESVILLE MUN ARPT: 315' (1233' MSL) lgtd twr being erected 8.9 n mi NE (47°T) at lat 33-45-05, long. 97-04-02. (5-13)

GREENVILLE-NAJORS ARPT: Rnwys 17R and 35L clsd due to const. Men and equip. working durg daylgt hrs. Other rnwys will be clsd intermittently until further notice. Non-rdo-equipped acft use extreme caution and abide by ctl twr lgt signals. Ngt lndgs not advisable. (5-10)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clas all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-25)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney, Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial.

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80' (AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron replaced by lgtd wind sock - lctd at former tetrahedron lctn. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for take-offs to E only; no lndgs. (3-11)

HUECO MOUNTAIN RADIO: About June 17, MHW will be cmsnd. Freq: 317 kc. Ident: HCO. Lctd at lat 31-49-06, long. 105-59-42. (6-5)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement.

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4)

LUBBOCK ARPT-TOWER: Mar 4, ILS glide slope shut down until approx Sept. 1. (2-25) FLD: N 1000' rnwy 17-35 clsd to all acft until about Sept. 1, for major const and ext of rnwy. Rnwy 17 threshold lgts moved 1000' S. Men and hvy equip. working durg daylgt hrs in the apch zone of rnwy 17. Rnwy 17-35 clsd to Convair and larger acft durg const period xcpt durg IFR wea conditions or with N or S winds of 20 knots or more. (3-14)

LUFKIN-RADIO: DME coverage: 017°, 2400' MSL 34 n mi; 032°, 2400' MSL 35 n mi; 090°, 2000' MSL 20 n mi; 170°, 1600' MSL 40 n mi; 190°, 1600' MSL 40 n mi; 310°, 2500' MSL 25 n mi. (5-8)

MARFA-RADIO: Auto. rebroadcast feature cmsnd. Rcvg: 122.1, 126.7, 135.9, 255.4 mc.

MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW. (7-18)

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races beind conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

McALLEN-MILLER INTNL ARPT: Rnwy 18 clsd for take-offs and lndgs. (11-26)

McKINNEY-SPECIAL NOTICE: 166' lgtd temp drilling derrick erected 3.5 n mi NW. (7-18)

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300' MSL.

NEWMAN-RADIO: About June 17, MHW will be decmsnd and relctd at Hueco Mountain.

TEXAS: **NIXON ARPT: New arpt: Type "L";29-16N, 97-44W;lctd 1.4 mi E;elev 380'; 2 rnwys; longest rnwy & facs 26; remarks -soft-wet. (9-20)

(5-3)

OTHELLO ARPT: Caution - unlgtd power line approx 50' high E end - unmrkd.

PACKWOOD ARPT: Closed - due snow. (12-7)

**PULLMAN-MOSCOW REGIONAL ARPT: Formerly carried as PULLMAN-Moscow. (4-15) Rnwy lgts avail. on request. W taxiway clsd. Use rnwy to taxi for E take-off. Take-off may be made from rnwy at center taxiway intsxn at pilot's discretion. (12-20)

RENTON ARPT: Until about Mar 15, 1958, const in progress - use rnwys and taxiways only. (3-11)

RIMROCK-TIETON ARPT: Closed - due snow. (12-7)

SEATTLE-BOEING FLD: 2-way rdo required xcpt on prior request. Lgt gun signals issued on final apch. All daylgt VFR operns of single-eng acft confined to rnwy 12-30 (short rnwy) E of rnwy 13-31. Tfc pat E of arpt at 1000'. If equipped with retractable lndg gear drop gear prior to entering tfc pat. Avoid flying over rnwy 13-31 & approaches thereto. All turns when taxiing off rnwy 12-30 made toward the term (E). Multi-eng and jet acft use rnwy 13-31. Multi-eng acft tfc pat W of the arpt 1500'. Jet acft tfc pat W of the arpt 2500'. Due to non-visibility twr unable to ctl tfc on parking apron #4 and W of blast fence in front of Boeing Flgt Ctr. W taxiway clsd to tfc until further notice. (3-15)

SEATTLE-TACOMA INTNL ARPT - SPECIAL NOTICE: Green River instructor practice area for lgt acft lctd approx 3 mi SE. Practice acft flying at 800' and below. Other tfc cross this area at 1500' MSL min. (5-22)

SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. (3-15) ASR unreliable at MEA beyond 15 mi except V2, V2S, V4, V4S & G2 are unreliable MEA beyond 27 mi. (5-9) FLD: Taxiway btwn rnwy 29 and rnwy 34 clsd. Rnwy 11-29 clsd. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z and 2100Z daily - actual release time will be broadcast by Seattle Rdo. (8-14) Hi-intensity apch lgt sys S end rnwy 16-34. First row lgts at N end of sys perm. discontd. Second and third row lgts at N end reestablished. First row lgts now 300' S of rnwy 34. (11-1)

SKYKOMISH ARPT: Closed - due snow. (12-7)

WASHINGTON: SPOKANE-RADIO: DME & VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. & mrkd area S of rnwy. Equip on fld.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'. March 28, ILS lclzr and glide slope shut down for an indefinite period - relctn & rnwy extension. (3-29) FLD: 40' high crash barriers temp lctd 150' off end rnwy 16. Rnwys 3-21 & 7-25 clsd for const until about June 22. (3-20)

TACOMA-BARRY'S SKYHARBOR ARPT: Closed. (6-14)

TOLEDO-WINLOCK ARPT: Acft restricted to rnwys and taxiways due farming unsurfaced area on permanent basis. (2-14)

TROUT LAKE-HOLLENBECK AIR STRIP: New arpt reported: 46-00-30N, 122-32-00W; elev 1820'; 1 rnwy (E/W) 1700' x 70'; remarks - trees E. (6-5)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.

YAKIMA ARPT: Const in progress on W end rnwy 9-27. First 350' rnwy 9 clsd during daylgt hrs. Area mrkd by crosses and flags by day. (1-18) Men and equip. working along rnwy 9-27. Open ditches along rnwy 9-27. (5-1)

WEST VIRGINIA: BLUEFIELD-MERCER CO. ARPT: Caution - const of new taxi strip and parking area. (5-6)

CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000';270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)

CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis. (10-29) FLD: Acft fuel and serv avail. 0600-2400E daily. Other hrs by prior arrangement. (2-19)

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800';220°-35°, 43 n mi at 5000'. (7-1) About July 22, VOR will be shut down until approx Aug 9- modification. (6-7)

ELKINS MUN ARPT: Rnwy lgts 4-22 inop. (5-3)

GLENDALE ARPT: Ditch under construction across N/S rnwy 700' N of S boundary. Will be mrkd by flags. Rnwy length reduced to 2200' until further advised. (12-13)

GLEN DALE ARPT: Two 601'(1250'MSL) unlgtd stacks being erected 6.5 n mi SSW(209°T) at lat 39-50-47, long. 80-19-14. (4-9)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Rnwy 17-35 clsd 0700-1900E daily xcpt Sun. Rnwy 8-26 duty rnwy. Men and equip. on rnwy 17-35. Factory bldg 1000' E side S end rnwy 35 const completed and obstn lgtd. (4-15)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-STEWART ARPT: 600'(1227'MSL) unlgtd control chimney being erected 25 n mi SSW(211°T) at lat 38-56-15, long. 81-49-30 & being completed about July. (4-9)

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.

WISCONSIN: FOND DU LAC ARPT: Caution - use center of rnwys - due soft rnwys and shoulders during winter and early spring. Snow will be rolled on the center of rnwys. (12-21)

GREEN BAY-AUSTIN-STRAUBEL ARPT: VOR ground rcvr check point unusable. (5-29)

LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn. (11-3)

LODI-LAKELAND ARPT: New arpt reported: Lat 43-19-40, long 89-30-55; lctd 0.5 mi NE of Lodi; 1 strip - (E/W)2640' x 200'; 87 oct gas; remarks - unattended. (1-14)

MADISON-TRUAX FLD: Caution crossing hwy landing runways 22, 26, 31. E taxiway North of Administration Building permanently closed to all aircraft over 10,000 lbs. Sod unsafe. (10-17)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) About June 21, LOM freq will be changed to 385 kc. (6-6) VHF/DF coverage 3500' MSL at 40 mi all azimuths. (6-7) FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd-itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusing rnwy 1 with parallel taxiway to left. (8-15)

WISCONSIN: OSHKOSH-WINNEBAGO CO. ARPT: Caution - bldg const on fld - use rnwys only. Use only N/S and E/W rnwys during winter months. (2-21)

**RIPON-GERRIE ARPT: Reverted to farm land. (6-7)

**THREE LAKES ARPT: Correct elev is 1637'. (4-8)

WOODRUFF-ARBOR VITAE-RADIO: H fac operg on request basis. (12-28)

WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather if VFR. (12-28)

WYOMING: CAMP GUERNSEY-SPECIAL NOTICE: Effect. June 14 and 15, Temp Controlled Firing Area will be established within following described area: beginning at lat 42-16-00, long. 104-45-00, thence to lat 42-16-00, long. 104-42-00; to lat 42-12-00, long. 104-42-00; to lat 42-12-00, long. 104-45-00, to point of beginning. Designated alt: surface to 6000' MSL. Activities conducted: 155 mm Howitzer firing demonstration. Time of use: 1000-1700. Controlling agency: Adjutant General, Wyoming; National Guard, Cheyenne, Wyo.

CASPER-AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. Effective June 9 thru July 20, twr hrs opern will be 0500-2300, daily. (6-4) FLD: Two 200' fences SW end of ramp not obstn lgtd. (11-16)

CRAZYWOMAN-RADIO: VOR shut down until approx June 10. During this period, the following arwys will be unusable: V19 and V19E Sheridan to Casper. V247 Craxywoman to Douglas. (5-13)

GILLETTE ARPT: 50' - 75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.

WYOMING: LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

**RIVERTON ARPT: 2 rnwys avail - (10-28) 6200' hard surface, (N/S) 3200' sod; storage, minor acft and eng repairs avail; unicom. (4-8)'

ROCK RIVER-RADIO: May 14, VOR/DME shut down until approx June 10. During this period the following will be unusable: V118 LAR-RKR; V138 and 138N RKR-CYS; V196 RKR-Wheatland Int; V85 and 85W RKR-CPR; V6 CKW-SNY; V6N RKR-CKW. The following Ints will be unusable: Bear Creek and Albion. (5-14)

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM & LFR.

ROCK SPRINGS ARPT: Caution - first 500' NW end rnwy 12-30 clsd - marked. (3-21)

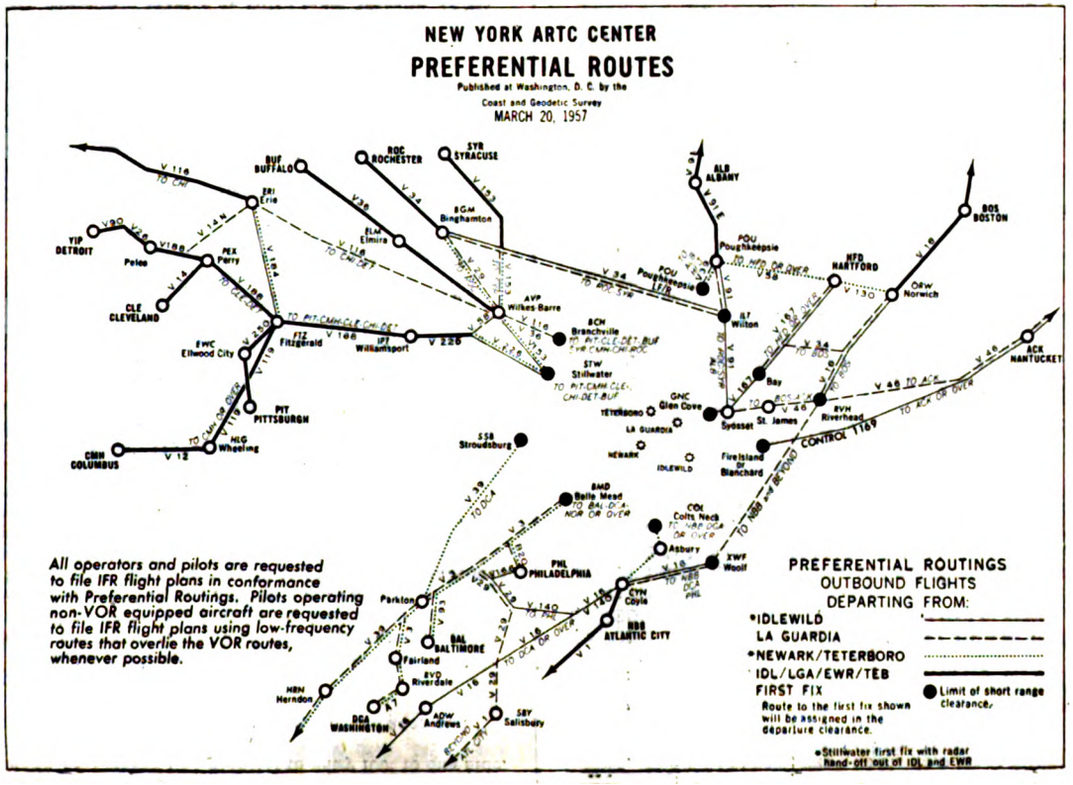
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' available.

TORRINGTON ARPT: Oil well storage tanks lctd on S edge E/W rnwy 300' from W end. Oil well pumping unit lctd on E side NE/SW rnwy 300' from SW end of rnwy. Low flying dusting and spraying type acft operg from arpt thru Sept 30. (4-11)

PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equipment on hangar ramp. (4-12)

SAN JUAN-PUERTO RICO INTNL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from tower - caution. (6-7) Lighted temp steel twr, 110' MSL, lctd approx 3500' off N boundary rnwy 7-25. (5-20)



REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• • Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RADAR AVAILABLE : How and Where

(25 June 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible
Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control Centers (RAPCON), page 4.

RADAR WEATHER ADVISORY SERVICE: See page 4.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____) IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.
   (a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.
   (b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
   "(aircraft identification) THIS IS (name of radar site), (instructions)"
   The instructions will normally consist of one of the following:
   (a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)
   (b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).
   (c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).
   (d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).
   (e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
   (a) radio contact with the director is lost.
   (b) notified by the radar director that radar contact has been lost.
   (c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

DIRECTORY OF AIRPORTS – LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.

2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.

3. When city and airport names are identical, the airport name is omitted to conserve space.

4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

U: Unicom (Aero Advisory Station transmitting and receiving on 122.8 mc). Operates during airport hours only.

FUEL OCTANE

F1: 80 oct., at least
F2: 80/87 oct., and lower
F3: 91/96 oct., and lower
F4: 100/130 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..--.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

(25 June 57)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 96. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

(25 June 57)

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

WASHINGTON, D. C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Maximum speed within the zone is 180 mph or 160 knots indicated airspeed unless operational limitations for a particular aircraft require greater airspeeds, in which case the aircraft shall not be flown in excess of the minimum speed consistent with the safe operational limitations of the aircraft.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

NEWARK CEILING-VISIBILITY EVALUATION PROGRAM: This program, being conducted at Newark Airport by the U.S. Weather Bureau, changed from furnishing threshold contact height estimates to APPROACH LIGHT CONTACT HEIGHT estimates on May 1, 1957. These estimates will be given out only by the CAA local controller on 118.3 mc at the time each pilot reaches the outer marker inbound for a straight-in ILS approach to rnwy 4. Evaluation of the accuracy and usefulness of these estimates is based solely on the report given by the pilot. Therefore it is important for the report "APPROACH LIGHTS" to be given on 118.3 mc the instant the approach lights are sighted. All pilots are urged to visit the project building adjacent to the control tower or telephone the project personnel at MItchell 2-4414 and give their opinion as to whether the approach light contact heights are of more value than the threshold contact lights.

AIRMAN'S GUIDE PRICE CHANGE: Effective July 1, the annual subscription to the Airman's Guide is being reduced to $2.25 domestic ($3.25 foreign). The Flight Information Manual, which was formerly included in the subscription price to the Guide, is NOT included in the new price. However, all subscribers to the Guide will receive written notice from the Superintendent of Documents when the Manual is issued, giving the price and how it may be purchased. The Manual cost is expected to be approximately $0.50, so that the overall cost of Guide and Manual will remain about the same. The separation of the Guide and Manual is for bookkeeping purposes only; the Guide will continue to supplement the Manual as in the past.

(25 June 57)

✓MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective August 1, 1957:

Section 610.14 Green Civil Airway 4 is amended to read in part:

FROM	TO	MEA
Columbus,Ohio LFR	Zanesville,Ohio LF/RBN	2400

✓RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

✓LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

CLB	Carolina Beach, N. C. Radiobeacon (assignment)
CVS	Clovis, N. Mex., Cannon AFB (name change)
CWA	Conway Springs, Kansas, Intersection (name change)
LNI	Lonely, Alaska (change from LNL)
LNL	Land O'Lakes, Wis., Kings Gateway Arpt (assignment)
OKM	Okmulgee, Okla., Okmulgee Arpt (assignment)
BU	Bagotville, Que. (RCAF on-field beacon) (assignment)
EL	Pelly Lake, N. W. T. (name change)
UD	Cutthroat, Nfld. (assignment)

ON REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective as indicated:

DESIGNATED: Effective immediately

(1) CRESCENT LAKE, FLA. (VHF) INTSXN - the intsxn of the 311° T radial of the Daytona, Fla. VOR & the 354° T radial of the Orlando, Fla. VOR.

DESIGNATED: Effective July 4, 1957

(1) DIXIE (LF) INTSXN - Located at lat 36-07-00N, long. 124-51-00W.

(2) WAUNA, ORE. (LF) INTSXN - the intsxn of the 052°T bearing to Toledo, Wash. LFR and the 132°T bearing to the Portland, Ore. LFR.

DESIGNATED: Effective August 1, 1957

(1) ABBEVILLE, MISS. (VHF) INTSXN - the intsxn of the 145°T radial of the Memphis, Tenn. VOR and the 027°T radial of the Greenwood, Miss. VOR.

(2) ARDMORE, PA. (VHF) INTSXN - the intsxn of the 173°T radial of the Allentown, Pa., VOR and the 074°T radial of the West Chester, Pa. VOR.

(3) ARKADELPHIA, ARK. (VHF) INTSXN - the intsxn of the 347°T radial of the El Dorado, Ark. VOR and the 053°T radial of the Texarkana, Ark. VOR.

(4) BILLOW, ARK. (VHF) INTSXN - the intsxn of the 322°T radial of the Memphis, Tenn. VOR and the 230°T radial of the Dyersburg, Tenn. VOR.

(5) CLARK, CALIF. (VHF) INTSXN - the intsxn of the 311°T radial of the Needles, Calif. VOR and the 227°T radial of the Las Vegas, Nevada VOR.

(6) CLIFTON, TENN. (VHF) INTSXN - the intsxn of the 104°T radial of the Jack's Creek, Tenn. VOR and the 234°T radial of the Graham, Tenn. VOR.

(7) COBURN, PA. (VHF) INTSXN - the intsxn of the 227°T radial of the Williamsport, Pa. VOR and the 098°T radial of the Philipsburg, Pa. VOR.

(8) COLDWATER, MISS. (VHF) INTSXN - the intsxn of the 160°T radial of the Memphis, Tenn. VOR and the 102°T radial bearing from the Bruins, Ark. Rbn.

(9) DAWES STATION, CALIF. (VHF) INTSXN - the intsxn of the 078°T radial of the Daggett, Calif. VOR and the 289°T radial of the Needles, Calif. VOR.

(10) DUXBURY, CALIF. (VHF) INTSXN - the intsxn of the 163°T radial of the Point Reyes, Calif. VOR and the 304°T radial of the Agnew, Calif. VOR.

(11) EASTWOOD, TEXAS (VHF) INTSXN - the intsxn of the 168°T radial of the San Antonio, Texas VOR and the 091°T bearing from Kelly, Texas LFR.

(12) EDDY, TEXAS (VHF) INTSXN - the intsxn of the 181°T radial of the Waco, Texas VOR and the 249°T bearing to Gray, Texas Rbn.

(13) EDMONDSON, ARK. (LF & VHF) INTSXN - the intsxn of the W crs of the Memphis, Tenn. ILS lclzr and the 001°T bearing from the Bruins, Ark. Rbn.

(14) EUDORA, MISS. (VHF) INTSXN - the intsxn of the 224°T radial of the Memphis, Tenn. VOR and the 111°T bearing from the Bruins, Ark. Rbn.

(15) GAINESVILLE, TENN. RBN.

(16) GILMORE, ARK. (VHF) INTSXN - the intsxn of the 322°T radial of the Memphis, Tenn VOR and the 195°T radial of the Malden, Mo. VOR.

(17) GROVER, COLO. (VHF) INTSXN - the intsxn of the 006°T radial of the Kiowa, Colo. VOR and the 131°T radial of the Cheyenne, Wyo. VOR.

(18) JERICHO, ARK. (VHF) INTSXN - the intsxn of the 322°T radial of the Memphis, Tenn VOR and the 225°T radial of the Dyersburg, Tenn. VOR.

(19) JOINER, ARK. (VHF) INTSXN - the intsxn of the 345°T radial of the Memphis, Tenn. VOR and the 230°T radial of the Dyersburg, Tenn. VOR.

(20) MESQUITE, TEXAS (VHF) INTSXN - the intsxn of the 135°T radial of the Dallas, Texas VOR and the 056°T radial of the Britton, Tex. VOR.

(21) MISSION, TEXAS (VHF) INTSXN - the intsxn of the 042°T radial of the San Antonio, Texas VOR and the 353°T bearing from the La Vernia, Texas Rbn.

(22) MONMOUTH, N. J. (VHF) INTSXN - the intsxn of the 098°T radial of the Yardley, Pa. VOR and the 031°T radial of the Coyle, N. J. VOR.

(23) MT. PLEASANT, MISS. (VHF) INTSXN - the intsxn of the 099°T radial of the Memphis Tenn. VOR and the 150°T bearing from the Navy Memphis, Tenn. LFR.

(24) NAVY MEMPHIS, TENN. LFR.

(25) NEWARK, TEXAS (VHF) INTSXN - the intsxn of the 137°T radial of the Ft. Worth, Texas VOR and the 060°T radial of the Mineral Wells, VOR.

(26) PERRY, TEXAS (VHF) INTSXN - the intsxn of the 130°T radial of the Waco, Texas VOR and the 036°T bearing from the Prairie Hill, Texas Rbn.

(27) RANDOLPH, TENN. (VHF) INTSXN - the intsxn of the 360°T radial of the Memphis, Tenn. VOR and the 215°T radial of the Dyersburg, Tenn. VOR.

(28) SABINAL, TEXAS (VHF) INTSXN - the intsxn of the 344°T radial of the Cotulla, Tex. VOR and the 271°T bearing from Somerset, Texas Rbn.

(29) SATTLER, TEXAS (VHF) INTSXN - the intsxn of the 057°T radial of the San Antonio, Texas VOR and the 353°T bearing from the La Vernia, Texas Rbn.

(30) SHERIDAN, ARK. (VHF) INTSXN - the intsxn of the 197°T radial of the Little Rock, Ark. VOR and the 275°T radial of the Pine Bluff, Ark. VOR.

(31) SPARKMAN, ARK. (VHF) INTSXN - the intsxn of the 347°T radial of the El Dorado, Ark. VOR and the 067°T radial of the Texarkana, Ark. VOR.

(32) TOOELE, UTAH (VHF) INTSXN - the intsxn of the 194°T radial of the Ogden, Utah, VOR and the 315°T radial of the Utah Lake, Utah VOR.

(33) UNION PASS, ARIZ. (VHF) INTSXN - the intsxn of the 078°T radial of the Daggett, Calif. VOR and the 004°T radial of the Needles, Calif. VOR.

(34) VALLEY FORGE, PA. (VHF) INTSXN - the intsxn of the 143°T radial of the Pottstown, Pa. VOR and the 047°T radial of the West Chester, Pa. VOR.

(35) WACO, N. C. (VHF) INTSXN - the intsxn of the 329°T radial of the Charlotte, N. C. VOR and the 059°T radial of the Spartanburg, S. C. VOR.

(36) WARSAW, NEW YORK (VHF) INTSXN - the intsxn of the 124°T radial of the Buffalo, N. Y. VOR and the 223°T radial of the Rochester, N. Y. VOR.

(37) WATER VALLEY, TENN. (VHF) INTSXN - the intsxn of the 071°T radial of the Graham Tenn. VOR and the 338°T radial of the Huntsville, Ala. VOR.

(38) WELLAND, ONTARIO (VHF) INTSXN - the intsxn of the 274°T radial of the Buffalo, N. Y. VOR and the 162°T radial of the Toronto, Ontario VOR.

(39) WHITNEY, TEXAS (VHF) INTSXN - the intsxn of the 353°T radial of the Waco, Texas VOR and the 215°T radial of the Britton, Texas VOR.

REDESIGNATED: Effective July 1, 1957

(1) JESSEY, MASS. (VHF) INTSXN - the intsxn of the 252°T radial of the Nantucket, Mass. VOR and the 007°T bearing toward Martha's Vineyard, Mass. Rbn.

REDESIGNATED: Effective July 4, 1957

(1) AMES, IOWA (VHF) INTSXN - the intsxn of the 136°T radial of the Ft. Dodge, Iowa VOR and the 008°T radial of the Des Moines, Iowa, VOR.

(2) ELK, S. DAK. (VHF) INTSXN - the intsxn of the 251°T radial of the Rapid City, S. Dak. VOR and the 338°T radial of the Chadron, Nebr. VOR.

(3) FAIRBURN, S. DAK. (VHF) INTSXN - the intsxn of the 189°T radial of the Rapid City, S. Dak. VOR and the 250°T radial of the Philip, S. Dak. VOR.

(4) KEYSTONE, S. DAK. (VHF) INTSXN - the intsxn of the 251°T radial of the Rapid City, S. Dak. VOR and the 360°T radial of the Chadron, Nebr. VOR.

(5) LORETTO, MINN. (VHF) INTSXN - the intsxn of the 242° T radial of the Minneapolis, Minn. VOR and the NW course of the Minneapolis, Minn. ILS localizer.

(6) MARSHALL, MO. (VHF) INTSXN - the intsxn of the 276°T radial of the Columbia, Mo. VOR and the 231°T radial of the Macon, Mo. VOR.

(7) SEMINOLE, FLA. (VHF) INTSXN - the intsxn of the 138°T radial of the La Belle, Fla. VOR and the 092°T radial of the Ft. Myers, Fla. VOR.

(8) TUTTLE, KANSAS (VHF) INTSXN - the intsxn of the 084°T radial of the Lamar, Colo. VOR and the 295°T radial of the Garden City, Kansas VOR.

(9) WASHINGTON, ARK. (VHF) INTSXN - the intsxn of the 052°T radial of the Texarkana, Ark. VOR and the 307°T radial of the El Dorado, Ark. VOR.

REDESIGNATED: Effective August 1, 1957

(1) ANTELOPE, TEXAS (VHF) INTSXN - the intsxn of the092°T radial of the El Paso, Tex. VOR and the 115°T radial of the Newman, Texas VOR.

(2) AUBURN, N. H. (VHF) INTSXN - the intsxn of the 051°T radial of the Gardner, Mass. VOR and the 151°T radial of the Concord, N. H. VOR.

(3) BELLE MEAD, N. J. (VHF) INTSXN - the intsxn of the 293°T radial of the Colts Neck, N. J. VOR and the 047°T radial of the West Chester, Pa. VOR.

(4) BENNETT, COLO. (VHF) INTSXN - the intsxn of the 101°T radial of the Denver, Colo VOR and the 039°T radial of the Kiowa, Colo. VOR and the 238°T radial of the Akron, Colo. VOR.

(5) BULL HEAD, ILL. (VHF) INTSXN - the intsxn of the 109°T radial of the Northbrook, Ill VOR and the 358°T radial of the Chicago Heights, Ill. VOR.

(6) CADOTT, WIS. (VHF) INTSXN - the intsxn of the 010°T radial of the Nodine, Wis. VOR and the 092°T radial of the Eau Claire, Wis. VOR.

(7) CLIVE, IOWA (VHF) INTSXN - the intsxn of the 338°T radial of the Des Moines, Iowa, VOR and the NW crs of the Des Moines, Iowa ILS lclzr.

(8) CREOLE, LA. (VHF) INTSXN - the intsxn of the SE crs of the Baton Rouge, La. ILS lclzr and the 092°T radial of the Baton Rouge, La. VOR.

(9) DALEVILLE, VA. (VHF) INTSXN - the intsxn of the 057°T radial of the Pulaski, Va. VOR and the 357°T radial of the Roanoke, Va. VOR.

(10) DU PAGE, ILL. (VHF) INTSXN - the intsxn of the 238°T radial of the Northbrook, Ill. VOR and the 317°T radial of the Naperville, Ill. VOR.

(11) DUNDEE, ILL. (VHF) INTSXN - the intsxn of the 238°T radial of the Northbrook, Ill. VOR and the 340°T radial of the Naperville, Ill. VOR.

(12) ELGIN, ILL. (VHF) INTSXN - the intsxn of the 273°T radial of the Northbrook, Ill. VOR and the 340°T radial of the Naperville, Ill. VOR.

(13) INGLESIDE, MD. (VHF) INTSXN - the intsxn of the 244°T radial of the Kenton, Del. VOR and the 100°T radial of the Baltimore, Md. VOR.

(14) JOSHUA, TEXAS (VHF) INTSXN - the intsxn of the 264°T radial of the Britton, Texas VOR and the S crs of the Ft. Worth (Meacham) Texas ILS lclzr.

(15) LAKE WORTH, TEXAS (VHF) INTSXN - the intsxn of the 081°T radial of the Mineral Wells, Tex. VOR and the 157°T radial of the Ft. Worth, Tex. VOR.

(16) MT. HOLLY, N. C. (VHF) INTSXN - the intsxn of the 005°T radial of the Charlotte, N. C. VOR and the 091°T radial of the Asheville, N. C. VOR.

(17) NEPTUNE, MICH. (VHF) INTSXN - the intsxn of the 109°T radial of the Northbrook,

Ill. VOR and the 256°T radial of the Keeler, Mich, VOR.

(18) OCALA, FLA. (VHF) INTSXN - the intsxn of the 125°T radial of the Cross City, Fla. VOR and the 169°T radial of the Gainesville, Fla. VOR.

(19) PAPI, ILL. (VHF) INTSXN - the intsxn of the 078°T radial of the Northbrook, Ill. VOR and the 358°T radial of the Chicago Heights, Ill. VOR.

(20) PLAINFIELD, N. J. (VHF) INTSXN - the intsxn of the 114°T radial of the Stroudsburg Pa. VOR and the SW crs of the Teterboro, N. J. ILS lclzr.

(21) PORT MADISON, WASH. (VHF) INTSXN - the intsxn of the 019°T radial of the Olympia Wash. VOR and the 330°T radial of the Seattle, Wash. VOR.

(22) RINGOES, N. J. (VHF) INTSXN - the intsxn of the 282°T radial of the Colts Neck, N. J. VOR and the 047°T radial of the West Chester, Pa. VOR.

(23) RIOVISTA, TEXAS (VHF) INTSXN - the intsxn of the 225°T radial of the Britton, Tex VOR and the 353°T radial of the Waco, Tex. VOR.

(24) ROSEDALE, WASH. (VHF) INTSXN - the intsxn of the 019°T radial of the Olympia, Wash. VOR and the 247°T radial of the Seattle, Wash. VOR.

(25) SEARCHLIGHT, NEV. (VHF) INTSXN - the intsxn of the 068°T radial of the Daggett, Calif. VOR and the 156°T radial of the Las Vegas, Nev. VOR.

(26) SHABBONA, ILL. (VHF) INTSXN - the intsxn of the 238°T radial of the Northbrook, Ill. VOR and the 269°T radial of the Naperville, Ill. VOR.

(27) SOMERSET, N. J. (VHF) INTSXN - the intsxn of the 227°T radial of the Caldwell, N. J. VOR and the 114°T radial of the Stroudsburg, Pa. VOR.

(28) TULALIP, WASH. (VHF) INTSXN - the intsxn of the 019°T radial of the Olympia, Wash. VOR and the 169°T radial of the Bellingham, Wash. VOR.

(29) WARRINGTON, PA. (VHF) INTSXN - the intsxn of the 083°T radial of the Pottstown, Pa. VOR and the 047°T radial of the West Chester, Pa. VOR.

(30) WEBSTER, FLA. (VHF) INTSXN - the intsxn of the 039°T radial of the Tampa, Fla. VOR and the 349°T radial of the Lakeland, Fla. VOR.

(31) WHITE FISH, ILL. (VHF) INTSXN - the intsxn of the 093°T radial of the Northbrook, Ill. VOR and the 013°T radial of the Chicago Heights, Ill. VOR.

RENAMED: Effective August 1, 1957

(1) KYLE, TEXAS (VHF) INTSXN - the intsxn of the 057°T radial of the San Antonio, Tex. VOR and the 207°T radial of the Austin, Tex. VOR.

CANCELLED: Effective August 1, 1957

(1) AIKEN, S. C. Rbn

(2) CHATHAM, N. J. (VHF) INTSXN - the intsxn of the 097°M radial of the Allentown, Pa. VOR with the Caldwell, N. J. VOR direct radial to the Belle Mead, N. J. Intsxn.

(3) CITY, ARK. (LF) INTSXN - the intsxn of the W crs of the Little Rock, Ark. LFR and the 340°M bearing from the Little Rock, Ark. ILS/LOM.

(4) CLIFTON FORGE, VA. (VHF) INTSXN - the intsxn of the 260°M radial of the Montebello, Va. VOR and the 005°M bearing from the Roanoke, Va. LFR on the Roanoke LFR direct bearing to the Elkins LFR.

(5) CORNUDAS, TEXAS (VHF) INTSXN - the intsxn of the 091°T radial of the Newman, Tex VOR and the 322°T radial of the Hudspeth, Tex. VOR.

(6) HOLLY SPRINGS, MISS. (VHF) INTSXN - the intsxn of the 125°M radial of the Memphis, Tenn. VOR and the 016°M radial of the Greenwood, Miss. VOR.

(7) LANSING, ILL. (LF) INTSXN - the intsxn of the SE crs of the Chicago, Ill. LFR and the W crs of the Goshen, Ind. LFR.

(8) MESQUITE, TEXAS (LF) INTSXN - the intsxn of the 135°T radial of the Dallas, Texas VOR and the E crs of the Dallas, Tex. LFR.

(9) ORANGE, N. J. (LF) INTSXN - the intsxn of the NW crs of the Idlewild, N. Y. LFR and the front crs of the Teterboro, N. J. ILS localizer.

(10) SARDIS, MISS. (LF) INTSXN - the intsxn of the 135°M bearing from the Bruins, Ark. Rbn and the S crs of the Memphis, Tenn. LFR.

(11) SHERMAN, MISS. (LF) INTSXN - the intsxn of the 120°M bearing from the Memphis, Tenn. LFR and the 245°M bearing from the Muscle Shoals, Ala. LFR.

(12) TURRELL, TENN. (VHF) INTSXN - the intsxn of the 310°M radial of the Memphis, Tenn. VOR and the 225°M radial of the Dyersburg, Tenn. and the 190°M radial of the Malden, Mo. VOR.

(13) WAVERLY, ARK. (LF & VHF) INTSXN - the intsxn of the W crs of the Memphis, Tenn ILS localizer and the020°M bearing from the Bruins, Ark. Rbn.

(14) WINGS, PA. (VHF) INTSXN - the intsxn of the 173°T radial of the Allentown, Pa. VOR and the 051°T radial of the West Chester, Pa. VOR.

✓CONTROL AREA EXTENSION AND REPORTING POINTS: Effective July 15, 1957, unless otherwise advised, the following control area extension and reporting points are amended in whole or in part as follows:

CONTROL AREA EXTENSION: (Wilmington, N. C.) is amended to read: "That area within a 5-mile radius circle of the Wilmington, N. C., (Carolina Beach), nondirectional radio beacon including the area bounded on the W by a line tangent to the circumference of this circle extending to the circumference of a circle 15 miles in radius centered at lat 30-24-00, long. 79-05-30 thence to the circumference of a circle 5 miles in radius centered on the West Palm Beach, Fla., radio range station, and bounded on the E by a line tangent to the circumference of the 5-mile radius circle centered on the Wilmington (Carolina Beach) nondirectional radio beacon extending to the circumference of a circle 35 miles in radius centered at lat 30-24-00, long. 79-05-30, thence to the circumference of a circle 5 miles in radius centered on the West Palm Beach, Fla., radio range station, excluding the portion below 2000 ft mean sea level which lies outside of the continental limits of the United States."

OTHER REPORTING POINTS: Amended by changing the following reporting points to read:

(1) Azalea Int: "The intersection of the SE course of the Charleston, S. C. radio range and a line bearing 195°T from the Wilmington (Carolina Beach), N. C. nondirectional radio beacon."

(2) Gateway Int: "The intersection of the E course of the Jacksonville, Fla., radio range and a line bearing 195°T from the Wilmington (Carolina Beach), N. C., nondirectional radio beacon."

(3) Snapper Int: "The intersection of the NE course of the Melbourne, Fla., radio range and a line bearing 14°T from West Palm Beach, Fla., radio range station."

✓CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective August 1, 1957, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Green civil airway No. 4 (Los Angeles, Calif., to Philadelphia, Pa.) is amended by changing portion which reads: "Columbus, Ohio, radio range station; Wheeling, W. Va., nondirectional radio beacon;" to read: "Columbus, Ohio, radio range station; Zanesville, Ohio, nondirectional radio beacon; Wheeling, W. Va., nondirectional radio beacon;"

(2) Amber civil airway No. 8 (Los Angeles, Calif., to Ellensburg, Wash.) is amended by changing the first portion to read: "From the Los Angeles, Calif., radio range station via the intersection of the west course of the Los Angeles, Calif., radio range and the southeast course of the Camarillo, Calif., radio range; Camarillo, Calif., radio range station to the Santa Barbara, Calif., radio range station."

(3) Blue civil airway No. 52 (Paso Robles, Calif., to Fresno, Calif.) is revoked.

(4) VOR civil airway No. 2 (Seattle, Wash., to Boston, Mass.) is amended by changing the portion which reads: "La Crosse, Wis., omnirange station, including a north alternate;" to read: "Nodine, Minn., omnirange station, including a north alternate;" (Note: Changed name of La Crosse VOR to Nodine VOR.)

(5) VOR civil airway No. 3 (Key West, Fla., to Presque Isle, Maine.) is amended by changing the portion which reads: "West Chester, Pa., omnirange station; intersection of the West Chester omnirange 051°T and the Caldwell omnirange 217°T radials; Caldwell, N. J., omnirange station;" to read: "West Chester, Pa., omnirange station; Caldwell, N. J., omnirange station;" (Note: Removed dog-leg from V3 between the West Chester VOR and The Caldwell VOR.)

(6) VOR civil airway No. 8 (Long Beach, Calif., to Washington, D. C.) is amended by changing the portion which reads: "Akron, Colo., omnirange station, including a south alternate via the intersection of the Denver omnirange 101°T and the Akron omnirange 242°T radials;" to read: "Akron, Colo., omnirange station, including a south alternate via the intersection of the Denver omnirange 101°T and the Akron omnirange 238°T radials;" (Note: Minor redesignation of V8S between Denver VOR and Akron VOR.)

(7) VOR civil airway No. 16 (Los Angeles, Calif., to Boston, Mass.) is amended by changing the portion which reads: "Dover, Del., omnirange station via the Dover omnirange 244°T radial;" to read: "Kenton, Del., omnirange station via the Kenton omnirange 244°T radial;" (Note: Changed name of Dover VOR to Kenton VOR.)

(8) VOR civil airway No. 17 (Laredo, Tex., to Goodland, Kans.) is amended by changing the portion which reads: "intersection of the Waco omnirange 352°T and the Fort Worth omnirange 159°T radials;" to read: "point of intersection of the Fort Worth, Tex., (Meacham Field) ILS localizer south course with the Britton, Tex., omnirange 264°T radial;" (Note: Minor redesignation of V17 between Waco VOR and Fort Worth VOR.)

(9) VOR civil airway No. 29 (Salisbury, Md., to United States - Canadian Border.) is amended by changing the portion which reads: "Dover, Del., omnirange station;" to read: "Kenton, Del., omnirange station;" (Note: Changed name of Dover VOR to Kenton VOR.)

(10) VOR civil airway No. 82 (Minneapolis, Minn., to La Crosse, Wis.) is amended by changing the portion which reads: "to the La Crosse, Wis., omnirange station, including a S alternate." to read" "to the Nodine, Minn., omnirange station, including a S alternate." (Note: Changed name of La Crosse VOR to Nodine VOR.)

(11) VOR civil airway No. 84 (Shabbona, Ill., to Buffalo, N. Y.) is amended by changing the portion which reads: "That airspace over United States territory from the point of the Moline, Ill., omnirange)88°T and the Wheeling omnirange 238°T radials via the Wheeling, Ill., omnirange station;" to read: "That airspace over United States territory from the point of intersection of the Moline, Ill., omnirange 088°T and the Northbrook omnirange 238°T radials via the Northbrook, Ill., omnirange station;" (Note: Changed name of Wheeling VOR to Northbrook VOR.)

(12) VOR civil airway No. 97 (Miami, Fla., to Minneapolis, Minn.) is amended by changing the portion which reads: "La Crosse, Wis., omnirange station: intersection of the La Crosse omnirange 311°T radial and the Minneapolis-St. Paul International airport ILS 121°T localizer course;" to read: "Nodine, Minn., omnirange station; intersection of the Nodine omnirange 311°T radial with the Minneapolis-St. Paul International airport ILS localizer 121°T course;" (Note: Changed name of La Crosse VOR to Nodine VOR.)

(13) VOR civil airway No. 100 (North Platte, Nebr., to Detroit, Mich.) is amended by changing the portion which reads: "Wheeling, Ill., omnirange station; intersection of the Wheeling omnirange 093°T and the Keeler omnirange 271°T radials;" to read: "Northbrook, Ill., omnirange station; intersection of the Northbrook omnirange 093°T and the Keeler omnirange 271°T radials;" (Note: Changed name of Wheeling VOR to Northbrook VOR.)

(14) VOR civil airway No. 129 (Rockford, Ill., to Eau Claire, Wis.) is amended by changing the portion which reads: "La Crosse, Wis., omnirange station;" to read: "Nodine, Minn., omnirange station;" and by changing the portion which reads: "the Lone Rock omnirange 162° T radials;" to read: "the Lone Rock omnirange 164°T radials;" (Note: Changed name of La Crosse VOR to Nodine VOR. Changed Lone Rock 162°T radial to 164°T radial to retain three-way intersection at Freeport Intersection.)

(15) VOR civil airway No. 157 (Miami, Fla. to Richmond, Va.) caption changed and a new first portion added to read: "From the Miami, Fla., omnirange station via the La Belle, Fla, omnirange station; Lakeland, Fla., omnirange station; to the Gainesville, Fla., omnirange station." (Note: Added new portion to V157 from Miami VOR to Gainesville VOR.)

(16) VOR civil airway No. 193 (Keeler, Mich., to Traverse City, Mich.) is amended to read: "From the Keeler, Mich., omnirange station via the Pullman, Mich., omnirange station; Grand Rapids, Mich., Kent County Airport, ILS outer marker; White Cloud, Mich., omnirange station; to the Traverse City, Mich., radio range station." (Note: Revoked portion of V193 between Fort Wayne VOR and Keeler VOR and renumbered it V277.)

(17) VOR civil airway No. 228 (Wheeling, Ill., to South Bend, Ind.) is amended to read: "From the Northbrook, Ill., omnirange station to the South Bend, Ind., omnirange station." (Note: Changed name of Wheeling VOR to Northbrook VOR.)

(18) VOR civil airway No. 239 (Wildwood, N. J. to Newark, N. J.) caption changed and new last portion added to read: "From the Philadelphia, Pa., International Airport ILS localizer via the Yardley, Pa., omnirange station; to the Newark, N. J., Airport ILS outer marker." (Note: Added new portion to V239 from Philadelphia ILS localizer to Newark ILS/LOM.)

(19) VOR civil airway No. 256 (Reinhold, Pa., to Yardley, Pa.) is amended to read: "From the point of intersection of the West Chester, Pa., omnirange 314°T and the Allentown, Pa., omnirange 228°T radials via the Pottstown, Pa., omnirange station; to the Yardley, Pa., omnirange station." (Note: Added Yardley VOR to V256)

(20) VOR civil airway No. 273 (Downsville, N. Y. to Syracuse, N. Y.) is amended by changing the portion which reads: "Binghamton, N. Y. omnirange 071°T" to read: "Binghamton, N. Y., omnirange 070°T"

(21) VOR civil airway No. 275 is added to read: "(unassigned)"

(22) VOR civil airway No. 276 (Yardley, Pa., to Monmouth, N. J.) is added to read: "From the Yardley, Pa., omnirange station to the point of intersection of the Yardley omnirange 098°T radial with the Coyle, N. J., omnirange direct radial to the Idlewild, N. Y. omnirange station." (Note: New airway)

(23) VOR civil airway No. 277 (Fort Wayne, Ind., to Keeler, Mich.) is added to read: "From the Fort Wayne, Ind., omnirange station via the Keeler, Mich., omnirange station." (Note: New airway. Portion Fort Wayne VOR to Keeler VOR was formerly a part of V193.)

(24) VOR civil airway No. 1506 (San Francisco, Calif., to Washington, D. C.) is amended by changing the portion which reads: "Wheeling, Ill., omnirange station; intersection of the Wheeling omnirange 093°T and the Keeler omnirange 271°T radials;" to read: "Northbrook, Ill., omnirange station; intersection of the Northbrook omnirange 093°T and the Keeler omnirange 271°T radials;" (Note: Changed name of Wheeling VOR to Northbrook VOR.)

(25) VOR civil airway No. 1508 (Los Angeles, Calif., to New York, N. Y.) is amended by changing the portion which reads: "Wheeling, Ill., omnirange station; intersection of the Wheeling omnirange 093°T and the Keeler omnirange 271°T radials;" to read: "Northbrook, Ill., omnirange station; intersection of the Northbrook omnirange 093°T and the Keeler omnirange 271° T radials;" (Note: Changed name of Wheeling VOR to Northbrook VOR.)

(26) VOR civil airway No. 1512 (Los Angeles, Calif., to New York, N. Y.) is amended by changing the first portion to read: "From the Los Angeles, Calif., omnirange station via the intersection of the Los Angeles omnirange 057°T and the Daggett omnirange 235°T radials; Daggett, Calif., omnirange station; Valle, Ariz., omnirange station; to the Farmington, N. Mex., omnirange station" (Note: Added new portion to V1512 from Daggett VOR to Farmington VOR.)

(27) VOR civil airway No. 1516 (San Francisco, Calif., to Washington, D. C.) is amended by adding a new middle portion to read: "From the Valle, Ariz., omnirange station to the Farmington, N. Mex., omnirange station." (Note: Added new portion to V1516 from Valle VOR to Farmington VOR.)

CONTROL AREAS:

(1) Blue civil airway No. 52 (Paso Robles, Calif., to Fresno, Calif.) is revoked.

(2) VOR civil airway No. 45 (Charleston, W. Va., to Lansing, Mich.) is amended to read: "All of VOR civil airway No. 45."

(3) VOR civil airway No. 57 (Evergreen, Ala., to York, Ky.) is amended to read: "All of VOR civil airway No. 57."

(4) VOR civil airway No. 157 (Miami, Fla., to Richmond, Va.) is amended to read: "All of VOR civil airway No. 157."

(5) VOR civil airway No. 193 (Keeler, Mich., to Traverse City, Mich.) is amended to read: "All of VOR civil airway No. 193."

(6) VOR civil airway No. 239 (Wildwood, N. J. to Newark, N. J.) is amended to read: "All of VOR civil airway No. 239."

(7) VOR civil airway No. 256 (Reinholds, Pa., to Yardley, Pa.) is amended to read: "All of VOR civil airway No. 256."

(8) VOR civil airway No. 275 is added to read: "(unassigned)"

(9) VOR civil airway No. 276 (Yardley, Pa., to Monmouth, N. J.) is added to read: "All of VOR civil airway No. 276."

(10) VOR civil airway No. 277 (Fort Wayne, Ind., to Keeler, Mich.) is added to read: "All of VOR civil airway No. 277."

CONTROL AREA EXTENSIONS:

(1) (Dayton, Ohio) is revoked.

(2) (Columbia, S. C.) is amended by changing the words which read: "on the SW by Red civil airway No. 10" to read: "on the SW by VOR civil airway No. 18" (Note: Due to revocation portion of Red 10 - Augusta, Ga., to Charleston, S. C.)

(3) (La Crosse, Wis.) is amended by changing the name of the facility "La Crosse omnirange station." to read: "Nodine, Minn., omnirange station."

(4) (Rocky Mount, N. C.) is added to read: "Within 5 miles either side of the 083°T radial of the Rocky Mount omnirange extending from the omnirange station to a point 15 miles E."

(5) (Gainesville, Fla.) is added to read: "That airspace within a 15 mile radius of the Gainesville Municipal Airport."

CONTROL ZONES:

(1) Five mile radius zones is amended by deleting the following airport: "Goldsboro, N.C.: Seymour-Johnson AFB."

(2) (Newark, N. J.) is amended to read: "Within a 5 mile radius of Newark Municipal Airport including the area encompassed between tangent line extending from this 5 mile radius zone to but not including the Teterboro, N. J., five mile radius control zone; within 2 miles either side of the Newark ILS localizer front course extending from the localizer to a point 10 miles SW of the ILS outer marker."

(3) (Columbus, Ohio) is amended to read: "Within a 5 mile radius of the Port Columbus Municipal Airport and within a 5 mile radius of the Lockbourne, Ohio Air Force Base including the airspace within 2 miles either side of a direct line extending from the Columbus radio range station to the Lockbourne AFB."

(4) (Dayton, Ohio) is amended by deleting the portion which reads: "and extending 2 miles either side of the 360°T radial of the Dayton omnirange from the omnirange station to a point 10 miles N of the omnirange station."

(5) (Ogden, Utah) is amended to read: "Within a 5 mile radius of Hill Air Force Base, Ogden, Utah, including the airspace within a 5 mile radius of the Ogden Municipal Airport, and within 2 miles either side of the 345°T and 166°T radials of the Ogden omnirange extending to a point 10 miles N of the omnirange station and southward to the Layton, Utah, fan marker."

(6) (La Crosse, Wis.) is amended by changing the name of the facility "La Crosse omnirange" to read: "Nodine, Minn., omnirange."

(7) (Fort Bragg, N. C.) is amended by adding the following sentence to present control zone: "The portion of this control zone which overlaps Restricted area R-115 is excluded."

(8) (Goldsboro, N. C.) is added to read: "Within a 5 mile radius of Seymour-Johnson Air Force Base, Goldsboro, N. C., and within 2 miles either side of a line extending from the Air Force Base to a point 2 miles SW of the AFB nondirectional radio beacon."

(9) (Rocky Mount, N. C.) is added to read: "Within a 5 mile radius of the Rocky Mount Airport and within 2 miles either side of the 263°T and 083°T radials of the Rocky Mount omnirange extending from the five mile radius zone to a point 10 miles E of the omnirange station."

REPORTING POINTS:

(1) Green civil airway No. 4 (Los Angeles, Calif. to Philadelphia, Pa.) is amended by deleting the following reporting point: "the intersection of the E course of the Columbus, Ohio, radio range and the SW course of the Akron, Ohio, radio range;" and by substituting the following in lieu thereof: "Zanesville, Ohio, nondirectional radio beacon;"

(2) Blue civil airway No. 52 (Paso Robles, Calif. to Fresno, Calif.) is revoked.

VOR REPORTING POINTS:

(1) VOR domestic reporting points is amended by adding the following reporting points: (a) Northbrook, Ill., omnirange stn; (b) Valle, Ariz., omnirange stn; (c) Fort Dodge, Iowa, omnirange stn (depict for aircraft operating below 15, 200 ft); (d) Macon, Mo., omnirange stn (depict for aircraft operating below 15, 200 ft); (e) Dubuque, Iowa, omnirange stn; (e) Nodine, Minn., omnirange stn.

(2) VOR domestic reporting points is amended by revoking the following reporting points: (a) Wheeling, Ill., omnirange stn; (b) La Crosse, Wis., omnirange stn.

HOLDING PATTERNS: The following holding patterns are designated, redesignated, cancelled, or revised and shall become effective August 1, 1957:

DESIGNATED - NON-STANDARD:

(1) EL PASO, TEXAS (LFR) INTSXN - direction of holding - E on E crs; direction of turns - left; time - 1 minute; minimum alt 6500'.

(2) EL PASO, TEXAS (VOR) INTSXN - direction of holding - E on 092°T radial; direction of turns - left; time - 1 minute; minimum alt 6500'.

(3) GAINESVILLE, TENN. (RBN) INTSXN - direction of holding - NE on 068°T bearing from Rbn; direction of turns - right; time 1 minute; minimum alt 1500'.

(4) MEMPHIS, TENN. (LFR) INTSXN - direction of holding - S on S crs; direction of turns - right; time - 1 minute; minimum alt 1500'.

(5) RANDOLPH, TENN. (VHF) INTSXN - direction of holding - N of 360°T radial Memphis, Tenn. VOR; direction of turns - left; time - 1 minute; minimum alt 2300'.

DESIGNATED - STANDARD:

(1) EDMONDSON, ARK. (LF & VHF) INTSXN - direction of holding - W on W crs of the Memphis, Tenn. ILS localizer; direction of turns - right; time - 2 minutes; min alt 1300'.

(2) JOINER, ARK. (VHF) INTSXN - direction of holding - N on 345°T radial Memphis, Tenn. VOR; direction of turns - right; time - 2 minutes; minimum alt 2300'.

(3) NEWARK, TEXAS (VHF) INTSXN - direction of holding - NW on 137°T radial of the Ft. Worth, Texas VOR; direction of turns - right; time - 2 minutes; minimum alt 2000'.

REDESIGNATED - NON-STANDARD:

(1) MEMPHIS, TENN. (VOR) INTSXN - direction of holding - E on 114°T radial; direction of turns - right; time - 1 minute; minimum alt 1500'.

(2) NAVY MEMPHIS, TENN. (LFR) INTSXN - direction of holding - NW on NW crs; direction of turns - left; time - 1 minute; minimum alt 1700'.

REDESIGNATED - STANDARD:

(1) DRY RIDGE, KY. (VHF) INTSXN - direction of holding - SW on 054°T radial of the Louisville, Ky. VOR; direction of turns - right; time - 2 minutes.

CANCELLED - NON-STANDARD:

(1) MESQUITE, TEXAS (LF) INTSXN - direction of holding - E on E crs Dallas, Texas LFR; direction of turns - left; time - 1 minute; minimum alt 2000'.

(2) OAKVILLE, TENN. (LF) INTSXN - direction of holding E on E crs Memphis, Tenn. ILS localizer; direction of turns - left; time 1 minute; minimum alt 1400'.

(3) WAVERLY, ARK. (LF & VHF) INTSXN - direction of holding - W on W crs Memphis, Tenn. ILS localizer; direction of turns - right; time - 1 minute; minimum alt 1700'.

(4) WINGS, PA. (VHF) INTSXN - direction of holding - N on 173°T radial Allentown, Pa. VOR; direction of turns - right; time - 1 minute; minimum alt 2500'.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Aberdeen	Dubuque	Tulsa	WAC 263
Cheyenne	Kansas City	Wichita	WAC 264
Denver	Salina	Boston Local	WAC 265
Des Moines	Sioux City	WAC 262	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

FLIGHT INFORMATION MANUAL CORRECTION: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 101 - (Ground) Delete Minot, N. Dak. VOR rcvr check point.

AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 12, number 7, dated 11 June 1957 as follows: Page 31, On Request Reporting Points, Designate # (12) should read DRAKE instead of DRADE.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	Month and day item was reported.
**	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱	New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space, limitations, such data usually are cited only once.

ALABAMA: **ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)**

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on **rnwy. Drag strip ends are mrkd.** Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg test basis only, **at lat 33-40-11, long. 86-53-58, about** 10 n mi NW Birmingham Mun Arpt. (12-14) Caution **- all arwys and Ints based on** Birmingham or Meridian VORs are not usable for **navigational purposes until the stns are** recmsnd at new lctsn. (4-18)

BIRMINGHAM ARPT-TOWER: About July 1 MM and **LMM will be shut down - relctn. (6-4)**

FLD: Caution - tfc operg in area from 165° clock**wise thru 235° not visible from twr to** dist of 4 s mi. Rnwy 8-26 perm clsd to high perf**ormance single engine conventional** lndg gear type acft, including T-6. Rnwy 18-36 clsd be**tween 0800-1700 daily unless otherwise** advised by ctl twr. (7-9) Acft requiring after-burn**ers prohibited use of arpt. Exten** const work in progress SW end NE/SW rnwy. (4-9) **ILS apch lgt lane shut down until ap-**prox thru Nov for relctn due rnwy ext. (5-1)

DOTHAN-NAPIER FLD: Caution - helicopters from **Rucker Army Air Base trng.**

EVERGREEN-RADIO: VOR radials 320° thru N **unusable acct severe scalloping and bends.**

EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: **Rnwy and threshold lgts inop. (2-6)**

HUNTSVILLE-RADIO: VOR radials 005°-030° have **roughness and bends out of tolerance.**

MOBILE-RADIO: June 19, VOR arwy radials flight**-checked. Radial 018°-028° out of** tolerance due to severe scalloping. (6-19)

MOBILE-BATES FLD - SPECIAL NOTICE: Unlgtd **trees penetrate apch zone to all rnwys.** Use caution. **200' and 1/2 mi is absolute tk-off min for all acft. (4-22)**

(25June 57)

ALABAMA: MOBILE-BATES FLD-TOWER: June 18, ILS not to be used for automatic approach below 300'. (6-18)FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)

MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2) About June 24, VOR will be shut down until approx Aug 29 - relctn to lat 34-42-24, long. 87-29-27. (5-16) All courses have moderate multiples. (6-7)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FLORENCE-SPECIAL NOTICE: Temporary Controlled Firing Area within the following described area: bounded on the N by lat 33-07-30; E. long 111-20-00; S lat 33-03-30; W long. 111-22-30. Designated Altitude: Surface to 7200' MSL. Time to Use: 0630-1600 hours MST on or about 30 June 1957 only. Activities Conducted: 4.2 inch Infantry Mortar Firing, High Explosive and Smoke Shell. Using Agency: Heavy Mortar Company, 158th Infantry, National Guard of Arizona, Glendale, Arizona (4-30)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0. mc. Rdo bcn (FHU 410 Kc) and TVORW (FHU 111.6 mc) only rdo aids to air may suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

**PHOENIX-SPECIAL NOTICE: The following Special Air Traffic Control Instruction is effective immediately: All acft operd under the VFR, or VFR conditions, within Green Civil arwy No. 5 and VOR civil arwy No. 16, west of long. 112-10 and east of long. 112-35, shall comply with the following: (a) Crossing Aircraft. All acft crossing the area of the arwys specified above shall be flown at an alt below 3000' MSL, or above 10,000' MSL and shall remain west of long. 112-16, during such crossing. (b) Enroute Aircraft. All enroute acft operg along Civil arwys Green No. 5 or VOR No. 16, entering the area of such arwys specified above for the purpose of flight thru such area, shall be flown at an alt of at least 4000' MSL while in the area between long. 112-35 and long 112-16. (6-7)

PHOENIX-SKY HARBOR ARPT-SPECIAL NOTICE: Following changes in instrument apch procedures: LR procedure: Initial approach from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on W course PHX LFR, make right climbing turn returning to LFR. Hold on E course LFR at 5000 in standard pattern within 15 mi. VOR procedure: Initial apch from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on radial 258, make a right climbing turn, returning to VOR. Hold east of VOR on radial 076 at 5000 in standard pattern within 15 mi. Tolleson Int - Int GBN VOR radial 027 and PHX VOR radial 258 or W course PHX LFR. All other items these procedures unchanged. (6-14)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SAN SIMON-RADIO: About Jun 26, VOR will be cmsnd, freq: 115.4, ident: SSO. Lctd: lat 32-16-12, long. 109-15-45. Elev: 3607' MSL. Class: VORW. Disregard spurious signals

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'.

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000';(c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in v cnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: LITTLE ROCK-RADIO: Z mrkr shut down until approx June 24 - modernization.

PINE BLUFF-RADIO: VOR shut down until approx July 5. (6-13) During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR except V-16S TXK to PBF unusable. Ints and alts as charted. (3-22)

TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°, 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: About July 1, ILS lclzr will be shut down until approx Aug 15 - relctn of apch lgt sys. Glide slope angle will be 3°. (6-20)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flight checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt checked on arwy radials only.

DINUBA-ALTA ARPT: Unlgtd until July 20. (4-22)

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked.(10-6) DME coverage 335°-350°, 43 n mi at 3000';350°-10°,43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000';120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive construction in progress. Fld clsd to all acft at sunset. (10-5)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000';340°-040°, 12,000'; 040°-070°, 8000';070°-100°, 7000';100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during a arpt const. (8-18) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° & 230° true. (5-6) About July 15, trans & rcvr 123.8 mc will be replaced by 120.5 mc. FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1) Temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800' - caution. (3-22) Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. Daylgt opern of cranes with 80' booms adj to apch end rnwy 30. Tk-offs not affected. (3-28)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

CALIFORNIA: LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000'MSL beyond 30 n mi. Jun 17, freq 121.9 mc chgd to 121.7 mc. Too late for ANRA. FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000/ W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equip crossing rnwy. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000'MSL approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline unless cleared otherwise by ATC. Jet acft pat down-wind leg is 1500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or between LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MOFFETT FIELD-SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-RADIO: Soon ILS will be cmsnd, Lclzr freq: 110.1 mc, ident: MRY. Lctd 1000' SE on a centerline of NW/SE rnwy. Glide slope freq: 334.4 mc. Lctd 825' from apch end NW/SE rnwy and 236' N of centerline of rnwy. Glide angle 3.0°. Apch bear: 84°. LMM freq: 260 kc, ident: RY. MM lctd 0.60 mi from apch end runway. LOM freq: 278 kc, ident: MR. OM lctd 5.14 mi from apch end rnwy. Disregard spurious signals. (6-21)

NATIONAL CITY ARPT: Extensive const around arpt. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a control zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in opern. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 mc or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.(4-24

OAKLAND-METROPOLITAN OAKLAND INTNL ARPT: Dredging and clam shell equipment working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before landing. (10-30)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310°-020°. (10-24) About July 1, VOR will be shut down until approx Oct 1 - modernization. During this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flights departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int R65 to OCN during shutdown period. (6-7)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

CALIFORNIA: ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and departure areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise ctn acct extend simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13)

YARDLEY-RADIO: About Aug 1, VOR will be cmsnd. Freq: 108.8 mc. Ident: ARD. Lctd lat 40-15-11, long. 74-54-31. Elev: 295' MSL. Monitor category (1). Monitored and ctld from Philadelphia ATCS. Class: BVOR. (6-21)
RHODE ISLAND: PROVIDENCE -GREEN ARPT: Caution - exten const - turf areas clsd. Jet and transient mil practice operns prohibited. (5-20)
SOUTH CAROLINA: CHARLESTON-SPECIAL NOTICE: Demolition of ammunition daylgt hrs when wea above VFR minimums. Area dangerous to acft below 3000' and is lctd at approx lat 32-59-40, long. 79-58-00.
**CHARLESTON-SPECIAL NOTICE: Effect July 15, Warning Area W-132 eastern bndry changed returning area to original bndrys which existed prior to Feb 17, 1957. (6-20)
CHARLESTON-RADIO: VOR operg test-basis. During test opern the following temp flgt opern procedures are estab: MEA V-1 SAV to MYR 3000'; V-3 FLO to CHS-LFR direct 2000'; V-18 AGS to North Int 3000'; V-18 North Int to CHS-LFR direct 5000'; V-53 CHS-LFR to CAE Int direct 4000'. V3W SAV to CHS and V3E CHS to FLO not usable. CAE Int temp designated AGS 070, CLT 185; North Int AGS 090, SAV 002 Flag MRA 5000'; Jamestown Int FLO 183, MYR 236; Lake Mountrie Int FLO 198, MYR 247; following Int. not usable: Holly Hill, St. George, Adams Run, Bull Point, Iles of Palm, Byhee, Gray, and Kildare. (5-24)
CHARLESTON-AFB/MUNICIPAL ARPT: Rnwys 3-21 and 15-33 alternately clsd during daylight hrs - extensive const. all areas adj to rnwys. Men and equip installing taxiway lgtg in close proximity all taxiways. Open ditches marked days, lgtd ngts. Sections of taxiways clsd for short periods during const. Contact twr for current info. (9-21) Apch lgts rnwy 15 inop. (5-21)
CHESTER ARPT: Drag races in progress every Sat 1000-1800E. At least one rnwy will be open for acft operns. (5-8)
COLUMBIA-RADIO: VOR operg intermittently on test basis until approx July 1. During this period temp MEAs as follows: V-37 Richburg Int to CAE Int 4000'; V37 CAE Int to SAV 6000'; V-56 AGS to FLO 3000'; V-53 Union Int to CAE Int 4000'; V-56N FLO to Blythewood Int 4000'; V-53 CAE Int to CHS-LFR direct 4000'; CAE Int temp designated AGS-070 CLT 185 Blythewood Int FLO-270, CLT-185, North Int AGS 090, SAV 002 Flag MRA 5000'. Following Ints unusable: Burton, Adams Run. (6-19)
FLORENCE-RADIO: VOR radials 225°-250° out of tolerance - roughness and bends. (3-7)
GEORGETOWN-COUNTY ARPT: Bcn, obstn, all lndg area lgts inop. (5-9)
GREENVILLE-SPECIAL NOTICE: Intensive activity by C-124 type acft within 25 mi of GRL rng. All pilots exercise extreme caution and if possible avoid flgt in proximity of Donaldson AFB. (6-6)
GREENWOOD COUNTY ARPT: Rnwy 9-27 clsd for const. Use caution on other rnwys. (6-14)
MYRTLE BEACH-SPECIAL NOTICE: Air-to-air gunnery in Warning Area W-177 being conducted days at all altitudes. Effect. immediately, Warning Area W-177 Controlling Agency changed from Ninth Air Force to Myrtle Beach AFB, S. C. (6-19) Effect July 15, Eastern bndry changed returning area to original bndrys which existed prior to Feb 17, 1957.(6-20)
MYRTLE BEACH-RADIO: VOR courses in Ocean sectors not fully flgt-checked. (10-9)
SUMTER ARPT: 3200' NW/SE rnwy clsd due const. (6-18)
SOUTH DAKOTA: ABERDEEN-SAUNDERS ARPT: N/S rnwy clsd to acft weighing more than 6 tons. 200' N end N/S rnwy clsd to all operns. (5-8)
EDGEMONT-SPECIAL NOTICE: Demolition opern approx 10.8 n mi SSW at Blackhills Ordnance Depot lctd at lat 43-08-11, long. 103-55-36. Pilots are cautioned against flying over or near area at any alt due to possibility of encountering toxic gases.
HURON-HOWES ARPT: Rnwys 17-35 and 8-26 clsd to acft over 12,500 lbs gross weight xcpt portion of rnwy 8-26 from intsxn E to taxi strip. Sod areas clsd xcpt 150' adj to rnwys inside of bndry lgts, usable for lgt acft at pilots' discretion. (4-25)
PHILIP ARPT, SITE 31, CYS-HON: 24' unlgtd p-line N from bcn to transmission line.
RELIANCE-FLETCHER ARPT: 711' (2883'MSL) lgtd twr being erected 6.2 n mi NNW (346°T) at lat 43-57-55, long. 99-36-11. (4-15)
SIOUX FALLS-FOSS FLD-TOWER: Audio interference may be noted lclzr SE thru SW. Apch procedures and lclzr alignment not affected. (12-5)

TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 via Knoxville is invited to the proximity of the W course of Knoxville rdo rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.

BRISTOL TRI-CITY ARPT: Hangar const in progress 350' W of N end rnwy 20-2. Height 45' unlgtd. (1-28)

CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. LFR operg as homing fac. (5-8)

CHATTANOOGA-LOVELL FLD: All acft operg from Lovell Fld between hrs of sunset and sunrise shall be equipped with a transmitter and rdo rcvr capable of receiving instructions from ctl twr. All acft operg into and out of this fld durg daylgt hrs shall be equipped with a rcvr capable of rcvg instructions from ctl twr at all times while operg within the limits of the arpt tfc ctl zone. (8-23)

KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution - VOR has occasional momentary course disturbance in mountainous areas.

KNOXVILLE-McGHEE TYSON ARPT-TOWER: ILS glide slope operg test basis. (4-25) About June 24, ILS LMM freq will be changed from 201 kc to 335 kc; LOM freq will be changed from 215 kc to 353 kc. (6-10) FLD: Rnwy lgts rnwy 18-36 inop. (6-19)

MEMPHIS-RADIO: About June 27, Z mrkr will be shut down until approx July 4- modernization. (6-6)

MEMPHIS ARPT: Const in progress - men and equip. on fld - caution. (5-9)

NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250° have bends and roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi; 180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEAs and routing as follows: V16 GHM VOR to BNA LFR via GHM 066° MEA 3000'; V16 BNA LFR direct Smithville VHF Int via CSV 284° MEA 3500'; V-16 Smithville Int to CSV VOR via CSV 284° MEA 5000'. V140 DYR VOR to McEwen Int via DYR 083° MEA 5000'; V-140 McEwen Int to BNA VOR via BNA 266° MEA 3500'; Min hold alt at McEwen 3500'; V-140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V-140 Hartsville Int to Highway Int via BNA 056° MEA 7000'. V-7 BNA LFR to Lewisburg Int MEA 3000'. (2-28)

NASHVILLE-BERRY FLD: Taxiway between ends of rnwy 9 and 15 closed for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy - use as a taxiway. (12-28)

SEWANEE-UNIVERSITY OF THE SOUTH ARPT: Clsd due to rough and muddy fld. (2-29)

TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

ADDISON ARPT: Arpt reported: Type "L" longest rnwy 2000'; remarks - work in progress enlarging NW/SE rnwy to 4500' x 100' with asphaltic concrete. (4-12)

ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27) FLD: Neon apch lgts system removed due const. (6-24)

AUSTIN-BERGSTROM AFB-RADAR APPROACH CONTROL CENTER: About July 6, RAPCON will be cmsnd. Freqs: 119.1, 121.5, 124.9, 125.1, 126.18, 134.1, 136.8, 137.88, 142.02, 225.4, 236.6, 243.0, 270.6, 275.8, 289.4, 305.4, 327.4, 335.8, 344.6, 363.8, 379.4, mcs. Rcvg only: 3023.5 kc; 122.7 mc. (6-5)

AUSTIN-MUELLER ARPT-TOWER: April 15, ILS MM shut down - relctn. During this period , ILS landing minimum rnwy 30 left raised to 300-1. (4-11) FLD: Acft lndg and taking -off are cautioned to avoid Bergstrom AFB tfc pat - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with 3-21. Green range lgts on rnwy 30 designate touchdown point ngts. (10-4) Const in progress 1100' SE of advertised touchdown point on rnwy 30L. (5-7)

BEAUMONT-JEFFERSON CO. ARPT-TOWER: Soon, ILS will be cmsnd. Lclzr freq: 109.5 mc. Ident: BUJ. Glide slope freq: 332.6 mc. Apch bear.: 113°. LMM freq: 206 kc, ident: UJ. LOM freq: 236 kc; ident: BU. MM lctd 0.4 mi, OM 4.8 mi from apch end rnwy. (6-5) FLD: Rnwy 11-29 clsd - const. (9-19) Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13)

BIG SPRING-SPECIAL NOTICE: Acft operg in vcnty of Big Spring range and Webb AFB in VFR wea exercise extreme caution due to intensive jet tfc. Alt below 5000' saturated on Arwy Green 5 and V-16. (4-22)

BIG SPRING-RADIO: April 8, VOR shut down until approx Aug 8 - relctn to lat 32-23-06, long. 101-29-00. (3-7) During this period, VOR flgts are authorized to use BGS LFR in lieu of BGS VOR. On all arwys MEAs remain as charted. Rowena Int use 105° bear. from BGS LFR, Jack Int use 108° bear. from BGS LFR, Sterling Int use 131° bear. from BGS LFR, King Int use 186° bear. from BGS LFR, Johnson Int use 203° bear. from BGS LFR. Mustang Int use 266° bear. from BGS LFR. (4-5)

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

BROWNWOOD ARPT: 500' (2000' MSL) lgtd twr being erected 5 n mi SSW (218°T) at lat 31-43-45, long. 99-01-00. (5-3)

COLLEGE STATION-RADIO: DME coverage 60° to 90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

**COLLEGE STATION-EASTERWOOD ARPT: 482' (764' MSL) lgtd twr erected 3.8 n mi NNE (26°T) at lat 30-38-39, long. 96-19-46. (6-20) Rnwy 4-22 clsd for maint. 0800-1700. (5-14)

**CORPUS CHRISTI-SPECIAL NOTICE: Effect. immediately, Warning Area W-493 Controlling Agency changed from C. O. U.S. Naval Air Stn, Corpus Christi, Texas to Chief, Naval Air Advanced Training, Corpus Christi, Texas (CNAVANTRA. (6-20)

CORSICANA-ALLISON RANCH ARPT: Clsd due to exten const on rnwys. (4-23)

DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21). Concurrently with VOR shut down for modernization, the following temp MEA's apply: V-16 MWL to SLR 3500, V16 to V18 MWL to UIM 4000', V15 ACT to ADM 5000, V114 SPS to Denton Int 5000. V-15E ACT to DAL, V15W DAL to ADM, V114 Denton Int. to GGG, V114N DAL to UIM, V16S Russell Int. to DAL unusable. Following redescribed fixes, Prosper Int, ADM 150/FTW 082 flag MRA 2900, Little Elm Int. FTW 089/MWL 056, Hensley Int. SE course ACF lclzr/BRT 004, Waxachachie Int. ACT 012/BRT 082 flag MRA 4000, Denton Int. SPS 114/FTW 082 flag MRA 5000, Ross Ave. Int. and Fair Park Int. Radar fixes only. Princeton Int., De Soto Int. Ennis Int., Red Oak Int., Kemp Int. unusable.

DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and contact Love Twr. Formation take-offs not permitted. Caution - acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions.

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; right hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip. avail.

FORT WORTH-CARTER FLD-TOWER: Effect July 1, Apch Ctl call will be changed to : Fort Worth Apch Ctl. (5-29) FLD: Const on a 2050' rnwy extension on SE end of rnwy 13-31. Hvy equip. and men will be in the area approx 90 days. 500' SE end of rnwy 13-31 will be clsd periodically during daylgt hrs when men and hazards will be properly mrkd. 274' (824' MSL) lgtd twr being erected 8 n mi SSE (169°T) at lat 32-41-42, long. 97-01-15.

FORT WORTH-MEACHAM FLD-TOWER: June 3, ILS lclzr and glide slope shut down until approx Aug 5. (6-3)

GAINESVILLE MUN ARPT: 315' (1233' MSL) lgtd twr being erected 8.9 n mi NE (47°T) at lat 33-45-05, long. 97-04-02.

GALVESTON ARPT: Rnwy 7-25 and N portion rnwy 17-35 and approx 300' NW end rnwy 13-31 clsd daylgt hrs July 6-7 due sport car races. Markers will be displayed on closed portions. (6-21)

GREENVILLE-MAJORS ARPT: Rnwys 17R and 35L closed due to construction. Men and equip. working during daylight hours. Other rnwys will be clsd intermittently until further notice. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Night lndgs not adviseable. (5-10)

GREGG COUNTY-RADIO: About July 1, Scheduled weather broadcasts on J fac (236 kc) will be discontd. (6-6)

HARLINGEN-HARVEY RICHARDS ARPT: About July 2, 316' (347' MSL) lgtd twr will be erected 10 n mi E (97°T) at lat 26-11-35, long. 97-34-27. (6-19)

TEXAS: HONDO AIR BASE: Inten day and night USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft nights, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized using Houston 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney, Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial. (2-26)

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80'(AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron replaced by lgtd wind sock - lctd at former tetrahedron lctn. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for take-offs to E only; no lndgs. (3-11)

HUECO MOUNTAIN-RADIO: MHW will be cmsnd. Freq: 317 kc. Ident: HCO. Lctd lat 31-49-06, long. 105-59-42. (6-5)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000'-photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement. (1-21)

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4)

LUBBOCK ARPT-TOWER: March 4, ILS glide slope shut down until approx Sept. 1.(2-25)

FLD: N 1000' rnwy 17-35 clsd to all acft until about Sept. 1, for major const and ext of rnwy. Runway 17 threshold lights moved 1000' S. Men and heavy equipment working during daylight hours in the apch zone of rnwy 17. Rnwy 17-35 clsd to Convair and larger aircraft during const period xcpt during IFR wea conditions or with N or S winds of 20 knots or more. (3-14)

LUFKIN-RADIO: DME coverage: 017°, 2400' MSL 34 n mi; 032°, 2400' MSL 35 n mi; 090°, 2000' MSL 21 n mi; 170° 1600' MSL 40 n mi; 190°, 1600' MSL 40 n mi; 310°, 2500' MSL 25 n mi. (5-8)

MARFA-RADIO: Auto, rebroadcast feature cmsnd. Rcvg 122.1, 126.7, 135.9, 255.4 mc.

MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW. (7-18)

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

McALLEN-MILLER INTNL ARPT: Rnwy 18 clsd for take-offs and lndgs. (11-26)

McKINNEY-SPECIAL NOTICE: 166' lgtd temp. drilling derrick erected 3.5 n mi N. W.

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300' MSL. (6-15)

NEWMAN-RADIO: Soon, MHW will be decmsnd and relctd at Hueco Mountain. (6-5)

ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 closed. (5-16)

**PALACIOS ARPT: 100' oil drilling derrick erected in NE corner 600' S of N boundary & 600' W of E boundary - lgtd at night. (6-23)

PORT ISABEL ARPT: Closed all operations-const. (7-26)

ROCKPORT-ARANSAS COUNTY ARPT: Caution-oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)

SALT FLAT-RADIO: VOR radials 25° clockwise 045° unusable beyond 35 n mi. DME unusable 025° to 045° beyond 35 n mi at MEA 10,800'.

SAN MARCOS ARPT: NE/SW strip rough - caution. (8-6)

SNYDER-WINSTON FLD: 150' (2577' MSL) lgtd rotary drilling rig erected 2552' SE. N/S rnwy. (10-4)

TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hours on Green Arwy #5 approx 13.4 n mi WSW of Texarkana LF rng.

TEXAS: UVALDE-LEONA RANCH STRIP: New lndg area reported: lctd 35 n mi NW; lat 29-30, long 100-22; elev 1720'; 1 strip -2800' long. (1-28)

WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.

WEATHERFORD ARPT: 316'(1456'MSL) lgtd twr being erected 9.4 n mi ENE(73°T) at lat 32-47-46, long. 97-38-27. (5-14)

UTAH: BONNEVILLE-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'.

BRYCE CANYON-RADIO: VOR has light roughness below 13,000'.

DELTA-RADIO: VOR coverage 40°-80° and 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'.

JORDAN NARROWS-SPECIAL NOTICE: For Temp Controlled Firing Area, effective June 9 to 23 inclusive, see chart page 33, Airgi, Vol. 12, No. 6, May 28, 1957.

LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280° to 300°, 35 n mi; 350°-30° and 180°-220°, 25 n mi. (11-26) About July 1, VOR will be shut down until approx July 22 - modernization. Durg this period, V6 arwy between LWL VOR and Promontory Point will be unusable. (6-25)

MILFORD-RADIO: VOR coverage 20°-140°, 22 n mi; 235°-330°, 35 n mi at MEA. (1-2)

OGDEN-RADIO: VOR coverage 5°-120°, 30 n mi at 11,000'. DME coverage 360°-150°, 17 n mi at 12,000'.

PRICE-CARBON CO. ARPT: NE/SW rnwy clsd - const. (11-1)

SALT LAKE CITY-RADIO: VOR course scalloping prevalent between 290°-350°. Coverage this area 17 n mi at 6500' MSL. 30 n mi at 11,000' MSL. Coverage 10°-135°, 22 n mi at min terrain clearance alt. DME coverage 20°-140°, 17 n mi at 13,000' MSL; 180°-235°, 35 n mi at 12,000' MSL; 340°-20°, 26 n mi at 12,000' MSL. (8-10)

SALT LAKE CITY MUN #1 ARPT-TOWER: UHF/DF bear. 355° to 95° and 185° to 235° from stn unreliable below 15,000' MSL. Area 95° to 135° from stn unreliable all alt.

UTAH LAKE-RADIO: VOR usable dist at 14,000' MSL from 010° thru 040°, 35 n mi; 40° thru 50°, 30 n mi; 50°-85°, 40 n mi; at 13,000' MSL from 145° thru 155°, 35 n mi; and 275° thru 295°, 30 n mi. Course roughness exists over mountain ridges N thru E between 15 & 20 n mi. (2-1) June 24, VOR shut down until approx July 15 - modernization. Durg this period the following arwys will be affected: V21 Delta-Salt Lake City MEA 12,000'; V253 Utah Lake-Timpie Int. and V235 Utah Lake-Ft. Bridger unusable. (6-20)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

MILES CITY, MONTANA-MUNICIPAL ARPT: VOR, Proced. #1, Amdt. 1, Effective 6 July 1957: Change field elevation from 2631' to "2628' ".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
				Condition	Two Engine or Less		More Than Two Engine, More Than 65 Knots
From	To	Course and Distance	Minimum Altitude		65 Knots or Less	More Than 65 Knots

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e. g. Long Beach omnirange (Voice) - - . . - - - - . . . (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 23, 1956

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" (or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60 49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area are published in graphic form on page 26. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

WASHINGTON, D. C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Maximum speed within the zone is 180 mph or 160 knots indicated airspeed unless operational limitations for a particular aircraft require greater airspeeds, in which case the aircraft shall not be flown in excess of the minimum speed consistent with the safe operational limitations of the aircraft.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

NEWARK CEILING-VISIBILITY EVALUATION PROGRAM: This program, being conducted at Newark Airport by the U.S. Weather Bureau, changed from furnishing threshold contact height estimates to APPROACH LIGHT CONTACT HEIGHT estimates on May 1, 1957. These estimates will be given out only by the CAA local controller on 118.3 mc at the time each pilot reaches the outer marker inbound for a straight-in ILS approach to rnwy 4. Evaluation of the accuracy and usefulness of these estimates is based solely on the report given by the pilot. Therefore it is important for the report "APPROACH LIGHTS" to be given on 118.3 mc the instant the approach lights are sighted. All pilots are urged to visit the project building adjacent to the control tower or telephone the project personnel at MItchell 2-4414 and give their opinion as to whether the approach light contact heights are of more value than the threshold contact lights.

AIRMAN'S GUIDE PRICE CHANGE: Effective July 1, the annual subscription to the Airman's Guide is being reduced to $2.25 domestic ($3.25 foreign). The Flight Information Manual, which was formerly included in the subscription price to the Guide, is NOT included in the new price. However, all subscribers to the Guide will receive written notice from the Superintendent of Documents when the Manual is issued, giving the price and how it may be purchased. The Manual cost is expected to be approximately $0.50, so that the overall cost of Guide and Manual will remain about the same. The separation of the Guide and Manual is for bookkeeping purposes only; the Guide will continue to supplement the Manual as in the past.

✓ MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective August 1, 1957:

(1) A-5, amended to read in part:		
Greenwood, Miss. LFR	Hernando INT, Miss	1800
Hernando INT, Miss.	Memphis, Tenn. LFR	1500
(2) V-16, amended to read in part:		
Pine Bluff, Ark. VOR via S alter. *1600 - MOCA	Eudora INT, Miss. via S alter	*3000
Eudora INT, Miss. via S alter.	Memphis, Tenn. VOR via S alter.	1400
Memphis, Tenn. VOR via S alter. *2500 - MRA	*LaGrange INT, Tenn. via S alter.	1500
LaGrange INT, Tenn. via S alter. *2000 - MOCA	Graham, Tenn. VOR via S alter.	*4000
(3) V-54, amended to read in part:		
Biscoe INT, Ark. *3000 - MRA **1700 - MOCA	*Hughes INT, Ark.	**2500
Hughes INT, Ark. *1700 - MOCA	Memphis, Tenn. VOR	*2500
Lonoke INT, Ark. via N alter. *3000 - MRA **1600 - MOCA	*Hillemann INT, Ark. via N alter.	**2500
Hillemann INT, Ark. via N alter. *2500 - MRA **1600 - MOCA	*Caldwell INT, Ark. via N alter.	**2500
Caldwell INT, Ark. via N alter.	Memphis, Tenn. VOR via N alter.	1700

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points are designated or cancelled, effective August 1, 1957:

DESIGNATED:

(1) CALDWELL, ARK. (VHF) INTSXN - the intsxn of the 276°T radial of the Memphis, Tenn. VOR and the 171°T radial of the Walnut Ridge, Ark. VOR.

(2) HERNANDO, MISS. (LF) INTSXN - the intsxn of the S crs of the Memphis, Tenn. LFR and a 106°T bearing from Bruins, Ark. Rbn.

(3) HERNANDO, MISS. (VHF) INTSXN - the intsxn of the 191°T radial of the Memphis, Tenn. VOR and a 106°T bearing from Bruins, Ark. Rbn.

(4) HUGHES, ARK. (VHF) INTSXN - the intsxn of the 261°T radial of the Memphis, Tenn. VOR and the 166°T radial of the Walnut Ridge, Ark. VOR.

(5) LAGRANGE, TENN. (VHF) INTSXN - the intsxn of the 081°T radial of the Memphis, Tenn. VOR and the 178°T radial of the Dyersburg, Tenn. VOR.

(6) PRITCHARD, MISS. (VHF) INTSXN - the intsxn of the 224°T radial of the Memphis, Tenn. VOR and the 132°T bearing from Bruins, Ark. Rbn.

(7) SLAYDEN, MISS. (VHF) INTSXN - the intsxn of the 099°T radial of the Memphis, Tenn. VOR and the 231°T radial of the Jack's Creek, Tenn. VOR.

CANCELLED:

(1) NESBITT, MISS. (VHF) INTSXN - the intsxn of the 186°M radial of the Memphis, Tenn VOR and the 090°M bearing from the Bruins, Ark. Rbn.

(2) NESBITT, MISS. (LF) INTSXN - the intsxn of the S crs of the Memphis, Tenn. LFR and the 090°M bearing from the Bruins, Ark. Rbn.

(3) ROUND POND, ARK. (VHF) INTSXN - the intsxn of the 271°M radial of the Memphis, Tenn. VOR and the 160°M radial of the Walnut Ridge, Ark. VOR.

✓ CONTROL AREA EXTENSIONS AND CONTROL ZONES: Effective 0001 CST July 10,* 1957, to 2400 CST August 31, 1957, unless otherwise advised, the following temporary control area extensions and control zones are amended in whole or in part as follows:

(1) Control area extension (Camp Douglas, Wis.) is added to read: "That airspace within a 30 mi radius of Volk Field, Camp Douglas, Wis., N of lat 43-39-00, excluding the portion below 26,000 ft, lying within restricted area R-200 and excluding the portion below 12,000 ft, lying within restricted area R-468."

(2) Control zone (Camp Douglas, Wis.) is added to read: "Within a 5 mi radius of Volk Field, Camp Douglas, Wis., and within 2 mi either side of lines bearing 90°T and 270°T from the Camp Douglas nondirectional radio beacon extending from the 5 mi radius zone to a point 12 mi E of the nondirectional radio beacon."

*NOTE: The above information was issued by Circuit A NOTAM at 1310Z on 26 June 1957.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Areas shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 201)

Effective July 26, 1957:

(1) Section 608.25, the Fort Knox, Kentucky, area (R-64, formerly D-64), amended October 31, 1951 in 16 F.R. 11066, is further amended by changing the "Designated Altitude" column to read: "Surface to 30,000 ft MSL."

(2) Section 608.29, the Woods Hole, Massachusetts, area (R-13), amended May 4, 1956, in 21 F.R. 2977, is rescinded.

(3) Section 608.29, the Cuttyhunk, Massachusetts, area (R-75), amended May 4, 1956, in 21 F.R. 2977, is rescinded.

(4) Section 608.29, the Nashawena #2, Massachusetts, area (R-61), amended January 24, 1952, in 17 F.R. 715, is rescinded.

(5) Section 608.30, the Upper Lake Huron, Oscoda, Michigan, area #2 (R-491), amended April 24, 1957, in 22 F.R. 2881, is further amended by changing the "Time of Designation" column to read: "Daylight hours only."

(6) Section 608.44, the Muskogee (Camp Gruber), Oklahoma, area (R-220 formerly D-220) amended February 3, 1953, in 18 F.R. 681, is rescinded.

(7) Section 608.51, the Fort Hood, Texas, area (R-291), amended May 4, 1956, in 21 F.R. 2977, is further amended by changing the "Designated Altitudes" column to read: "Surface to 30,000 ft MSL."

Effective August 2, 1957:

(1) Section 608.43, the Wilmington, Ohio, area (R-109), amended on March 9, 1957, in 22 F.R. 1547, is further amended by changing the "Controlling Agency" column to read: "Wright Air Development Center, Wright Patterson AFB, Dayton, Ohio."

✓ WEATHER COLLECTION TIME CHANGE: Effective June 1, 1957, the starting time for hourly sequence collections of aviation weather reports on Service A teletypewriter circuits was changed from 30 minutes past the hour to the hour. Pilots should take full cognizance of this change when checking the latest weather before or in flight. Also, pilots should try to avoid telephoning Weather Bureau or CAA stations for weather information between 45 minutes after the hour and the hour because at this time the stations are routinely occupied with observing the weather.

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

✓HOLDING PATTERNS: The following holding patterns have been designated, redesignated, or cancelled, effective August 1, 1957:

DESIGNATED:

(1) CALDWELL, ARK. (VHF) INTSXN - direction of holding - W on the 276°T radial of the Memphis, Tenn. VOR; direction of turns - right; time - 1 minute; minimum alt 2500'.

(2) HERNANDO, MISS. (LF) INTSXN - direction of holding - S on the S crs of the Memphis Tenn. LFR; direction of turns - right; time - 2 minutes; minimum alt 1500'.

(3) HERNANDO, MISS. (VHF) INTSXN - direction of holding - S on the 191°T radial of the Memphis, Tenn. VOR; direction of turns - right; time - 2 minutes; minimum alt 1500'.

(4) SLAYDEN, MISS. (VHF) INTSXN - direction of holding - E on the 099°T radial of the Memphis, Tenn. VOR; direction of turns - right; time - 2 minutes; minimum alt 3000'.

(5) NORTHBROOK, ILL. (VOR) INTSXN - direction of holding - E on the 093°T radial; direction of turns - right; time - 1 minute.

(6) ELGIN, ILL. (VHF) INTSXN - direction of holding - N on the 340°T radial of the Naperville, Ill. VOR; direction of turns - right; time - 1 minute.

(7) WHITE FISH, ILL. (VHF) INTSXN - direction of holding - E on the 093°T radial of the Northbrook, Ill. VOR; direction of turns - right; time - 1 minute.

(8) MARENGO, ILL. (VHF) INTSXN - direction of holding - W on the 093°T radial of the Janesville, Wis. VOR; direction of turns - right; time - 1 minute.

(9) LAKE SHORE, ILL. (VHF) INTSXN - direction of holding - W on the 075°T radial of the Naperville, Ill. VOR; direction of turns - right; time - 1 minute.

(10) WESTVILLE, IND. (VHF) INTSXN - direction of holding - E on the 089°T radial of the Chicago Heights, Ill. VOR; direction of turns - right; time - 2 minutes.

REDESIGNATED:

(1) NAPERVILLE, ILL. (VOR) INTSXN - direction of holding - W on the 269°T radial; direction of turns - right; time - 1 minute; minimum alt 2100'.

CANCELLED:

(1) ROUND POND, ARK. (VHF) INTSXN - direction of holding - W on the 271°M radial of the Memphis, Tenn. VOR; direction of turns - right; time - 2 minutes; minimum alt 2800'.

(2) NESBITT, MISS. (LF) INTSXN - direction of holding - S on the S crs of the Memphis, Tenn. LFR; direction of turns - right; time - 2 minutes; minimum alt 1500'.

(3) NESBITT, MISS. (VHF) INTSXN - direction of holding - S on the 186°M radial of the Memphis, Tenn. VOR; direction of turns - right; time - 2 minutes; minimum alt 1500'.

✓LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

DRA	Desert Rock AAF, Nevada (assignment)
EEL	Wheeling, Ill., VOR (changing to OBK Northbrook, Ill.)
FYV	Fayetteville, Ark., Drake Field (name change)
LUK	Lucas, Iowa, REP (deletion)
PMD	Palmdale, Calif., Air Force Plant 42 (name change)
TOC	Toccoa, Ga., Le Tourneau-Westinghouse Arpt (name change)
2LM	Lookout Mountain, Tenn. (assignment)
4BO	Broadus, Montana (assignment)

✓CONTROL 1150 (OFF SHORE ROUTE) MEA CHANGE: Change MEA West Palm Beach Fla. VOR to Bonita Int., Fla., from 1600' to 1700'.

✓FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 29, under 3rd Region, General Safety: Delete Huron, S. Dak. and insert Sioux Falls, S. Dak.

(2) Page 100, Airborne, insert: Eagle Lake, Texas -- 180°; center of football field 1/2 mi SW Eagle Lake Arpt.

(3) Page 102, Airborne, insert: Vandalia, Ill. -- 180°; centerline at N end N/S rnwy.

(4) Page 107, Ground, delete: Vandalia, Ill. checkpoint.

✓AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 12 #8, dated June 25, 1957, as follows:

(1) Page 71, under MINIMUM EN ROUTE ALTITUDES, section 610.6002, V-2; section 610.6082, V-82; section 610.6097, V-97; and section 610.6129, V-129; substitute La Crosse, Wis., for Nodine, Wis., wherever the latter occurs.

(2) Page 73, under ON REQUEST REPORTING POINTS, Redesignated, Effective August 1, 1957, #6: change "Nodine, Wis." to read "La Crosse, Wis."

(3) Page 73 - ON REQUEST REPORTING POINTS, Designated, Effective August 1, 1957:

(a) correct #6 Clifton, Tenn. VHF Intsxn to read: intsxn of the 104°T radial of the Jack's Creek, Tenn. VOR and the 238°T radial of the Graham, Tenn. VOR.

(b) correct #35 Waco, N. C. VHF Intsxn to read: intsxn of the 327°T radial of the Charlotte, N. C. VOR and the 057°T radial of the Spartanburg, S. C. VOR.

(4) Pages 74 and 75, under CIVIL AIRWAYS, cancel items 4, 10 and 12; change item 14 to read: "VOR civil airway No. 129 (Rockford, Ill., to Eau Clair, Wis.) is amended by changing the words which read: "Rockford VOR 278°T and Lone Rock VOR 162°T radials;" to read: "Rockford VOR 276°T and the Lone Rock VOR 164°T radials;".

Under CONTROL AREA EXTENSION, cancel item 3; under CONTROL ZONES, cancel item 6; under VOR REPORTING POINTS, item 1, under additions, delete reference to Nodine Minn., VOR, and item 2, under revocations, delete reference to La Crosse, Wis., VOR. (Above changes due to fact relocation La Crosse VOR to Nodine, Minn., scheduled for March '58)

✓AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published i about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Cincinnati	Nashville	Chicago Local	WAC 307
Cleveland	New York	Kansas City Local	WAC 360
Huntington	Rapid City	WAC 117	JN 29

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

Standard Aeronautical Charts dates shown are release dates

Albany	6-24-57	Green Bay	6-19-57	Detroit Local	6-19-57
Aroostook	6-24-57	Lake Superior	6-19-57	WAC 218	6-20-57

NEW CHARTS

AL 118 VOR - Detroit, Michigan - Detroit City Arpt
AL 693 VOR (TVOR) - San Jose, California - San Jose Municipal Arpt
AL 707 VOR - Owensboro, Kentucky - Owensboro-Daviess Co. Arpt
RF 35, RF 36, RF 37
RF-VOR Seattle Terminal Area

DISCONTINUED CHARTS

AL 860 VOR - Mansfield, Ohio - Mansfield Arpt (procedure cancelled, CAA 6-13-57)

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

★ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18)

BIRMINGHAM ARPT-TOWER: About Aug 1 MM and LMM will be shut down - relctn. (6-4)

FLD: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.

MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)

MOBILE-BATES FLD - SPECIAL NOTICE: Unlgtd trees penetrate apch zone to all rnwys. Use caution. 200' and 1/2 mi is absolute tk-off min for all acft. (4-22)

MOBILE-BATES FLD-TOWER: June 18, ILS not to be used for automatic approach below 300'.(6-18) FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld.(11-10)

MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2).

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FLORENCE-SPECIAL NOTICE: Temporary Controlled Firing Area within the following described area: bounded on the N by lat 33-07-30; E. long 111-20-00; S lat 33-03-30; W long. 111-22-30. Designated Altitude: Surface to 7200'MSL. Time of Use: 0630-1600 hours MST on or about 30 June 1957 only. Activities Conducted: 4.2 inch Infantry Mortar Firing, High Explosive and Smoke Shell. Using Agency: Heavy Mortar Company, 158th Infantry, National Guard of Arizona, Glendale, Arizona. (4-30)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU

ARIZONA: 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (6-24)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

PHOENIX-SPECIAL NOTICE: Extreme caution-area between Phoenix VOR & Hassayampa VOR on Victor arwy 16 & Green 5. Extensive high performance, jet acft across these arwys when departing & arriving Luke AFB in connection with trng conducted Gila Bend Restricted Areas (R-309, R308). This tfc generally crosses V-16 & Green 5 between Hassayampa VOR & town of Tolleson (11 mi W of Phoenix) at alts of 3000' MSL & below-0715 thru 1600, Mon thru Fri. (3-1) All flgts operg thru this area maintain at least 4000' MSL. Flgts lndg or departing within area advised to exercise extreme caution below 4000' MSL. (5-7)

PHOENIX-SKY HARBOR ARPT-SPECIAL NOTICE: Following changes in instrument apch procedures: LFR procedure: Initial approach from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on W course PHX LFR, make right climbing turn returning to LFR. Hold on E course LFR at 5000 in standard pattern within 15 mi. VOR procedure: Initial apch from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on radial 258, make a right climbing turn, returning to VOR. Hold east of VOR on radial 076 at 5000 in standard pattern within 15 mi. Tolleson Int - Int GBN VOR radial 027 and PHX VOR radial 258 or W course PHX LFR. All other items these procedures unchanged. (6-14)

**PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for tk-off, xcpt prior permission arpt manager. (12-7) Functioning 2-way rdo rqrd.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'.

**SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

★SAN SIMON-RADIO: July 1, VOR cmsnd. Freq: 115.4 mc. Ident: SSO. Lctd lat 32-16-12, long. 109-15-45. Elev: 3607' MSL. Mag variation: 13°E. Monitoring category (3). Controlled from Tucson ATCS. Class: VORW. (7-4) VOR coverage 030°-170°, 30 n mi; 160°-260°, 30 n mi. (7-4)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000';050°-060°, 22 n mi 11,000';060°-075°, 35 n mi 11,000';075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000' 225°-230°, 40 n mi 7,000';330°-345°, 35 n mi 11,000';345°-360°, 25 n mi 11,000'(7-17)

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000';(b) SW quad 10,000';(c)SE quad 12,000';(d) NE quad 13,000'. (6-20)

YUMA RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: EL DORADO ARPT: 300' (560' MSL) twr erected by Aug 1 at 33-11-52 N, 92-41-23W, 1.2 n mi NW - will be obstn lgtd and mrkd. (6-20)

LITTLE ROCK-RADIO: Z mrkr shut down until approx July 20- modernization.

★LITTLE ROCK-ADAMS FLD-TOWER: June 26, freq 119.5 mc cmsnd. (6-27)

PINE BLUFF-RADIO: VOR shut down until approx July 15. (7-1) During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR except V-16S TXK to PBF unusable. Ints and alts as charted. (3-22)

TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)

BASS LAKE-WISHON ARPT: Clsd until about July 20 due grading and reoiling. (6-13)

BECKWOURTH-PLUMAS CO. ARPT: Clsd until about July 24 due rnwy resurfacing. (6-24)

CALIFORNIA: BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 200°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Aug 1, ILS lclzr will be shut down until approx Aug 15 - relctn of apch lgt sys. Glide slope angle will be 3°. (7-7)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DINUBA-ALTA ARPT: Unlgtd until July 20. (4-22)

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution -glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

★FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked. VOR placed in monitoring category (1). (7-3)

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230° true. (5-6) About July 15, trans & rcvr 123.8 mc will be replaced by 120.5 mc. (6-6) FLD: Several 230' MSL portable oil derricks NW,W, and S of fld. No fuel servicing avail. for civil acft 2400-0600. Neon apch lgt lane rnwy 30 discontd indefinitely. (1-1) Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1500 wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail. lndgs and tk-offs. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

★LOS ANGELES INTERNATIONAL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19) Add radar freqs: 250.2, 269.0 mcs. (6-21) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equip. crossing rnwy. During VFR wea conditions, civil acft ctc twr on 119.9 mc or listen 119.9 mc, trans 122.7 mc at least 10 mi out. During IFR wea, civil acft ctc Apch Ctl on 118.1 or 119.3, or listen 118.1 or 119.3 mc and trans 122.7 mc. USAF-NAVY-CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off-shore W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E-bound from Malibu or Pt Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibility to be added to observations when prevailing visibility is less than 1-1/2 mi.

CALIFORNIA: Hi-intensity apch lgts rnwy 25L converted to centerline system extending 3000' E of rnwy pavement. (6-21)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MOFFETT FIELD-SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-RADIO: About July 24, ILS will be cmsnd. Lclzr freq: 110.1 mc, ident: MRY. Lctd 1000' SE on a centerline of NW/SE rnwy. Glide slope freq: 334.4 mc. Lctd 825' from apch end NW/SE rnwy and 236' N of centerline of rnwy. Glide angle 3.0°. Apch bear.: 84°. LMM freq: 260 kc, ident: RY. MM lctd 0.60 mi from apch end rnwy. LOM freq: 278 kc, ident: MR. OM lctd 5.14 mi from apch end rnwy. Disregard spurious signals. (7-3)

NATIONAL CITY ARPT: Extensive const around arpt. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communication channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (4-24)

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip. working S of lndg area. All booms and equip. lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30)

OCEANSIDE-RADIO: July 10, VOR shut down until approximately October 1 - modernization. (7-9) Durg this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flgts departing LAX via V208 will be cleared from intsxn LAC VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period. (6-7)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg at arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise ctn acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea.

**ONTARIO INTN'L ARPT: 195' lgtd twr erected 6.5 n mi WSW(243°T) at lat 34-01-39, long. 117-43-33. (6-28) Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

OXNARD-VENTURA CO. ARPT: Until approx July 31, 176' lgtd oil drilling derrick erected 1600' W and 2200' N of W end of rnwy 7. (4-30)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

CALIFORNIA: POINT REYES-RADIO: June 27, VOR/DME shut down until approx July 27 - modernization. Durg this period, the following arwys will be unusable: V27 Half Moon Bay-Ukiah; V27W Salinas-Point Reyes: V25 Stinson Beach Int.-Lakeport Int.; V137 Oakland-Bodega Int. Following VHF intsxns will be unusable: Pedro, Cotati, Bodega, Sunset, Rainbow, Frances, Drake, Balboa, Duxbury. MRA of Stinson Beach 5500'. (6-28)
RED BLUFF-RADIO: DME coverage 225°-245° 35 n mi at 10,000'. (6-30)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153° 180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300.-20°, 43 n mi at 7000'.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS.

COLORADO SPRINGS, COLORADO - PETERSON FLD: Combined ILS/ADF Procedure #1, Amend. #6, change effective date from August 3 to July 7, 1957.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		More Than Two Engine, More Than 65 Knots

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype

TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RADAR AVAILABLE : How and Where

(23 July 57)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control Centers (RAPCON), page 4.

RADAR WEATHER ADVISORY SERVICE: See page 4.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

Wichita-McConnell AFB, Kans	332; 113.8, 120.1, 121.5, 124.5, 125.7 134.1, 136.8, 137.88, 142.02, 263.0, 270.6, 289.4, 335.8, 348.6, 379.4, 243.0	ASR-PAR	Arrival & Departure Control avail. Wichita Mun & McConnell only. IFF operg but not cmsnd.
Olathe NAS, Kansas	132.3, 120.9, 124.7, 137.88, 121.5, 236.2, 250.6, 225.4, 363.8, 348.6, 263.0, 243.0		Arrival & Departure Control avail. Olathe NAS, Grandview AFB, Philip Billard Arpt & Forbes AFB.
Austin-Bergstrom AFB, Texas	119.1, 124.9, 125.1, 126.18, 134.1, 136.8, 137.88, 142.02, 225.4, 236.6, 243.0, 270.6, 275.8, 289.4, 305.4, 253.4, 335.8, 344.6, 363.8, 379.4		

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____) IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.
   (a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.
   (b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
   "(aircraft identification) THIS IS (name of radar site), (instructions)"
   The instructions will normally consist of one of the following:
   (a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)
   (b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).
   (c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).
   (d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).
   (e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
   (a) radio contact with the director is lost.
   (b) notified by the radar director that radar contact has been lost.
   (c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

V = 135.9, 135.0 mc transmitted. # = Guards same VHF and UHF frequencies facility transmits except 122.2, 135.0 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g., (3)-135.9, 122.1 guards every frequency in group (3) except 135.9, 122.1 mc. (g) = Twr equipped with 121.9 mc or (g.7) = Twr equipped with 121.7 mc for control of ground traffic. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas. location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --. -... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

NEW YORK ARTC CENTER PREFERENTIAL ROUTES: The preferential routings for outbound IFR flights from the New York metropolitan area appeared in Airgi Jul 9 vol. 12 #9, p. 26. These routes should be selected in filing IFR flight plans from the New York area to and beyond the points shown. This procedure will increase the efficiency of ATC services and should be of considerable assistance to the pilots. This is an experimental project; therefore, your comments will be appreciated. Please address your recommendations to the Office of Air Traffic Control, Civil Aeronautics Administration, Washington 25, D. C.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

WEATHER COLLECTION TIME CHANGE: Effective June 1, 1957, the starting time for hourly sequence collections of aviation weather reports on Service A teletypewriter circuits was changed from 30 minutes past the hour to the hour. Pilots should take full cognizance of this change when checking the latest weather before or in flight. Also, pilots should try to avoid telephoning Weather Bureau or CAA stations for weather information between 45 minutes after the hour and the hour because at this time the stations are routinely occupied with observing the weather.

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outermarker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

WASHINGTON, D. C. HIGH DENSITY AIR TRAFFIC ZONE: Effective April 15, 1957, all the airspace within the current boundaries of the Washington Control Zone extending upwards from the surface to and including an altitude of 3000 feet above the surface is designated as a High Density Traffic Zone, and the Washington National Airport is designated as a High Density Airport. Radio communication must be made with Washington National Airport control tower before commencing a take-off or landing at or entering, the traffic pattern of Washington National Airport, unless prior authorization from the Washington National Airport traffic control tower has been received by aircraft not equipped with functioning two-way radio.

Maximum speed within the zone is 180 mph or 160 knots indicated airspeed unless operational limitations for a particular aircraft require greater airspeeds, in which case the aircraft shall not be flown in excess of the minimum speed consistent with the safe operational limitations of the aircraft.

Pilots should use every effort to maintain a continuous listening watch while within the zone so as to receive any pertinent air traffic information which may be transmitted and thus be alerted to avoid collision hazard within zone.

NEWARK CEILING-VISIBILITY EVALUATION PROGRAM: This program, being conducted at Newark Airport by the U.S. Weather Bureau, changed from furnishing threshold contact height estimates to APPROACH LIGHT CONTACT HEIGHT estimates on May 1, 1957. These estimates will be given out only by the CAA local controller on 118.3 mc at the time each pilot reaches the outer marker inbound for a straight-in ILS approach to rnwy 4. Evaluation of the accuracy and usefulness of these estimates is based solely on the report given by the pilot. Therefore it is important for the report "APPROACH LIGHTS" to be given on 118.3 mc the instant the approach lights are sighted. All pilots are urged to visit the project building adjacent to the control tower or telephone the project personnel at MItchell 2-4414 and give their opinion as to whether the approach light contact heights are of more value than the threshold contact lights.

AIRMAN'S GUIDE PRICE CHANGE: Effective July 1, the annual subscription to the Airman's Guide is being reduced to $2.25 domestic ($3.25 foreign). The Flight Information Manual, which was formerly included in the subscription price to the Guide, is NOT included in the new price. However, all subscribers to the Guide will receive written notice from the Superintendent of Documents when the Manual is issued, giving the price and how it may be purchased. The Manual cost is expected to be approximately $0.50, so that the overall cost of Guide and Manual will remain about the same. The separation of the Guide and Manual is for bookkeeping purposes only; the Guide will continue to supplement the Manual as in the past.

V CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective August 29, 1957, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Green civil airway No. 2 (Seattle, Wash., to Boston, Mass.) is amended by changing the portion which reads: "Bozeman, Mont., radio range station; the intersection of the SE crs of the Bozeman, Mont., radio range and the W crs of the Livingston, Mon., radio range; Livingston, Mont., radio range station;" to read: "Bozeman, Mont., radio range station; Livingston, Mont., nondirectional radio beacon;"

(2) Green civil airway No. 5 (Los Angeles, Calif., to Boston, Mass.) is amended by changing the name of the facility "Los Angeles, Calif., rdo rng stn" to read: "Los Angeles, Calif., nondirectional rdo bcn" (Note: Los Angeles SRA rng to be converted to H facility concurrently)

(3) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska) is amended by changing the name of the facility "Los Angeles, Calif., radio range station;" to read: "Los Angeles, Calif., nondirectional radio beacon;"

(4) Amber civil airway No. 4 (Brownsville, Tex., to Minot, N. Dak.) is amended by changing the portion which reads: "the intersection of the N crs of the San Antonio, Tex., radio range and the SW crs of the Austin, Tex., radio range; Austin, Tex., radio range station; Waco, Tex., radio range station;" to read: "the intersection of the N crs of the San Antonio, Tex., radio range and a line bearing 226°T from the Austin, Tex., nondirectional beacon; Austin, Tex., nondirectional radio beacon; Waco, Tex., radio range station;" and by changing the portion which reads: "From the Kansas City, Mo., radio range station via the Omaha, Nebr., radio range station; Sioux City, Iowa, radio range station;" to read: "From the Omaha, Nebr., radio range station via the Sioux City, Iowa, radio range station;" (Note: Reworded portion in Austin area to go via Austin H due to relocation Austin LF range and conversion to H at lat 30-22-36, long. 97-40-55. Deleted portion between Kansas City and Omaha LF ranges).

(5) Amber civil airway No. 6 (Jacksonville, Fla., to United States-Canadian Border) is amended by changing the portion between the Macon, Ga., radio range station and the Bowling Green, Ky., radio range station to read: "Macon, Ga., radio range station to the Atlanta, Ga., rdo rng stn. From the Nashville, Tenn., rdo rng stn via the intersection of the NW crs of the Nashville, Tenn., rdo rng and the SW crs of the Bowling Green, Ky., rdo rng; Bowling Green, Ky., rdo rng stn;" (Note: Deleted portion between Atlanta and Nashville LFR stns, due to decommissioning of Chattanooga LFR to be concurrent)

(6) Amber civil airway No. 8 (Los Angeles, Calif., to Ellensburg, Wash.) is amended by changing the first portion to read: "From the Los Angeles, Calif., nondirectional rdo bcn via the intersection of a line bearing 260°T from the Los Angeles nondirectional rdo bcn and the SE crs of the Camarillo, Calif., rdo rng; Camarillo, Calif., rdo rng stn to the Santa Barbara, Calif., rdo rng stn."

(7) Red civil airway No. 10 (Amarillo, Tex., to Augusta, Ga.) is amended by changing the portion which reads: "Wichita Falls, Tex., rdo rng stn; the intersection of the SE crs of the Wichita Falls, Tex., rdo rng and the N crs of the Fort Worth, Tex., rdo rng; Dallas, Tex. rdo rng stn; Shreveport, La., rdo rng stn;" to read: "Wichita Falls, Tex., rdo rng station; Dallas, Tex., nondirectional rdo bcn; Shreveport, La., rdo rng stn;"

(8) Red civil airway No. 32 (Laredo, Tex., to Houston, Tex.) is amended by changing the portion which reads: "From the Austin, Tex., rdo rng stn" to read: "From the Austin, Tex, nondirectional rdo bcn."

(9) Red civil airway No. 48 (Helena, Mont., to Livingston, Mont.) is revoked.

(10) Red civil airway No. 52 (Memphis, Tenn., to Birmingham, Ala.) is amended to read: "From the Memphis, Tenn., rdo rng stn via the Muscle Shoals, Ala., rdo rng stn; the intersection of the SE crs of the Muscle Shoals, Ala., rdo rng and the N crs of the Birmingham, Ala., rdo rng to the Birmingham, Ala., rdo rng stn." (Note: Added portion from Garden City intersection to Birmingham in lieu of Blue 2, revoked that area)

(11) Red civil airway No. 65 (Los Angeles, Calif., to Hayfield Lake, Calif.) is amended to read: "From the Los Angeles, Calif., nondirectional rdo bcn via the intersection of a line bearing 175°T from the Los Angeles nondirectional rdo bcn and a line bearing 279°T from the Oceanside, Calif., nondirectional rdo bcn; Oceanside, Calif., nondirectional rdo bcn; Julian, Calif., nondirectional rdo bcn to the Hayfield Lake, Calif., nondirectional rdo bcn."

(12) Red civil airway No. 68 (Midland, Tex., to Shreveport, La.) is amended by changing the portion which reads: "From the intersection of the W crs of the Fort Worth, Tex., rdo rng and the NW crs of the Waco, Tex., rdo rng via the intersection of the NW crs of the Waco, Tex., rdo rng and the W crs of the Dallas, Tex., rdo rng to the Dallas, Tex., rdo rng stn." to read: "From the intersection of the W crs of the Fort Worth, Tex., rdo rng and the NW crs of the Waco, Tex., rdo rng via the intersection of the NW crs of the Waco, Tex., rdo rng and a line bearing 255°T from the Dallas nondirectional rdo bcn to the Dallas, Tex., nondirectional rdo bcn." (Note: Due to conversion Dallas rng to "H" facility concurrently) (H to be located at lat 32-49-07, long. 96-51-30 - about 1/2 mi N of SRA site)

(13) Red civil airway No. 93 (Lincoln, Nebr., to Omaha, Nebr.) is revoked.

(14) Blue civil airway No. 2 (Montgomery, Ala., to Erie, Pa.) is amended by changing entire first portion to read: "From the intersection of the N crs of the Crestview, Fla., rdo rng and the SE crs of the Craig, Ala., AFB., rdo rng via the intersection of the SE crs of the Craig, Ala., AFB radio rng and the S crs of the Birmingham, Ala., rdo rng to the Birmingham, Ala., rdo rng stn." (Note: deleted portion between Birmingham and Chattanooga and Knoxville, due to decommissioning Chattanooga SRA concurrently)

(15) Blue civil airway No. 5 (Galveston, Tex., to Wichita, Kans.) is amended by changing the portion which reads: "the intersection of the NE crs of the Waco, Tex., rdo rng and the S crs of the Dallas, Tex., rdo rng; Dallas, Tex., rdo rng stn;" to read: "the intersection of the NE crs of the Waco, Tex., rdo rng and a line bearing 185°T from the Dallas nondirectional rdo bcn; Dallas, Tex., nondirectional rdo bcn;"

(16) VOR civil airway No. 5 (Jacksonville, Fla., to London, Ont.) is amended by changing the portion which reads: "Mansfield, Ohio, omnirange stn, including an E alternate from the Appleton omnirange stn to the Mansfield omnirange stn via the intersection of the Appleton omnirange 050°T and the Mansfield omnirange 173°T radials;" to read: "Mansfield, Ohio, omnirange stn;" (Note: Revoked V5E between Appleton VOR and Mansfield VOR.)

(17) VOR civil airway No. 6 (Oakland, Calif., to New York, N. Y.) is amended by changing the portion which reads: "Youngstown, Ohio, omnirange stn, including a N alternate;" to read: "Youngstown, Ohio, omnirange stn;" (Note: Revoked V6N between Cleveland VOR and Youngstown VOR.)

(18) VOR civil airway No. 7 (Miami, Fla., to Green Bay, Wis.) is amended by changing the portion which reads: "Cross City, Fla., omnirange stn, including a W alternate from the Fort Myers omnirange stn to the Cross City omnirange stn via the Tampa, Fla., omnirange stn and the intersection of the Tampa omnirange 012°T and the Cross City omnirange 150°T radials;" to read: "Cross City, Fla., omnirange stn, including a W alternate from the Fort Myers omnirange stn to the Cross City omnirange stn via the Tampa, Fla., omnirange stn and the intersection of the Tampa omnirange 012°T and the Cross City omnirange 150°T radials and also an E alternate from the Lakeland omnirange stn to the Cross City omnirange stn via the Gainesville, Fla, omnirange stn;" (Note: Added V7E between Lakeland VOR and Cross City VOR via the Gainesville VOR.)

(19) VOR civil airway No. 12 (Santa Barbara, Calif., to Philadelphia, Pa.) is amended by changing the portion which reads: "Indianapolis, Ind., omnirange stn, including a S alternate via the intersection of the Terre Haute omnirange 082°T and the Indianapolis omnirange 230°T radials; Dayton, Ohio, omnirange stn, including a N alternate; Appleton, Ohio, omnirange stn, including a N alternate via the intersection of the Dayton omnirange 060°T and the Appleton omnirange 277°T radials; Wheeling, W. Va., omnirange stn, including a N alternate via the point of intersection of the Mansfield, Ohio, omnirange 121°T and the Wheeling omnirange 282° T radials;" to read: "Indianapolis, Ind., omnirange stn, including a S alternate via the intersection of the Terre Haute omnirange 082°T and the Indianapolis omnirange 230°T radials; point of intersection of the Indianapolis omnirange 084°T and the Dayton omnirange 261°T radials; Dayton, Ohio, omnirange stn, including a N alternate from the Indianapolis omnirange stn to the Dayton omnirange stn via the point of intersection of the Indianapolis omnirange 069° T and the Fort Wayne, Ind., omnirange 182°T radials; Appleton, Ohio, omnirange stn, including a S alternate via the point of intersection of the Dayton omnirange 099°T and the Appleton omnirange 244°T radials; Wheeling, W. Va., omnirange stn; including a S alternate via the point of intersection of the Wheeling omnirange 252°T radial with the Appleton omnirange direct to the Morgantown, W. Va., omnirange stn;" (Note: Redesignated V12 between Indianapolis VOR and Wheeling VOR. Redesignated V12N Indianapolis VOR to Dayton VOR. Revoked V12N between Appleton VOR and Dayton VOR and between Appleton VOR and Wheeling VOR. Redesignated V12S between Dayton VOR and Appleton VOR and between Appleton VOR and Wheeling VOR.)

(20) VOR civil airway No. 14 (Rosewell, N. Mex., to Boston, Mass.) is amended by changing the portion which reads: "Cleveland, Ohio, omnirange stn; Erie, Pa., omnirange stn, including a N alternate;" to read: "Cleveland, Ohio, omnirange stn; Jefferson, Ohio omnirange stn; Erie, Pa., omnirange stn, including a N alternate from the Cleveland omnirange stn to the Erie omnirange stn via the point of intersection of the Cleveland omnirange 049°T and the Carleton, Mich., omnirange direct radial to the Jefferson, Ohio, omnirange stn;" (Note: Redesignated V14 between Cleveland VOR and Erie VOR via Jefferson VOR. Redesignated V14N between Cleveland VOR and Erie VOR via the Fairport Intersection.)

(21) VOR civil airway No. 16 (Los Angeles, Calif., to Boston, Mass.) is amended by changing the portion which reads: "Big Spring, Tex., omnirange stn, including a N alternate from the Wink omnirange stn to the Big Spring omnirange stn via the intersection of the Wink omnirange 066°T and the Big Spring omnirange 271°T radials;" to read: "Big Spring, Texas, omnirange stn, including a N alternate from the Wink omnirange stn to the Big Spring omnirange stn via the point of intersection of the Midland, Tex., omnirange 007°T and the Big Spring omnirange 260°T radials;" (Note: Redesignated V16N between Wink VOR and relocated Big Spring VOR via Mustang Intersection.)

(22) VOR civil airway No. 36 (Toronto, Ontario, to New York, N. Y.) is amended by changing the portion which reads: "Buffalo, N. Y., omnirange stn;" to read: "Buffalo, N. Y., omnirange stn, including a S alternate from the Toronto omnirange stn to the Buffalo omnirange stn via the intersection of the Toronto omnirange 172°T and the Buffalo omnirange 294°T radials;" (Note: Added V36S between Toronto VOR and Buffalo VOR.)

(23) VOR civil airway No. 38 (Iowa City, Iowa, to Elkins, W. Va.) is amended by changing the portion which reads: "Appleton, Ohio, omnirange stn, including a S alternate via the

point of intersection of the Findlay omnirange 144°T and the Mansfield, Ohio, omnirange 241° T radials;" to read: "Appleton, Ohio, omnirange stn, including a S alternate via the point of intersection of the Findlay omnirange 144°T radial with the Sidney, Ohio, omnirange direct radial to the Tiverton, Ohio, omnirange stn;" (Note: Redesignated V38S between Findlay VOR and Appleton VOR via the Richwood Intersection.)

(24) VOR civil airway No. 43 (Columbus, Ohio, to Erie, Pa.) is amended to read: "From the Appleton, Ohio, omnirange station via the Tiverton, Ohio, omnirange stn; Youngstown, Ohio, omnirange stn; to the Erie, Pa., omnirange stn." (Note: Added Tiverton VOR to V43.)

(25) VOR civil airway No. 47 (Louisville, Ky., to Detroit, Mich.) is amended by changing all before the Waterville, Ohio, omnirange stn to read: "From the Louisville, Ky., omnirange stn via the Nabb, Ind., omnirange stn; Cincinnati, Ohio, omnirange stn; Sidney, Ohio, omnirange stn, including a W alternate from the Cincinnati omnirange station to the Sidney omnirange stn via the point of intersection of the Cincinnati omnirange 004°T radial with the Dayton Ohio, Dayton Airport ILS localizer SW crs and the point of intersection of the Dayton Airport ILS localizer SW crs with the Sidney omnirange direct radial to the Cincinnati omnirange stn; Findlay, Ohio, omnirange stn; Waterville, Ohio, omnirange stn;" (Note: Redesignated V47 between Cincinnati VOR and Findlay VOR via Sidney VOR rather than Dayton VOR. Revoked V47W between Dayton VOR and Findlay VOR. Redesignated V47W from Cincinnati VOR to Dayton VOR to be from Cincinnati VOR to Sidney VOR.)

(26) VOR civil airway No. 55 (Dayton, Ohio to Green Bay, Wis.) is amended by changing the portion which reads: "From the Dayton, Ohio omnirange stn via the Fort Wayne, Ind., omnirange stn, including a W alternate; Goshen, Ind., omnirange stn;" to read: "From the Dayton, Ohio, omnirange stn via the Fort Wayne, Ind., omnirange stn, including a W alternate via the point of intersection of the Fort Wayne omnirange 162°T with the Sidney, Ohio omnirange 279°T radials; Goshen, Ind., omnirange stn;including a W alternate via the point of intersection of the Goshen omnirange 168°T with the Fort Wayne omnirange direct radial to the Peotone, Ill., omnirange stn;" (Note: Redesignated V55W between Dayton VOR and Fort Wayne VOR via the Portland Intersection. Added V55W between Fort Wayne VOR and Goshen.)

(27) VOR civil airway No. 66 (San Diego, Calif., to Sulphur Springs, Tex.) is amended by changing the portion which reads: "intersection of the Midland omnirange 090°T and the Abilene omnirange 247°T radials;" to read: "point of intersection of the Midland omnirange 084°T and the Big Spring, Tex., omnirange 139°T radials;" (Note: Redesignated V66 between Midland VOR and Abilene VOR via relocated Jack Intersection.)

(28) VOR civil airway No. 68 (Albuquerque, N. Mex., to Brownsville, Tex.) is amended by changing the portion which reads: "intersection of the San Antonio omnirange 168°T and the Corpus Christi omnirange 321°T radials;" to read: "intersection of the San Antonio omnirange 167°T and the Corpus Christi omnirange 321°T radials;" (Note: Changed San Antonio 168°T to 167°T in order to depict San Antonio 158°M on charts.)

(29) VOR civil airway No. 72 (Troy, Ill., to Albany, N.Y.) is amended by changing the portion which reads: "Youngstown, Ohio, omnirange stn; Bradford, Pa., omnirange stn;" to read: "Youngstown, Ohio omnirange stn; point of intersection of the Fitzgerald, Pa., omnirange 304°T and the Bradford omnirange 260°T radials; Bradford, Pa., omnirange stn;" (Note: Redesignated V72 between Youngstown VOR and Bradford VOR via Titusville Intersection.)

(30) VOR civil airway No. 76 (Lubbock, Tex., to Galveston, Tex.) is amended to read: "From the Lubbock, Tex., omnirange stn via the Big Spring, Tex., omnirange stn; San Angelo, Tex., omnirange stn, including a N alternate via the point of intersection of the Big Spring omnirange 124°T and the San Angelo omnirange 024°T radials; Austin, Tex., omnirange stn; Houston, Tex., omnirange stn; to the Galveston, Tex., omnirange stn." (Note: Redesignated V76 from Lubbock VOR direct to relocated Big Spring VOR. Redesignated V76N from relocated Big Spring VOR to San Angelo VOR via relocated Rowena Intersection.)

(31) VOR civil airway No. 81 (Midland, Tex., to Salt Lake City, Utah) is amended by adding a new last portion to read: "From the Grand Junction, Colo., omnirange stn via the Myton Utah, omnirange stn; to the Salt Lake City, Utah, omnirange stn." (Note: Added new portion to V81 from Grand Junction VOR to Salt Lake City VOR.)

(32) VOR civil airway No. 102 (Lubbock, Tex., to Wichita Falls, Tex.) is amended to read: "From the Lubbock, Tex., omnirange stn via the Guthrie, Tex., omnirange stn; to the Wichita Falls, Tex., omnirange stn; including a S alternate via the intersection of the Guthrie omnirange 103°T and the Wichita Falls omnirange 247°T radials." (Note: Added V102S Guthrie VOR to Wichita Falls VOR.)

(33) VOR civil airway No. 126 (Chicago, Ill., to New York, N. Y.) is amended by changing the portion which reads: "Cleveland, Ohio, omnirange stn; Erie, Pa., omnirange stn;" to read: "Cleveland, Ohio, omnirange stn; Jefferson, Ohio omnirange stn; Erie, Pa., omnirange stn;" (Note: Redesignated V126 between Cleveland VOR and Erie VOR via Jefferson VOR.)

(34) VOR civil airway No. 133 (Parkersburg, W. Va., to Flint, Mich.) is amended to read: "That airspace over United States territory from the Parkersburg, W. Va., omnirange stn via the point of intersection of the Wheeling, W. Va., omnirange 252°T radial with the Appleton, Ohio, omnirange direct radial to the Morgantown, W. Va., omnirange stn; Tiverton, Ohio, omnirange stn; Mansfield, Ohio, omnirange stn; intersection of the Mansfield omnirange 345°T and the Salem omnirange 140°T radials; Salem, Mich., omnirange stn; to the point of intersection of the Salem omnirange 342°T and the Lansing, Mich., omnirange 068°T radials." (Note: Redesignated V133 between Parkersburg, VOR and Mansfield VOR via the Cambridge intersection and the Tiverton VOR.)

(35) VOR civil airway No. 144 (Chicago, Ill., to Washington, D.C.) is amended by changing the portion which reads: "Findlay, Ohio, omnirange stn; Mansfield, Ohio, omnirange stn; Morgantown, W. Va., omnirange stn;" to read: "Findlay, Ohio, omnirange stn; Appleton, Ohio omnirange stn; Morgantown, W. Va., omnirange stn;" (Note: Redesignated V144 between Findlay VOR and Morgantown VOR. Deleted Mansfield VOR and added Appleton VOR.)

(36) VOR civil airway No. 159 (Miami, Fla., to Albany, Ga.) is amended by changing the portion which reads: "Orlando, Fla., omnirange stn; Cross City, Fla., omnirange stn; to the Albany, Ga., omnirange stn." to read: "Orlando, Fla., omnirange stn; point of intersection of the Orlando omnirange 306°T and the Lakeland, Fla., omnirange 012°T radials; Gainesville, Fla., omnirange stn; point of intersection of the Tallahassee, Fla., omnirange 091°T and the Cross City, FLa., omnirange 333°T radials; to the Albany, Ga., omnirange stn, including a W alternate from the Orlando omnirange stn to the Albany omnirange stn via the point of intersection of the Orlando omnirange 306°T with the Lakeland, Fla., omnirange 012°T radials, the Cross City, Fla., omnirange stn and the point of intersection of the Tallahassee, Fla., omnirange 091°T with the Cross City, Fla., omnirange 333°T radials." (Note: Redesignated V159 from Orlando VOR to Albany VOR via the Leesburg Intersection, Gainsville VOR and the Greenville Intersection. Designated former portion of V159 from Orlando VOR to Albany VOR via Cross City VOR as V159W.)

(37) VOR civil airway No. 163 (Brownsville, Tex., to Oklahoma City, Okla.) is amended by changing the portion which reads: "intersection of the Alice omnirange 350°T and the San Antonio omnirange 168°T radials; to read: "intersection of the Alice omnirange 350°T and the San Antonio omnirange 167°T radials;" (Note: Changed San Antonio 168°T to 167°T in order to depict San Antonio 158°M on charts.)

(38) VOR civil airway No. 184 (Erie, Pa., to Philipsburg, Pa.) is amended to read: "From the Erie, Pa., omnirange stn via the point of intersection of the Bradford, Pa., omnirange 260°T and the Fitzgerald omnirange 304°T radials; Fitzgerald, Pa., omnirange stn; to the Philipsburg, Pa., omnirange stn." (Note: Redesignated V184 between Erie VOR and Fitzgerald VOR via the Titusville Intersection.)

(39) VOR civil airway No. 188 (Detroit, Mich., to New York, N.Y.) is amended by changing the portion which reads: "That airspace of United States territory from the Carleton, Mich, omnirange stn via the Jefferson, Ohio, omnirange stn; Fitzgerald, Pa., omnirange stn;" to read: "That airspace over United States territory from the Carleton, Mich., omnirange stn via the Jefferson, Ohio omnirange stn; point of intersection of the Bradford, Pa., omniragne 260°T and the Fitzgerald omnirange 304°T radials; Fitzgerald, Pa., omnirange stn;" (Note: Redesignated V188 between Jefferson VOR and Fitzgerald VOR via Titusville Intersection.)

(40) VOR civil airway No. 195 (Oakland, Calif., to Fortuna, Calif.) is amended by changing the portion which reads: "to the Red Bluff, Calif., omnirange stn." to read: "Red Bluff, Calif, omnirange stn; to the Fortuna, Calif., omnirange stn." (Note: Added new portion to V195 from Red Bluff VOR toFortuna VOR.)

(41) VOR civil airway No. 197 (Toledo, Ohio, to Detroit, Mich.) is revoked.

(42) VOR civil airway No. 200 (Ukiah, Calif., to Kremmling, Colo.) is amended by adding a new last portion to read: "From the Utah Lake, Utah, omnirange stn via the Myton, Utah, omnirange stn; to the Kremmling, Colo., omnirange stn." (Note: Added new portion to V200 from Utah Lake VOR to Kremmling VOR via Myton VOR.)

(43) VOR civil airway No. 202 (Tuscon, Ariz., toTruth or Consequences, N. Mex.) is amended to read: "From the Tucson, Ariz., rdo rng stn via the point of intersection of a straight line bearing 157°T from the Tucson rdo rng stn with the Cochise omnirange 257°T radial; Cochise, Ariz., omnirange stn; San Simon, Ariz., omnirange stn; to the Truth or Consequences, N. Mex., omnirange stn." (Note: Added new portion to V202 from Cochise VOR to Truth or Consequences, VOR.)

(44) VOR civil airway No. 210 (Los Angeles, Calif., to Wheeling, W. Va.) is amended by adding a new last portion to read: "From the point of intersection of the Indianapolis, Ind., omnirange 069°T and the Fort Wayne, Ind., omnirange 182°T radials via the Sidney, Ohio, omnirange stn; Tiverton, Ohio, omnirange stn, intersection of the Tiverton omnirange 096°T and the Wheeling omnirange 282°T radials; to the Wheeling, W. Va., omnirange stn." (Note: Added new portion to V210 from Cowan Intersection to Wheeling VOR.)

(45) VOR civil airway No. 232 (Cleveland, Ohio, to Fitzgerald, Pa.) is added to read: "From the point of intersection of the Cleveland, Ohio, omnirange direct radial to the Jefferson Ohio, omnirange stn with the Chardon omnirange 280°T radial via the Chardon, Ohio, omnirange stn; to the Fitzgerald, Pa., omnirange stn." (Note: New airway.)

(46) VOR civil airway No. 275 (Cincinnati, Ohio, to Detroit, Mich.) is added to read: "From the Cincinnati, Ohio, omnirange stn via the point of intersection of the Cincinnati, Ohio, range 004°T and the Dayton omnirange 208°T radials; Dayton, Ohio, omnirange stn; point of intersection of the Findlay omnirange 211°T radial with the Sidney, Ohio, omnirange direct radial to the Fort Wayne, Indiana, omnirange stn; Findlay, Ohio omnirange stn; Waterville, Ohio, omnirange stn; to the Carleton, Mich., omnirange stn." (Note: New airway. Portion Waterville VOR to Carleton VOR was formerly V197. Portion Findlay VOR to Waterville is existing part of V47.)

(47) VOR civil airway No. 276 (Yardley, Pa., to Monmouth, N.J.) is amended by adding a new last sentence to read: "the portion of this airway which conflicts with the Lakehurst Caution Area (C-24) is excluded."

(48) VOR civil airway No. 277 (Plain City, Ohio, to Keeler, Mich.) is amended to read: "From the point of intersection of the Sidney omnirange 109°T radial with the Appleton, Ohio, omnirange direct radial to the Dayton, Ohio, omnirange stn; via the Sidney, Ohio, omnirange

stn; Fort Wayne, Ind., omnirange stn; to the Keeler, Mich., omnirange stn." (Note: Added new portion to V277 from Plain City Intersection to Fort Wayne VOR.)

(49) VOR civil airway No. 278 (Guthrie, Tex., to Fort Worth, Tex.) is added to read: "From the Guthrie, Tex., omnirange stn to the Fort Worth, Tex., omnirange stn." (Note: New airway.)

(50) VOR civil airway No. 279 (unassigned)

(51) VOR civil airway No. 1502 (San Francisco, Calif., to New York, N. Y.) is amended by changing the portion which reads: "From the Lone Rock, Wis., omnirange stn via the intersection of the Lone Rock omnirange 103°T and the Milwaukee omnirange 273°T radials; to the Milwaukee, Wis., omnirange stn. From the Lansing, Mich., omnirange stn to the Salem, Mich., omnirange stn. From the Erie, Pa., omnirange stn via the Bradford., Pa., omnirange stn;" to read: "From the Lone Rock, Wis., omnirange stn via the intersection of the Lone Rock omnirange 103°T and the Milwaukee omnirange 273°T radials; Milwaukee, Wis., omnirange stn; Muskegon, Mich., omnirange stn; Lansing, Mich., omnirange stn; Salem, Mich omnirange stn; Windsor, Ont., omnirange stn; Erie, Pa., omnirange stn; Bradford, Pa., omnirange stn;" (Note: Added new portion to V1502 from Milwaukee VOR to Lansing VOR via Muskegon VOR. Added new portion to V1502 from Salem VOR to Erie VOR via Windsor VOR.)

(52) VOR civil airway No. 1504 (San Francisco, Calif., to Washington, D. C.) is amended by changing the portion which reads: "to the Carleton, Mich., omnirange stn. From the Cleveland, Ohio, omnirange stn via the Wheeling, W. Va., omnirange stn;" to read: "Carleton Mich., omnirange stn; intersection of the Carleton omnirange 097°T and the Cleveland omnirange 327°T radials; Cleveland, Ohio, omnirange stn; Wheeling, W. Va., omnirange stn;" (Note: Added new portion to V1504 from Carleton VOR to Cleveland VOR, via the Pelee Intersection.)

(53) VOR civil airway No. 1506 (San Francisco, Calif., to Washington, D. C.) is amended by changing the portion which reads: "Mansfield, Ohio, omnirange stn;" to read: "Appleton, Ohio, omnirange stn;" (Note: Redesignated V1506 between Waterville VOR and Morgantown VOR via Appleton VOR rather than Mansfield VOR.)

(54) VOR civil airway No. 1508 (Los Angeles, Calif., to New York, N.Y.) is amended by changing the portion which reads: "to the Carleton, Mich., omnirange stn. From the Jefferson, Ohio, omnirange stn via the Fitzgerald, Pa., omnirange stn;" to read: "Carleton, Mich, omnirange stn; Jefferson, Ohio, omnirange stn; point of intersection of the Bradford, Pa., omnirange 260°T and the Fitzgerald omnirange 304°T radials; Fitzgerald, Pa., omnirange stn;" (Note: Added new portion to V1508 from Carleton VOR to Jefferson VOR direct.)

(55) VOR civil airway No. 1512 (Los Angeles, Calif., to New York, N.Y.) is amended by changing the portion which reads: "From the Indianapolis, Ind., omnirange stn via the Dayton, Ohio, omnirange stn;" to read: "From the Indianapolis, Ind., omnirange stn via the intsxn of the Indianapolis, omnirange 084° T and the Dayton omnirange 261° T radials; Dayton, Ohio omnirange stn;"

(56) VOR civil airway No. 1514 (San Francisco, Calif., to New York, N. Y.) is amended by changing the portion which reads: "From the Indianapolis, Ind., omnirange stn via the Dayton, Ohio, omnirange stn;" to read: "From the Indianapolis, Ind., omnirange stn via the intersection of the Indianapolis omnirange 084°T and the Dayton omnirange 261°T radials; Dayton, Ohio, omnirange stn." (Note: Added dog-leg to V1514 between Indianapolis VOR and Dayton VOR.)

CONTROL AREAS:

(1) Red civil airway No. 48 (Helena, Mont., to Livingston, Mont) is revoked.

(2) Red civil airway No. 93 (Lincoln, Nebr., to Omaha, Nebr.) is revoked.

(3) VOR civil airway No. 36 (Toronto, Ontario, Canada to N.Y.) is amended to read: "All of VOR civil airway No. 36, including S alternates."

(4) VOR civil airway No. 55 (Dayton, Ohio, to Green Bay, Wis.) is amended to read: "All of VOR civil airway No. 55 including W alternates, but excluding the airspace between the main airway and its W alternate from the Fort Wayne, Ind., omnirange stn to the Goshen, Ind., omnirange stn."

(5) VOR civil airway No. 81 (Midland, Tex., to Salt Lake City, Utah) is amended to read: "All of VOR civil airway No. 81, including E alternates."

(6) VOR civil airway No. 102 (Lubbock, Tex., to Wichita Falls, Tex.) is amended to read: "All of VOR civil airway No. 102, including a S alternate."

(7) VOR civil airway No. 133 (Parkersburg, W. Va., to Flint, Mich.) is amended to read: "All of VOR civil airway No. 133."

(8) VOR civil airway No. 159 (Miami, Fla., to Albany, Ga.) is amended to read: "All of VOR civil airway No. 159, including a W alternate."

(9) VOR civil airway No. 197 (Toledo, Ohio, to Detroit, Mich.) is revoked.

(10) VOR civil airway No. 195 (Oakland, Calif., to Fortuna, Calif.) is amended to read: "All of VOR civil airway No. 195 including a W alternate."

(11) VOR civil airway No. 275 (Cincinnati, Ohio, to Detroit, Mich.) is added to read: "All of VOR civil airway No. 275."

(12) VOR civil airway No. 200 (Ukiah, Calif., to Kremmling, Colo.) is amended to read: "All of VOR civil airway No. 200."

(13) VOR civil airway No. 202 (Tucson, Ariz., to Truth or Consequences, N. Mex.) is amended to read: "All of VOR civil airway No. 202."

(14) VOR civil airway No. 210 (Los Angeles, Calif., to Wheeling, W. Va.) is amended to read: "All of VOR civil airway No. 210."

(15) VOR civil airway No. 232 (Cleveland, Ohio, to Fitzgerald, Pa.) is added to read: "All of VOR civil airway No. 232."

(16) VOR civil airway No. 277 (Plain City, Ohio, to Keeler, Mich.) is amended to read: "All of VOR civil airway No. 277."

(17) VOR civil airway No. 278 (Guthrie, Tex., to Fort Worth, Tex.) is added to read: "All of VOR civil airway No. 278."

(18) VOR civil airway No. 279 (unassigned)

CONTROL AREA EXTENSIONS:

(1) (Austin, Tex.) is amended to read: "The airspace within a 40 mi radius of the Austin non-directional rdo bcn, excluding the portion which overlaps restricted area (R-343)."

(2) (Oceanside, Calif.) is revoked.

(3) (Burbank, Calif.) is amended by changing the last portion to read: "and on the W by a line 5 mi W of and parallel to a direct line between the Burbank, Calif. ILS outer marker and the intersection ot the SE crs of the Camarillo, Calif., rdo rng with a line bearing 260°T from the Los Angeles, Calif., non-directional rdo bcn."

(4) (Los Angeles, Calif.) is revoked.

(5) (Omaha, Nebr.) is amended by adding the following portion to present control area extension: "All of the airspace SE of Omaha within a 25 mi radius of the Omaha omnirange stn bounded on the N by VOR civil airways No. 6 and 8 and the W by VOR civil airway No 15."

(6) (Stuttgart, Ark.) is revoked.

(7) (Montague, Calif.) is added to read: "Within 5 mi either side of a line bearing 170°T extending from the Montague nondirectional rdo beacon to a point 10 mi S."

(8) (Dallas, Tex.) is amended by changing the name of the facility: "Dallas, Tex. rdo rng stn" to read: "Dallas. Tex., nondirectional rdo bcn."

(9) (Miramar, Calif.) is amended by deleting the words which read: "excluding the airspace below 15,000 ft MSL, which lies within restricted area (R-297)."

(10) (Springfield, Ill.) is amended to read: "The airspace wtihin a 15 mi radius of Springfield omnirange stn extending clockwise from the centerline of VOR civil airway No. 233 N of Springfield to the centerline of VOR civil airway No. 50 W of Springfield, and within a 25 mi radius of the omnirange stn extending clockwise from the centerline of VOR civil airway No. 50 W of Springfield to the centerline of VOR civil airway No. 233 N of Springfield, Ill."

(11) (Wichita, Kans.) is amended to read: "All of the airspace bounded on the N by a line 10 mi N of and parallel to the 259°T and 79°T radials of the Emporia, Kans, omnirange, on the E by a line 10 mi E of and parallel to the 209°T and 29°T radials of the Emporia, Kans., omnirange to and along the southern boundary of Red civil airway No. 105 to a point at lat 37-45-00, long. 96-04-15, thence direct to lat 37-22-00, long. 96-11-00, thence direct to lat 37-08-30, long. 96-11-00; on the S by a line 10 mi S of and parallel to the 85°T and 265°T radials of the Anthony, Kans., omnirange; on the W by a line 10 miW of and parallel to the 195°T and 15°T radials of the Hutchinson, Kans., omnirange; that airspace within 5 mi either side of a direct line extending from the Wichita, Kans., omnirange stn to the Tulsa, Okla. omnirange stn."

(12) (Dallas, Tex.) (Dallas-Houston-Austin Area) is amended by changing the last portion which reads: "to the Dallas, Tex., rdo rng stn." to read: "to the Dallas, Tex., nondirectional rdo bcn."

(13) (Del Rio, Tex.) is amended to read: "That airspace over United States territory within a 55 mi radius of Laughlin Air Force Base, Del Rio, Tex."

(14) (Chattanooga, Tenn.) is amended to read: "That airspace within a 30 mi radius ot the Chattanooga omnirange stn."

(15) (Duluth, Minn.) is amended to read: "The airspace within a 25 mi radius of the Duluth Airport including the airspace within a 30 mi radius of the Duluth omnirange stn bounded on the N by the 274°T radial of the Duluth omnirange and on the E by VOR civil airway No. 13."

(16) (Wichita Falls, Tex.) is added to read: "That airspace bounded on the NW by VOR civil airway No. 102-S on the E by VOR civil airway No. 77, and on the S by VOR civil airway No. 278."

(17) (Bozeman, Mont.) is added to read: "Within 5 mi either side of the SE crs of the Bozeman rdo rng extending from the rdo rng stn to a point 10 mi SE."

(18) (Billings, Mont.) is added to read: "The airspace NW of Billings, Mont., within a 20 mi radius of the Billings omnirange stn bounded on the S by VOR civil airway No. 2 and on the E by VOR civil airway No. 19."

(19) (Ephrata, Wash.) is added to read: "The airspace N of VOR civil airway No. 2 within a 25 mi radius of the Ephrata omnirange stn, excluding the portion which overlaps Coulee Dam restricted area (R-248)." (Note: Airspace Panel Meeting 501 recommended Caution Area C-250 be rescinded.)

(20) (Key West, Fla.) is added to read: "The airspace within 5 mi either side of a direct line extending from the Key West, Fla., rdo rng stn to the Tamiami, Fla., nondirectional rdo bcn, excluding the airspace above 20,000 ft MSL."

CONTROL ZONES:

(1) Three mile radius zones is amended by deleting the following airport: "Pocatello, Idaho: Phillips Airport."

(2) Five mile radius zones is amended by adding the following airports: "Chattanooga, Tenn.: Lovell Field; Fayetteville, Ark.: Fayetteville-Drake Field."

(3) (Big Spring, Tex.) is amended by adding the following portion to present control zone: "and within 2 mi either side of the 191°T radial of the Big Spring omnirange extending from the 5 mi radius zone to the omnirange stn."

(4) (Dallas, Tex.) is amended by changing the portion which reads: "within 2 mi either side of the S crs of the Dallas rdo rng extending from the rdo rng stn to the Duncanville fan marker," to read: "within 2 mi either side of a 185°T bearing extending from the Dallas nondirectional rdo bcn to the Duncanville fan marker,"

(5) (Fort Worth, Tex.) is amended by changing the portion which reads: "within 2 mi either side of the S crs of the Ft. Worth rdo rng extending to the intersection of the S crs of the Ft. Worth rdo rng with the W crs of the Dallas, Tex., rdo rng," to read: "within 2 mi either side of the S crs of the Ft Worth rdo rng extending to its intersection with a line bearing 255°T from the Dallas, Tex., nondirectional rdo bcn,"

(6) (Cleveland, Ohio) is amended by adding the following portion to read: "and within 2 mi either side of the extended centerline of rnwy 23R extending to a point 18 mi NE of the end of the rnwy." (Note: H facility to be installed at approx lat 41-29-29, long. 81-43-33, Control zone to be 10 mi NE of H, when commissioned)

(7) (Louisville, Ky.) is amended by deleting the portion which reads: "extending 2 mi either side of a line bearing 87°T from Bowman Field to a point 11 mi E of the field,"

(8) (Langley AFB, Va.) is revoked.

(9) (Hampton Roads, Va.) is added to read: "Within a 5 mi radius of Langley AFB and within 2 mi either side of the extended centerline of rnwy 25 extending from the 5 mi radius zone to a point 6 mi SW of the Morrison nondirectional rdo bcn, excluding the portion which overlaps restricted area R-49."

(10) (Chattanooga, Tenn.) is revoked. (Note: Added to 5 mi radius zone section as portion on NE leg SRA rng rescinded when SRA decommissioned-concurrently herewith)

(11) (Newport News, Va.) is added to read: "Within a 5 mi radius of Patrick Henry Airport and within 2 mi either side of the ILS localizer crs extending from the localizer to a point 10 mi SW of the outer marker, excluding the portion which overlaps the Hampton Roads, Va. (Langley AFB) control zone."

(12) (Los Angeles, Calif.) is amended to read: "Within a 5 mi radius of the Los Angeles International Airport, within 2 mi either side of the ILS E crs extending from the localizer to a point 6 mi E of the airport, and within 2 mi either side of a line bearing 338°T from the Los Angeles nondirectional rdo bcn extending to the Burbank, Calif., control zone."

(13) (Oakland, Calif.), is amended by changing the last portion which reads: "and within 2 mi either side of the SE crs of the Oakland rdo rng extending from the rdo rng stn to the Fremont fan marker," to read: "and within 2 mi on the SW side and 7 mi on the NE side of the SE crs of the Oakland rdo rng extending from the rdo rng stn to the Fremont fan marker."

(14) (Jacksonville, Fla.) is amended to read: "Within a 5 mi radius of Imeson Airport, within 2 mi either side of the 64°T radial of the Jacksonville omnirange extending from the omnirange stn to a point 10 mi NE, within 2 mi either side of the E crs of the Jacksonville rdo rng extending from the rdo rng stn to the Ft George Island fan marker and including the airspace within a 3 mi radius of Mayport Naval Auxiliary Air Station." (Note: Added 3-mi radius around Mayport NAAS)

(15) (San Francisco, Calif.) is amended to read: "Within a 5 mi radius of the San Francisco, International Airport, within 2 mi either side of the NW crs of the San Francisco rdo rng extending from the rdo rng stn to a point 10 mi NW, within 10 mi on the NW side and 7-1/2 mi on the SE side of the NE crs of the San Francisco rdo rng extending from the rdo rng stn to a point 9 mi NE, and within 2 mi on the SW side of the SE crs of the San Francisco rdo rng extending from the rdo rng stn to a point 5 mi SE. The portions of this control zone which overlap the Oakland, Calif., control zone are excluded."

(16) (Omaha, Nebr.) is amended by adding the following portion to present control zone: "and within 2 mi either side of the 72°T and 252°T radials of the Omaha omnirange extending from the Offutt AFB 5 mi radius zone to a point 2 mi NE of the omnirange stn."

(17) (Waco, Tex.) is amended to read: "Within a 5 mi radius of Waco Municipal Airport, within a 5 mi radius of James Connally AFB, Waco, Tex., within 2 mi either side of direct lines from James Connally AFB extending northward to the West nondirectional rdo bcn & eastward to the Prairie Hill nondirectional rdo bcn."

(18) (Beaumont, Tex.) is amended to read: "Within a 5 mi radius of Jefferson County Airport, Beaumont, Tex., within 2 mi either side of the N crs of the Beaumont rdo rng extending from the rdo rng stn to a point 10 mi N, within 2 mi either side of the 64°T and 244°T radials of the Beaumont omnirange extending from the 5 mi radius zone to a point 10 mi SW of the omnirange stn, and within 2 mi either side of the Beaumont ILS localizer NW crs extending from the 5 mi radius zone to a point 10 mi NW of the airport."

(19) (Pocatello, Idaho) is added to read: "Within a 5 mi radius of Phillips Airport, Pocatello, Idaho, within 2 mi either side of the W crs of the Pocatello rdo rng extending from the rdo rng stn to a point 10 mi W, and within 2 mi either side of a line bearing 45°T from Phillips Airport extending to a point 10 mi NE of the airport."

(20) (Clinton, Okla.) is added to read: "Within a 7 mi radius of Clinton-Sherman AFB, Clinton, Okla., and within 2 mi either side of the extended centerline of rnwy 17/35 extending from the Air Force Base to points 9 mi N and S of the Air Force Base."

(21) (Mineral Wells, Tex.) is added to read: "The airspace beginning at a point at lat 32-47-40, long. 97-58-30 on highway 180, extending clockwise along the arc of a 5 mi radius circle centered on the Mineral Wells Airport to a line 2 mi NE of and parallel to the 319°T radial of the Mineral Wells omnirange, thence southeastward along this parallel line to and including a 3 mi radius of the Mineral Wells Airport thence clockwise to a point at lat 32-47-40, thence E along this lat to point of beginning; within 2 mi either side of the 319°T and 139°T radials of the Mineral Wells omnirange extending from the 5 mi radius zone to a point 10 mi SE of the omnirange stn."

(22) (Hoquiam, Wash.) is added to read: "Within a 3 mi radius of Bowerman Airport, Hoquiam, Wash., excluding the portion above 14, 500 ft MSL."

REPORTING POINTS:

(1) Green civil airway No. 2 (Seattle, Wash., to Boston, Mass.) is amended by changing the name of the facility "Livingston, Mont., rdo rng stn;" to read: "Livingston, Mont., nondirectional rdo bcn;"

(2) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska) is amended by changing the name of the facility "Los Angeles, Calif., rdo rng stn;" to read: "Los Angeles, Calif., nondirectional rdo bcn;"

(3) Amber civil airway No. 4 (Brownsville, Tex., to Minot, N. Dak.) is amended by changing the name of the facility "Austin, Tex., rdo rng stn;" to read: "Austin, Tex., nondirectional rdo bcn;" and by changing the reporting point which reads: "intersection of the S crs of the Ft Worth, Tex., rdo rng and the W crs of the Dallas, Tex., rdo rng;" to read: "intersection of the S crs of the Ft Worth, Tex., rdo rng and a line bearing 255°T from the Dallas, Tex., nondirectional rdo bcn;" (Note: Depict Austin H and redescribed Stadium intersection for "all altitudes")

(4) Amber civil airway No. 6 (Jacksonville, Fla., to United States-Canadian Border) is amended by deleting the following reporting point: "Chattanooga, Tenn., rdo rng stn;"

(5) Amber civil airway No. 8 (Los Angeles, Calif., to Ellensburg, Wash.) is amended by changing the reporting point which reads: "The intersection of the W crs of the Los Angeles, Calif., rdo rng and the SE crs of the Camarillo, Calif., rdo rng;" to read: "The intersection of a line bearing 260°T from the Los Angeles, Calif., nondirectional rdo bcn and the SE crs of the Camarillo, Calif., rdo rng;"

(6) Red civil airway No. 10 (Amarillo, Tex., to Augusta, Ga.) is amended by changing the name of the facility "Dallas, Tex., rdo rng stn;" to read: "Dallas, Tex., nondirectional rdo bcn;" (Note: Depict "all altitudes")

(7) Red civil airway No. 48 (Helena, Mont., to Livingston, Mont.) is revoked.

(8) Red civil airway No. 65 (Los Angeles, Calif., to Hayfield Lake, Calif.) is amended to read: "The intersection of a line bearing 175°T from the Los Angeles, Calif., nondirectional rdo bcn and the SW crs of the Long Beach, Calif., rdo rng."

(9) Red civil airway No. 93 (Lincoln, Nebr., to Omaha, Nebr.) is revoked.

VOR REPORTING POINTS:

(1) Domestic reporting points is amended by adding the following reporting points:
(a) Greentown Intersection: the intersection of the Wilkes-Barre-Scranton, Pa., omnirange 117°T (127°M) and the Stroudsburg, Pa., omnirange 000°T (010°M) radials. (all altitudes)
(b) Buck Hill Intersection: the intersection of the Stroudsburg, Pa., omnirange 345°T (355°M) and the Stillwater, N. J., omnirange 298°T (309°M) radials. (all altitudes)
(c) Pecks Pond Intersection: the intersection of the Wilkes-Barre-Scranton, Pa., omnirange 136°T (146°M) and the Stroudsburg, Pa., omnirange 000°T (010°M) radials. (all altitudes)
(d) Geyserville Intersection: the intersection of the Ukiah, Calif., omnirange 147°T and the Point Reyes, Calif. omnirange 352°T radials.
(e) Union Pass Intersection: the intersection of the Doggett, Calif., omnirange 078°T and the Needles, Calif., omnirange 004°T radials.
(f) Farmington, N. Mex., omnirange stn

(2) Domestic reporting point is amended by revoking the following reporting point: Branchville Intersection: the intersection of the Stroudsburg, Pa., omnirange 055°T (065°M) and the Wilkes-Barre-Scranton, Pa., omnirange 117°T (127°M) radials.

√REVISION TO CONTROL AREA/FLIGHT ADVISORY BOUNDARIES BETWEEN OKLAHOMA CITY RAPCON AND KANSAS CITY ARTCC: The following revision to the control area/flight advisory boundaries between Oklahoma City RAPCON and Kansas City ARTCC is effective immediately: "Commencing at the present Kansas City-St. Louis Control Boundary 60 statute mi NW of the Tulsa, Oklahoma, VOR on civil airway V-74, V-190 and V-74S. Thence direct to a point 97-15-30W, and 36-06-45N. Thence direct to a point on the W edge of civil airway V-77 38 s mi N of the Oklahoma City, Oklahoma, VOR forming the boundary between Kansas City-Oklahoma City on V-77 and Blue 5. Thence direct to and along the Kansas City-Oklahoma City Control Boundary to a point 50 s mi SW of the Gage, Oklahoma, VOR on the NE edge of civil airway V-17 and Red 59."

√NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control station. Where there is no control tower or communications station, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

(23 July 57)

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective August 29, 1957:

Section 610.12 Green Civil Airway 2
is amended to read in part:

FROM	TO	MEA
*Bozeman,Mont. LFR	**Livingston,Mont. LF/RBN	11000
*10000 - MCA Bozeman LFR, E-bound

✓**RESTRICTED AREA AMENDMENTS:** The following Restricted Areas shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 202)

Effective August 29, 1957:

(1) Section 608.14, the El Toro, Calif. area (R-293 formerly D-293), amended October 31, 1951 in 16 F.R. 11066, is rescinded.

(2) Section 608.14, the San Diego, Calif. area (R-297 formerly D-297), amended October 31, 1951 in 16 F.R. 11066, is rescinded.

(3) Section 608.52, the Wendover, Utah area (R-258), amended October 20, 1955 in 20 F.R. 7902, is further amended by changing the "Controlling Agency" column to read: "Commander, Wendover Air Force Base, Utah "

(Part 608 - Restricted Area - Amendment 203)

Effective: August 23, 1957

(1) Section 608.18, the Pinecastle, Fla. area (R-340) amended February 27, 1957 in 22 F.R. 1115, is rescinded.

(2) Section 608.18, the Pinecastle, Fla. area (R-165) amended February 27, 1957 in 22 F.R. 1115, is redesignated as follows: Name and location (chart): Pinecastle, Fla Restricted Area (R-165) (Orlando); Description by geographical coordinates: within a 6 mi radius of lat 29-06-52, long. 81-42-55; Designated altitudes: surface to unlimited; Time of designation: continuous; Controlling agency: Comfltair, Jacksonville, Fla.

(3) Section 608.25, the Fort Campbell, Ken. area (R-63) amended February 5, 1957 in 22 F.R. 716, is further amended by changing the "Designated Altitudes" column to read: "Surface to 40,000 ft MSL."

(Part 608 - Restricted Areas - Amendment 204)

Effective: On publication in the Federal Register

The Restricted Area alteration appearing as item 8* in Amendment 201 and published in the Federal Register on July 11, 1957, in 22 F.R. 4879 is hereby corrected to read: "Section 608.51, the Fort Hood, Texas, area (R-219)" instead of "Section 608.51, the Fort Hood, Texas, area (R-291)" and "33,000 ft" instead of "30,000 ft" in the Designated Altitude column.

*NOTE: This appeared as item 7, Effective July 26, 1957 in Airman's Guide, volume 12, number 9, dated 9 July 1957, on page 5.

ON REQUEST REPORTING POINTS: The following on-request reporting points are renamed, designated, redesignated or cancelled and shall become effective as indicated:

DESIGNATED: Effective 1 August 1957

(1) CLAYPOOL, IND. (VHF) INTSXN - the intsxn of the 168°T radial of the Goshen, Ind. VOR and the 277°T radial of the Ft. Wayne, VOR.

REDESIGNATED: Effective 1 August 1957

(1) AUBURN, N.H. (VHF) INTSXN - the intsxn of the 051°T radial of the Gardner, Mass. VOR and the 153°T radial of the Concord, N.H. VOR.

(2) SHABBONA, ILL. (VHF) INTSXN - the intsxn of the 153°T radial of the Rockford, Ill. VOR and the 238°T radial of the Northbrook, Ill. VOR and the 269°T radial of the Naperville, Ill. VOR.

(3) WARRINGTON, PA. (VHF) INTSXN - the intsxn of the 086°T radial of the Pottstown, Pa. VOR and the 047°T radial of the West Chester, Pa. VOR.

DESIGNATED: Effective August 29, 1957

(1) ANNA, OHIO (VHF) INTSXN - the intsxn of the 211°T radial of the Findlay, Ohio VOR and the 309°T radial of the Sidney, Ohio VOR.

(2) ARLINGTON, TEX. (LF) INTSXN - the intsxn of the 255°T bearing from the Dallas, Tex. Rbn and the 345°T bearing from Grand Prairie, Tex. Rbn.

(3) ASHTON, MD. (VHF) INTSXN - the intsxn of the 179°T radial of the Westminister, Md. VOR and the W crs of the Baltimore (Friendship) Md. ILS lclzr.

(4) BRANCHVILLE, N.J. (VHF) INTSXN - the intsxn of the 055°T radial of the Stroudsburg Pa. VOR and the 117°T radial of the Wilkes-Barre, Pa. VOR. (Formerly compulsory)

(5) CAGLE, TENN. (VHF) INTSXN - the intsxn of the 333°T radial of the Chattanooga, Tenn. VOR and the 231°T radial of the Crossville, Tenn. VOR.

(6) CAMBRIDGE, OHIO (VHF) INTSXN - the intsxn of the 252°T radial of the Wheeling, W. Va. VOR and the 105°T radial of the Appleton, Ohio VOR.

(7) CLOVERPORT, TENN. (VHF) INTSXN - the intsxn of the 066°T radial of the Memphis Tenn. VOR and the 164°T radial of the Dyersburg, Tenn. VOR.

(8) COUNTY, OHIO (VHF) INTSXN - the intsxn of the 069°T radial of the Cleveland, Ohio VOR and the 280°T radial of the Chardon, Ohio VOR.

(9) COYOTE WELLS, CALIF. (VHF) INTSXN - the intsxn of the 265°T radial of the El Centro, Calif. VOR and the 171°T radial of the Thermal, Calif. VOR.

(10) DOWLING, FLA. (VHF) INTSXN - the intsxn of the 312°T radial of the Gainesville, Fla. VOR and the 169°T radial of the Valdosta, Ga. VOR.

(11) DUNCAN, TEX. (VHF) INTSXN - the intsxn of the SW crs of the San Antonio, Tex. ILS lclzr and the SE Kelly, Tex. LFR.

(12) EARLS, VA. (VHF) INTSXN - the intsxn of the 171°T radial of the Flat Rock, Va. VOR and the SW crs of the Richmond, Va. ILS lclzr.

(13) FAIRMONT, TEX. (VHF) INTSXN - the intsxn of the 176°T radial of the Shreveport, La. VOR and the 089°T radial of the Lufkin, Tex. VOR.

(14) FANNET, TEX. (VHF) INTSXN - the intsxn of the 273°T radial of the Beaumont, Tex VOR and the 040°T radial of the Galveston, Tex. VOR.

(15) JAMESBURG, N.J. (VHF) INTSXN - the intsxn of the 293°T radial of the Colts Neck, N.J. VOR and the 236°T radial of the Idlewild, N.Y. VOR.

(16) KOUNTZE, TEX. (VHF) INTSXN - the intsxn of the 334°T radial of the Beaumont, Tex. VOR and the 271°T radial of the Lake Charles, La. VOR.

(17) LAKE, TEX. (VHF) INTSXN - the intsxn of the 250°T radial of the Lake Charles, La. VOR and the SE crs of the Beaumont, Tex. ILS lclzr.

(18) LINESVILLE, PA. (VHF) INTSXN - the intsxn of the 109°T radial of the Jefferson, Ohio VOR and the 203°T radial of the Erie, Pa. VOR.

(19) LONDON, OHIO (VHF) INTSXN - the intsxn of the 244°T radial of the Appleton, Ohio VOR and the 099°T radial of the Dayton, Ohio VOR.

(20) MIDDLETOWN, PA. (VHF) INTSXN - the intsxn of the 107°T radial of the Harrisburg, Pa. VOR and the 013°T radial of the Westminister, Md. VOR.

(21) MILAN, TENN. (VHF) INTSXN - the intsxn of 088°T radial of the Dyersburg, Tenn. VOR and the 328°T radial of the Jack's Creek, Tenn. VOR.

(22) MITCHELL, TEX. (VHF) INTSXN - the intsxn of the 334°T radial of the Beaumont, Tex. VOR and the NW crs of the Beaumont, Tex. ILS lclzr.

(23) PERRY, GA. (VHF) INTSXN - the intsxn of the 102°T radial of the Columbus, Ga. VOR and the 205°T radial of the Macon, Ga. VOR.

(24) PLAIN CITY, OHIO (VHF) INTSXN - the intsxn of the 109°T radial of the Sidney, Ohio VOR and the 084°T radial of the Dayton, Ohio VOR.

(25) PORTLAND, IND. (VHF) INTSXN - the intsxn of the 162°T radial of the Goshen, Ind. VOR and the 279°T radial of the Sidney, Ohio, VOR.

(26) RICHWOOD, OHIO (VHF) INTSXN - the intsxn of the 144°T radial of the Findlay, Ohio VOR and the 083°T radial of the Sidney, Ohio VOR.

(27) SABINE, TEX. (VHF) INTSXN - the intsxn of the 109°T radial of the Beaumont, Tex. VOR and the 241°T radial of the Lake Charles, La. VOR and the SE crs of the Beaumont Tex. ILS lclzr.

(28) SILLSBEE, TEX. (VHF) INTSXN - the intsxn of the 349°T radial of the Beaumont, Tex. VOR and the 271°T radial of the Lake Charles, La. VOR.

(29) SINGER, LA. (VHF) INTSXN - the intsxn of the 334°T radial of the Lake Charles, La. VOR and the 038°T radial of the Beaumont, Tex. VOR.

(30) SYNDER, PA. (VHF) INTSXN - the intsxn of the 275°T radial of the Allentown, Pa. VOR and the 336°T radial of the Pottstown, Pa. VOR.

(31) TITUSVILLE, PA. (VHF) INTSXN - the intsxn of the 304°T radial of the Fitzgerald, Pa. VOR and the 260°T radial of the Bradford, Pa. VOR.

(32) TOMHEAD, CALIF. (VHF) INTSXN - the intsxn of the 291°T radial of the Red Bluff, Calif. VOR and the 338°T radial of the Williams, Calif. VOR.

(33) WAVERLY, TENN. (VHF) INTSXN - the intsxn of the 044°T radial of the Jack's Creek, Tenn. VOR and the 088°T radial of the Dyersburg, Tenn. VOR.

(34) WINNIE, TEX. (VHF) INTSXN - the intsxn of the 255°T radial of the Beaumont, Tex. VOR and the 040°T radial of the Galveston, Tex. VOR.

(35) YAGER, CALIF. (VHF) INTSXN - the intsxn of the 110°T radial of the Fortuna, Calif. VOR and the SE crs of the Arcata, Calif. ILS lclzr.

REDESIGNATED: Effective August 29, 1957

(1) ALVORD, TEX. (LF) INTSXN - the intsxn of the 310°T bearing from Dallas, Tex. Rbn and the 027°T bearing from the Mineral Wells, Tex. Rbn.

(2) AVALON, CALIF. (LF) INTSXN - the intsxn of the 176°T bearing from the Los Angeles, Calif. Rbn and the 279°T bearing from the Oceanside, Calif. Rbn.

(3) BULVERDE, TEX. (LF) INTSXN - the intsxn of the NW crs of the Randolph, Tex. LFR and the 046°T brng to Austin, Tex. Rbn.

(4) CIBOLO, TEX. (LF) INTSXN - the intsxn of the N crs of the San Antonio, Tex. LFR and the 046°T brng to Austin, Tex. Rbn.

(5) COWAN, IND. (VHF) INTSXN - the intsxn of the 069°T radial of the Indianapolis, Ind. VOR and the 182°T radial of the Ft. Wayne, Ind. VOR.

(6) EASTWOOD, TEX. (VHF) INTSXN - the intsxn of the 167°T radial of the San Antonio, Tex. VOR and the 091°T brng from Kelly, Tex. LFR.

(7) EDGEWOOD, TEX. (LF) INTSXN - the intsxn of the 094°T brng from the Dallas, Tex. Rbn and the NW crs of the Tyler, Tex. ILS lclzr.

(8) ELMENDORF, TEX. (VHF) INTSXN - the intsxn of the 167°T radial of the San Antonio Tex. VOR and the 040°T radial of the Cotulla, Tex. VOR.

(9) ELOISE, TEX. (LF) INTSXN - the intsxn of the NW crs of the Bryan, Tex. LFR and the 046°T brng from Austin, Tex. Rbn.

(10) EMPIRE, PA. (VHF) INTSXN - the intsxn of the W crs of the Pittsburgh, Pa. ILS lclzr and the 347°T radial of the Wheeling W. Va. VOR.

(11) ENGLEWOOD, OHIO (VHF) INTSXN - the intsxn of the SW crs of the Dayton, Ohio ILS lclzr and the 146°T radial of the Dayton, Ohio VOR.

(12) FAIRPORT, OHIO (VHF) INTSXN - the intsxn of the 049°T radial of the Cleveland, Ohio VOR and the 279°T radial of the Jefferson, Ohio VOR.

(13) FARMERS BRANCH, TEX. (LF) INTSXN - the intsxn of the 351°T bearing from Dallas, Tex. Rbn and the E crs of the Ft. Worth, Tex. LFR.

(14) GARDEN CITY, ALA. (LF) INTSXN - the intsxn of the N crs of the Birmingham, Ala. LFR and the SE crs of the Muscle Shoals, Ala. LFR.

(15) GREGORY, PA. (VHF) INTSXN - the intsxn of the 118°T radial of the Wheeling, W. Va. VOR and the 185°T radial of the Ellwood City, Pa. VOR.

(16) GRESHAM, ORE. (VHF) INTSXN - the intsxn of the 153°T radial of the Portland, Ore. VOR and the back crs of the Portland, Ore. ILS lclzr.

(17) HADLEY, PA. (VHF) INTSXN - the intsxn of the 066°T radial of the Youngstown, Pa. VOR and the 174°T radial of the Erie, Pa. VOR.

(18) JACK, TEX. (VHF) INTSXN - the intsxn of the 084°T radial of the Midland, Tex. VOR and the 139°T radial of the Big Spring, Tex. VOR and the 251°T radial of the Abilene, Tex. VOR.

(19) JOHNSON, TEX. (VHF) INTSXN - the intsxn of the 113°T radial of the Midland, Tex. VOR and the 212°T radial of the Big Spring, Tex. VOR.

(20) KING, TEX. (VHF) INTSXN - the intsxn of the 146°T radial of the Midland, Tex. VOR and the 199°T radial of the Big Spring, Tex. VOR.

(21) LA HABRA, CALIF. (LF) INTSXN - the intsxn of the 063°T bearing from Los Angeles, Calif. Rbn and the NE crs of the Long Beach, Calif. LFR.

(22) LAZY X, TEX. (VHF) INTSXN - the intsxn of the 101°T radial of the Big Spring, Tex VOR and the 251°T radial of the Abilene, Tex. VOR.

(23) LIPAN, TEX. (LF) INTSXN - the intsxn of the 255°T brng from the Dallas, Tex. Rbn and the 190°T brng from the Mineral Wells, Tex. Rbn.

(24) LITTLE ELM, TEX. (LF) INTSXN - the intsxn of the 351°T brng from the Dallas, Tex. Rbn and the 054°T brng from the Ft. Worth, Tex. LFR.

(25) MASON, OHIO (VHF) INTSXN - the intsxn of the 168°T radial of the Dayton, Ohio VOR and the 045°T radial of the Cincinnati, Ohio VOR.

(26) McQUEENEY, TEX. (VHF) INTSXN - the intsxn of the 089°T radial of San Antonio, Tex. VOR and the 207°T radial of the Austin, Tex. VOR.

(27) MT. HOPE, OHIO (VHF) INTSXN - the intsxn of the 051°T radial of the Tiverton, Ohio VOR and the 100°T radial of the Mansfield, Ohio VOR.

(28) MUSTANG, TEX. (VHF) INTSXN - the intsxn of the 007°T radial of the Midland, Tex. VOR and the 260°T radial of the Big Spring, Tex. VOR.

(29) PERRY, FLA. (VHF) INTSXN - the intsxn of the 333°T radial of the Cross City, Fla. VOR and the 113°T radial of the Tallahassee, Fla. VOR.

(30) PILOT POINT, TEX. (LF) INTSXN - the intsxn of the 351°T brng from Dallas, Tex Rbn and the SW crs of the Perrin AFB, Tex. LFR.

(31) PLANO, TEX. (LF) INTSXN - the intsxn of the E crs of the Ft. Worth, Tex. LFR and the 036°T brng from the Dallas, Tex. Rbn.

(32) POWERSVILLE, GA. (VHF) INTSXN - the intsxn of the 151°T radial of the Atlanta, Ga. VOR and the SW crs of the Macon, Ga. ILS lclzr and the 020°T radial Albany, Ga. VOR.

(33) ROSS AVE, TEX. (LF) INTSXN - the intsxn of the 094°T brng from the Dallas, Tex Rbn and the SE crs of the Dallas, Tex. ILS lclzr.

(34) ROWENA, TEX. (VHF) INTSXN - the intsxn of the 024°T radial of the San Angelo, Tex. VOR and the 124°T radial of the Big Spring, Tex. VOR.

(35) STERLING, TEX. (VHF) INTSXN - the intsxn of the 293°T radial of the San Angelo, Tex. VOR and the 153°T radial of the Big Spring, Tex. VOR.

(36) VANNATTA, TEX. (VHF) INTSXN - the intsxn of the 124°T radial of the Big Spring, Tex. VOR and the 334°T radial of the San Angelo, Tex. VOR.

(37) WATTS BAR, TENN. (LF) INTSXN - the intsxn of the 112°T bearing from Smithville Tenn. Rbn and the SW crs of the Knoxville, Tenn. VOR.

(38) WAXAHACHIE, TEX. (LF) INTSXN - the intsxn of the 185°T bearing from the Dallas, Tex. Rbn and the 133°T brng from Ft. Worth, Tex. LFR.

CANCELLED: August 29, 1957

(1) ARBA, OHIO (VHF) INTSXN - the intsxn of the 268°M radial of the Dayton, Ohio VOR and the 360°M brng from the Richmond, Ind. Rbn.

(2) BALTIC, OHIO (VHF) INTSXN - the intsxn of the 121°T radial of the Mansfield, Ohio VOR and the 282°T radial of the Wheeling, W. Va. VOR.

(3) BRADLEY, CALIF. (LF) INTSXN - the intsxn of the NW crs of the Santa Barbara, Calif. LFR and the SW crs of the Fresno, Calif. LFR.

(4) BRIAR HILL, OHIO (VHF) INTSXN - the intsxn of the 123°M radial of the Mansfield, Ohio VOR and the 052°M radial of the Appleton, Ohio VOR.

(5) BUCK HILL, PA. (VHF) INTSXN - the intsxn of the 345°T radial of the Stroudsburg, Pa. VOR and the 299°T radial of the Stillwater, N. J. VOR.

(6) CARTERSVILLE, GA. (LF) INTSXN - the intsxn of the E crs of the Rome, Ga. LFR and the NW crs of the Atlanta, Ga. LFR.

(7) CLAIBORNE, OHIO (VHF) INTSXN - the intsxn of the 061°M radial of the Dayton, Ohio VOR and the 145°M radial of the Findlay, Ohio VOR.

(8) DAWN, OHIO (VHF) INTSXN - the intsxn of the 310°M radial of the Dayton, Ohio VOR and the 228°M radial of the Findlay, Ohio VOR.

(9) DRIFTWOOD, TEX. (LF) INTSXN - the intsxn of the SW crs of theAustin, Tex. LFR and the 280°M brng from Bergstrom, Tex. Rbn.

(10) GLENWOOD, IOWA (LF) INTSXN - the intsxn of the S crs of the Omaha, Neb. LFR and the E crs of the Lincoln, Neb. LFR.

(11) GRIMES, OHIO (VHF) INTSXN - the intsxn of the 060°T radial of the Dayton, Ohio VOR and the 169°T radial of the Findlay, Ohio VOR.

(12) GROVE, PA. (VHF) INTSXN - the intsxn of the 177°T radial of the Wilkes-Barre, Pa VOR and the 360°T radial of the Stroudsburg, Pa. VOR.

(13) HAMILTON, OHIO (VHF) INTSXN - the intsxn of the 022°M radial of the Cincinnati, Ohio VOR and the 155°M brng to Cincinnati, Ohio LFR.

(14) HENSLEY, TEX. (LF) INTSXN - the intsxn of the SE crs of the Ft. Worth (Carter), Tex. ILS lclzr and the W crs of the Dallas, Tex. LFR.

(15) HICKORY, PA. (VHF) INTSXN - the intsxn of the Fitzgerald, Pa. VOR direct radial to the Erie, Pa. VOR and the 261°M radial of the Bradford, Pa. VOR.

(16) KENNESAW, GA. (LF) INTSXN - the intsxn of the NW crs of the Atlanta, Ga. LFR and the 200°M brng to the Lost Mtn., Ga. Rbn.

(17) KINGSVILLE, OHIO (VHF) INTSXN - the intsxn of the 245°T radial of the Erie, Pa. VOR and the 360°T radial of the Youngstown, Ohio VOR.

(18) LAKE SHORE, OHIO (VHF) INTSXN - the intsxn of the NE Cleveland, Ohio ILS lclzr and the 296°T radial of the Youngstown, Ohio VOR.

(19) LASCASSAS, TENN. (LF) INTSXN - the intsxn of the SW crs of the Nashville, Tenn. LFR and the 257°T brng from the Smithville, Tenn. VOR.

(20) LIBERTY, OHIO (VHF) INTSXN - the intsxn of the W crs of the Wright Patterson, Ohio LFR and the 203°M radial of the Dayton, Ohio VOR.

(21) MARYSVILLE, OHIO (VHF) INTSXN - the intsxn of the 277°T radial of the Appleton, Ohio VOR and the 153°T radial of the Findlay, Ohio VOR.

(22) MEADOWBROOK, N. J. (VHF) INTSXN - the intsxn of the 326°T radial of the Idlewild N.Y. VOR and the 230°T radial of the Wilton, Conn, VOR.

(23) MEADVILLE, PA. (VHF) INTSXN - the intsxn of the 108°T radial of the Jefferson, Ohio VOR and the 174°T radial of the Erie, Pa. VOR.

(24) MECHANICSBURG, OHIO (VHF) INTSXN - the intsxn of the 224°T brng to Springfield, Ohio Rbn and the 080°T radial of the Dayton, Ohio VOR and the 169°T radial of the Findlay, Ohio VOR.

(25) PECKS POND, PA. (VHF) INTSXN - the intsxn of the 136°T radial of the Wilkes-Barre, Pa. VOR and the 360°T radial of the Stroudsburg, Pa. VOR.

(26) PLAINFIELD, N. J. (VHF) INTSXN - the intsxn of the 114°T radial of the Stroudsburg Pa. VOR and the SW crs of the Teterboro, N. J. ILS lclzr.

(27) POWERSVILLE, GA. (LF) INTSXN - the intsxn of the SW crs of the Macon, Ga. ILS lclzr and the SW crs of the Macon, Ga. LFR.

(28) ROSSVILLE, TENN. (LF) INTSXN - the intsxn of the SW crs of the Chattanooga, Tenn. LFR and the 280°M radial of the Chattanooga, Tenn. VOR.

(29) SEWART, TENN. (LF) INTSXN - the intsxn of the SE crs of the Nashville, Tenn. LFR and the 043°M brng from the Sewart, Tenn. Rbn.

(30) SIGNAL MTN., TENN. (LF) INTSXN - the intsxn of the NW crs of the Chattanooga, Tenn. LFR and the 270°M brng from the N.Chattanooga, Tenn. Rbn.

(31) SIXTEEN, MONT. (LF) INTSXN - the intsxn of the NW crs of the Livingston, Mont. LFR and the SE crs of the Helena, Mont. LFR.

(32) STAR, OHIO (VHF) INTSXN - the intsxn of the 228°M radial of the Findlay, Ohio VOR and the 325°M radial of the Dayton, Ohio VOR.

(33) THOMASVILLE, PA. (VHF) INTSXN - the intsxn of the 097°M radial of the Gettysburg, Pa. VOR and the 173°M radial of the Harrisburg, Pa. VOR.

(34) TIVERTON, OHIO (VHF) INTSXN - the intsxn of the 052°M radial of the Appleton, Ohio VOR and the 151°M radial of the Mansfield, Ohio VOR.

(35) URBANA, OHIO (VHF) INTSXN - the intsxn of the 060°T radial of the Dayton, Ohio VOR and the 277°T radial of the Appleton. Ohio VOR

(36) UTICA, OHIO (VHF) INTSXN - the intsxn of the 052°M radial of the Appleton, Ohio VOR and the 175°M radial of the Mansfield, Ohio VOR.

(37) W. JEFFERSON, OHIO (VHF) INTSXN - the intsxn of the 262°T radial of the Appleton, Ohio VOR and the 157°T radial of the Findlay, Ohio VOR.

HOLDING PATTERNS: The following holding patters have designated, redesignated, or cancelled as indicated:

DESIGNATED: August 1, 1957

(1) LAKE SHORE, ILL. (VHF) INTSXN - direction of holding - E on 075°T radial of the Naperville, Ill. VOR; direction of turns - right; time - 1 min.

(2) MARENGO, ILL. (VHF) INTSXN - direction of holding - W on 093°T radial of the Rockford, Ill. VOR; direction of turns - right; time - 1 min.

DESIGNATED: August 29, 1957

(1) ASHTON, MD. (VHF) INTSXN - direction of holding - N on 179°T radial of the Westminister, Md. VOR; direction of turns - left; time - 1 minute; min alt 2500'.

(2) DALLAS, TEX. (Rbn) - direction of holding - S on 185°T brng from Rbn; direction of turns - right; time - 1 minute; min alt 2000'.

(3) EARLS, VA. (VHF) INTSXN - direction of holding - S on 171°T radial of the Flat Rock, Va. VOR; direction of turns - right; time - 1 minute; min alt 1500'.

(4) GRESHAM, ORE. (VHF) INTSXN - direction of holding - SE on back crs Portland, Ore. ILS lclzr; direction of turns - left; time 1 minute; min alt 2100'.

(5) JAMESBURG, N. J. (VHF) INTSXN - direction of holding - SW on 236°T radial of the Idlewild, N. Y. VOR; direction of turns - right; time - 1 minute; min alt 1500'.

(6) KOUNTZE, TEX. (VHF) INTSXN - direction of holding - NW on 334°T radial of the Beaumont, Tex. VOR; direction of turns - right; time - 1 minute; min alt 2800'.

(7) LIDO, N. Y. (Rbn) - direction of holding - SW on 030°T inbnd brng (210°T outbnd); direction of turns - left; time - 1 minute; min alt 1500'.

(8) MIDDLETOWN, PA. (VHF) INTSXN - direction of holding - SE on 107°T radial of the Harrisburg, Pa. VOR; direction of turns - left; time - 1 minute; min alt 3000'.

(9) MITCHELL, TEX. (VHF) INTSXN - direction of holding - NW on NW crs of the Beaumont, Tex. ILS lclzr; direction of turns - left; time - 2 minutes; min alt 1400'.

(10) ORADELL, N. J. (VHF) INTSXN - direction of holding - SE on 333°T radial of the Idlewild, N. Y. VOR; direction of turns - right; time - 1 minute.

(11) SABINE, TEX. (VHF) INTSXN - direction of holding - NE on 241°T radial of the Lake Charles, La. VOR; direction of turns - left; time - 1 minute; min alt 1200'.

(12) DUNCAN, TEX. (VHF) INTSXN - direction of holding - SW on SW crs of the San Antonio, Tex. ILS lclzr; direction of turns - right; time - 2 minutes; min alt 2100'.

REDESIGNATED: August 29, 1957

(1) SAN PEDRO, CALIF. (LF) INTSXN - direction of holding - S on 355°T brng to Los Angeles, Calif. Rbn; direction of turns - right; time - 1 minute; min alt 3000'.

(2) LA HABRA, CALIF. (LF) INTSXN - direction of holding - E on 273°T brng to Los Angeles, Calif. Rbn; direction of turns - left; time - 1 minute; min alt 5000'.

(3) MALIBU, CALIF. (LF) INTSXN - direction of holding - W on 080°T brng to Los Angeles, Calif. Rbn; direction of turns - right; time - 1 minute; min alt 2000'.

(4) LOS ANGELES, CALIF. (Rbn) - direction of holding - N on 158°T brng to Rbn; direction of turns - right; time - 1 min; min alt 2000'.

(5) LOS ANGELES, CALIF. (Rbn) - direction of holding - E on 273°T brng to Rbn; direction of turns - left; time - 2 minutes; min alt 2000'.

(6) PLANO, TEX. (LF) INTSXN - direction of holding - E on E crs of the Ft Worth, Tex LFR; direction of turns - right; time - 1 minute; min alt 1900'.

(7) LITTLE ELM, TEX. (LF) INTSXN - direction of holding - NW on 351°T brng from the Dallas, Tex. Rbn; direction of turns - right; time - 1 min; min alt 1800'.

(8) DUNCANVILLE, TEX. (Rbn) - direction of holding - S on 185°T brng from the Dallas, Tex. Rbn; direction of turns - right; time - 1 min; min alt 2600'.

(9) LIPAN, TEX. (LF) INTSXN - direction of holding - E on 255°T brng from the Dallas, Tex. Rbn; direction of turns - left; time - 2 minutes; min alt 2300'.

(10) BERGHOLZ, PA. (Rbn) - direction of holding - SW on 049°T inbnd brng; direction of turns - left; time - 1 minute; min alt 3000'. (formerly a standard pattern)

(11) PALESTINE, PA. (VHF) INTSXN - direction of holding - SE on 326°T radial of the Pittsburgh, Pa. VOR; direction of turns - right; time - 1 minute; min alt 2500'. (formerly a standard pattern)

(12) CIBELO, TEX. (LF) INTSXN - direction of holding - NE on 046°T brng to Austin, Tex. Rbn; direction of turns - right; time - 2 minutes; min alt 2600'.

(13) BULVERDE, TEX. (LF) INTSXN - direction of holding - NE on 046° T brng to Austin, Tex. Rbn; direction of turns - right; time - 2 minutes; min alt 2600'.

(14) WAXAHACHIE, TEX. (LF) INTSXN - direction of holding - S on 185°T brng from the Dallas, Tex. Rbn; direction of turns - right; time - 2 minutes.

CANCELLED: August 29, 1957

(1) CHATTANOOGA, TENN. (LFR) INTSXN - direction of holding - NE on NE crs; direction of turns - left; time - 2 minutes; min alt 2500'.

(2) KENNESAW, GA. (LF) INTSXN - direction of holding - NW on NW crs of the Atlanta, Ga. LFR; direction of turns - left; time - 2 minutes; min alt 3000'.

(3) HENSLEY, TEX. (LF) INTSXN - direction of holding - SE on SE crs of the Ft Worth (Carter), Tex. ILS lclzr; direction of turns - right; time - 1 minute; min alt 2000'.

(4) MEADOWBROOK, N. J. (VHF) INTSXN - direction of holding - NE on NE crs of the Teterboro, N. J. ILS lclzr; direction of turns - right; time - 1 minute.

(5) MARYSVILLE, OHIO (VHF) INTSXN - direction of holding - E on 277°T radial of the Appleton, Ohio VOR; direction of turns - left; time - 1 minute.

(6) UTICA, OHIO (VHF) INTSXN - direction of holding - NE on 052°M radial of the Appleton, Ohio VOR; direction of turns - right; time - 1 minute.

(7) BEAUMONT, TEX. (VOR) - direction of holding - W on 241°M radial; direction of turns - left; time - 2 minutes; min alt 1200'.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

ATC PROCEDURES - APPROACH CONTROL:

On page 66 of FIM, Volume 10, dated June 15, 1956, the following note should be added preceding the last paragraph:

"NOTE: A clearance for a specific type of approach (ILS, ADF, or Straight-in Approach) to an aircraft operating on an IFR flight plan does not necessarily mean that priority will be given over other traffic for a landing. Often because of local traffic or runway in use, it may be necessary for the controller, in the interest of safety, to provide a different landing sequence."

INABILITY TO USE VOR STATIONS IN THE FREQUENCY RANGE FROM 108.2 TO 111.8 MC:

Pilots have reported inability to use VOR stations in the frequency range from 108.2 to 111.8 mc even though the acft receiver operated normally in the range from 112.0 to 117.0 mc. Unmodified early production combination VOR/Localizer receivers were so designed that the lower order of frequencies could be used for the Localizer function only. Such receivers should be modified to operate on the following frequency arrangement:

(1) The even tenth megacycle frequencies between 108.2 and 111.8 and every tenth megacycle between 112.0 and 117.9, inclusive, are utilized for VOR facilities. Example: 108.2, 108.4, 109.2, etc., and 112.0, 112.1, 112.2, 112.3, 115.6, 115.7, etc.

(2) The odd tenth megacycle frequencies between 108.1 and 111.9 are utilized for ILS localizer services. Example: 109.3, 109.5, etc.

Persons having any question about the ability of their VOR receiver to provide proper signal coverage should contact the receiver manufacturer or an authorized repair agency. Most receiver manufacturers have developed a modification which will permit reception of the appropriate facility.

---

(3) MALIBU, CALIF. (LF) INTSXN - direction of holding - W on 080°T brng to Los Angeles, Calif. Rbn; direction of turns - right; time - 1 minute; min alt 5000'.

(4) LOS ANGELES, CALIF. (Rbn) - direction of holding - N on 158°T brng to Rbn; direction of turns - right; time - 1 minute; min alt 2000'.

FLIGHT INFORMATION MANUAL CORRECTIONS:

Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 106, correct Paso Robles, Calif. to read "248°" instead of "252°."

(2) Page 102, delete Sidney, Nebr. check point.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Washington	Dayton Local	WAC 308
Winston-Salem	New York Local	WAC 309
Cleveland Local	St. Louis Local	WAC 359

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-58, about 10 mi NW of Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18)
BIRMINGHAM ARPT-TOWER: About Aug 1 MM and LMM will be shut down - relctn.(6-4) FLD: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inop. (2-6)
✱HUNTSVILLE-RADIO: July 5, ATCS combined with new Mun. Arpt-Tower. (7-7) VOR radials 005°-030° have roughness and bends out of tolerance. (11-2)
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-SPECIAL NOTICE: Unlgtd trees penetrate apch zone to all rnwys. Use caution. 200' and 1/2 mi is absolute tk-off min for all acft. (4-22)
MOBILE-BATES FLD-TOWER: June 18, ILS not to be used for automatic approach below 300'. (6-18) FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld.
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
✱CHANDLER-RADIO: USAF H fac relctd to lat 33-15-09, long. 111-31-52. (7-19)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
FLORENCE-SPECIAL NOTICE: Temporary Controlled Firing Area within the following described area: bounded on the N by lat 33-07-30; E. long. 111-20-00; S lat 33-03-30; W long. 111-22-30. Designated Altitude: Surface to 7200'MSL. Time of Use: 0630-1600 hours MST on or about 30 June 1957 only. Activities Conducted: 4.2 inch Infantry Mortar Firing, High Explosive and Smoke Shell. Using Agency: Heavy Mortar Company, 158th Infantry, National Guard of Arizona, Glendale, Arizona. (4-30)
ARIZONA: FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (6-24)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
PHOENIX-SPECIAL NOTICE: Extreme caution-area between Phoenix VOR & Hassayampa VOR on Victor arwy 16 & Green 5. Extensive high performance, jet acft cross these arwys when departing & arriving Luke AFB in connection with trng conducted Gila Bend Restricted Areas (R-309, R308). This tfc generally crosses V-16 & Green 5 between Hassayampa VOR & town of Tolleson (11 mi W of Phoenix) at alts of 3000' MSL & below-0715 thru 1600, Mon thru Fri. (3-1) All flgts operg thru this area maintain at least 4000'MSL. Flgts lndg or departing within area advised to exercise extreme caution below 4000'MSL. (5-7)
PHOENIX-SKY HARBOR ARPT-SPECIAL NOTICE: Following changes in instrument apch procedures: LFR procedure: Initial approach from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on W course PHX LFR, make right climbing turn returning to LFR. Hold on E course LFR at 5000 in standard pattern within 15 mi. VOR procedure: Initial apch from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on radial 258, make a right climbing turn, returning to VOR. Hold east of VOR on radial 076 at 5000 in standard pattern within 15 mi. Tolleson Int - Int GBN VOR radial 027 and PHX VOR radial 258 or W course PHX LFR. All other items these procedures unchanged. (5-14)
**PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for tk-off, xcpt prior permission arpt manager. (12-7) Functioning 2-way rdo rqrd.
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000.
**SALOME ARPT, 27B, LAX-PHX: Caution - puncture vines. (6-18)
SAN SIMON-RADIO: VOR coverage 030°-170°, 30 n mi; 160°-260°, 30 n mi. (7-4)
SCOTTSDALE-THUNDERBIRD # 2 ARPT: Closed. (3-26)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'.
TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: EL DORADO ARPT: 300'(560'MSL) lgtd twr being erected 1.8 n mi WNW(295° T) at lat 33-11-52, long. 92-41-23 & being completed approx August 1. (6-20)
PINE BLUFF-RADIO: VOR shut down until approx Aug 1. During shutdown, VOR flgts authorized to use PBF homing fac in lieu VOR except V-168 TXK to PBF unusable. Ints and alts as charted. (3-22)
TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)
CALIFORNIA: APPLE VALLEY ARPT: caution - const - men and equip. on field. (4-26)
BASS LAKE-WISHON ARPT: Clsd due grading and reoiling. (6-13)
BECKWOURTH-PLUMAS CO. ARPT: Clsd due rnwy resurfacing. (6-24)
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

CALIFORNIA: BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Aug 1, ILS lclzr will be shut down. Glide slope angle will be 3°. FLD: Rnwy 15-33clsd until approx Aug 2.

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 090°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Clsd. (8-30)

ELSINORE ARPT: Caution - glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200°-230°T. (5-6) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing available for civil acft 2400-0600. Neon apch lgt lane rnwy 30 discontd indefinitely. (1-1) Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1500P week-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail lndgs and tk-offs. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO -SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR and LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23) About Aug 19, LF rng will be shut down until approx Aug 29 - conversion to H fac, with voice. Freq and ident remain the same. Voice controlled by ATCS. (7-19)

LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: About Aug 1, freq 118.9 mc will be changed to 119.9 mc. (7-16)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19) About Aug 1, freq 119.9 mc will be changed to 118.9 mc. (7-16) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equipment crossing rnwy. During VFR wea conditions, civil acft ctc twr on 119.9 mc or listen 119.9 mc, trans 122.7 mc at least 10 mi out. During IFR wea, civil acft ctc Apch Ctl on 118.1 or 119.3, or listen 118.1 or 119.3 mc and trans 122.7 mc. USAF-NAVY-CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off-shore W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E-bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibility to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwys 25L converted to centerline system extending 3000' E of rnwy pavement. (6-21) Apch lgt lane sequenced flashers avail on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (7-11)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MOFFETT FIELD-SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-RADIO: About July 24, ILS will be cmsnd. Lclzr freq: 110.1 mc, ident: MRY. Lctd 1000' SE on a centerline of NW/SE rnwy. Glide slope freq: 334.4 mc. Lctd 825' from apch end NW/SE rnwy and 236' N of centerline of rnwy. Glide angle 3.0°. Apch bear.: 84°. LMM freq: 260 kc, ident: RY. MM lctd 0.60 mi from apch end rnwy. LOM freq: 278 kc, ident: MR. OM lctd 5.14 mi from apch end rnwy. Disregard spurious signals. (7-3)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in opern. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should ctc San Francisco Apch Ctl on 118.5 mc. Communications during IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 or 118.5 mc mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Fransisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only. (4-24)

OAKLAND-METROPOLITAN OAKLAND INTNL ARPT: Dredging and clam shell equipment working S of lndg area. All booms and equipment lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for

** clearance; make left hand pat before lndg. (10-30) 245' lighted tower erected 8 n mi NW (332°T) at lat 37-50-58, long. 122-17-44. (6-26)

OCEANSIDE-RADIO: July 10, VOR shut down until approx Oct 1 - modernization. During this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flgts departing LAX via V208 will be cleared from intsxn LAC VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN during shutdown period.

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT-SPECIAL NOTICE: Acft not lndg ar arpt should avoid apch and depart areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise ctn acct exten simulated IFR apch including jets VFR wea and actual apchs IFR wea.

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-off and lndg prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

OXNARD-VENTURA CO. ARPT: Until approx July 31, 176' lgtd oil drilling derrick erected 1600' W and 2200' N of W end of rnwy 7. (4-30)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000; 150°-180°, 35 n mi at 9000'. (3-14)

**PALOMAR MOUNTAIN-SPECIAL NOTICE: Caution Area C-444 is amended by deleting the phrase "excluding Restricted Area R-293." (7-16)

CALIFORNIA: PASO ROBLES-RADIO: DME coverage 330°-235°, 35 n mi at 6000';235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)
POINT REYES-RADIO: June 27, VOR/DME shut down until approx. July 27, modernization. Durg this period, the following arwys will be unusable: V27 Half Moon Bay-Ukiah;V 27W Salinas-Point Reyes; V25 Stinson Beach Int.-Lakeport Int.; V137 Oakland-Bodega Int. Following VHF intsxns will be unusable: Pedro, Cotati, Bodega, Sunset, Rainbow, Frances, Drake, Balboa, Duxbury. MRA of Stinson Beach 5500'. (6-26)
RED BLUFF-RADIO: DME coverage 225°-245°,35 n mi at 10,000'. (6-30)
RIVERSIDE-RADIO: About Aug 5, LFR will be shut down for course realignment.(7-22)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt.
